AS TO OUR RESPONSIBILITY

THE VERY FIRST FACT WE WISH TO DRIVE HOME is that the HARTMAN FURNITURE & CARPET COMPANY was established in 1855. The year of 1916 marks our 61st anniversary. On the following pages you will find photographic reproductions of our immense Chicago mail-order plant and a few of our great chain of retail stores, forcibly illustrating our progress.

SO VAST AN ENTERPRISE AS OURS has taken sixty-one years to build and the investment of many millions of dollars. Yet, even time and money could never have accomplished such tremendous growth if we had not ALWAYS dealt fairly and honestly with our customers. Success of any kind is generally MERITED. We must GIVE in order to GET. After a fruit tree ceases to bear fruit we chop it down and use it for kindling. It is a natural LAW that if you want to succeed you must give others the BEST that is in you ALL THE TIME. That is why, after sixty-one years, we are today the LARGEST home-furnishing organization in the world. We have succeeded MOST because we have served the people BEST. The little acorn of business honesty and good faith that was implanted into the heart of our business 61 years ago, could not help but grow into the giant oak of today—because the best interests of our customers has always been our first consideration. We gave them, always, the best that was in us, in every respect. In return our customers gave us their utmost confidence and helped us to grow.

YOU HAVE EVERY RIGHT TO KNOW something about a firm and the RESPONSIBILITY of the firm you are thinking of doing business with before you pay out hard-earned money on any purchase. With this in mind let us state a few simple facts:

SUCH WONDERFUL GROWTH AND SUCCESS AS OURS CAN GROW OUT OF ONLY ONE CONDITION. Years ago we started out with the firm determination in our hearts to please and satisfy EACH and EVERY customer, no matter who they were, where they lived, or how big or small their purchase from us might be; and we have followed this policy unfalteringly in every case, regardless of possible loss to us. Then, when we started to grow and we numbered our customers in the thousands, our success did not make us less conscientious; and now, after many years, with over a million and a half customers on our books, we are PROUD to say that success has still not changed our policies. Fair, honest dealing is still our motto. It is our inseparable principle—it is the corner-stone of our business. It is even more than this—IT IS THE SECRET OF OUR TREMENDOUS SUCCESS—it is the secret for the implicit CONFIDENCE with which our customers honor us after once dealing with us; and there will be no exception anywhere at any time toward anyone. Time has taught us that it is better to have your KINDLY FEELING than your money. Therefore, you are safe, absolutely, in dealing with us, because we guarantee you satisfaction; because we are here to STAY; because you are dealing with the LARGEST HOME-FURNISHING ORGANIZATION IN THE WORLD; in fact, because it is Hartman's, which means HEADQUARTERS.

FOR OVER THREE-SCORE YEARS we have been in business. We have succeeded. We have grown to be the largest home-furnishing organization in the world. The 61st year of our business career finds us a PERMANENT establishment—AND IN BUSINESS TO STAY! By honest, square-deal methods we have grown from a modest beginning to our present unquestionable supremacy with more than a million and a half customers on our books. You will find "Hartman" homes—"The Nests that Hartman Feathered"—in every nook and corner of the United States; from the Great Lakes to the Gulf of Mexico; from the Atlantic to the Pacific Ocean. We have a combined capital of over $12,-000,000. Any bank, any newspaper, any farm paper, or magazine will testify to our responsibility, for our organization today stands out alone and supreme—a commercial giant, towering head and shoulders above any and all competition.

THE TREMENDOUS SIZE ALONE of this institution is sufficient guarantee of our honesty of purpose. The PERMANENCY of our enterprise, the FINANCIAL SOLIDITY are both irrefutable proof that time and test have found no flaw or weakness in us, and substantially proves that our honesty and responsibility are both beyond question.

DURING OUR SIXTY-ONE YEAR BUSINESS JOURNEY millions of satisfied customers have been proven conclusively and to their own satisfaction that our service was the best, most efficient and courteous; our methods and policies honorable; our ability to serve the widest in scope; our credit-system extremely generous; our values honest. Nowhere else in the world will you find another institution like this—one which has found its way so THOROUGHLY into the homes and hearts of the people.
OUR LIBERAL CREDIT PLAN

OUR UNMATCHABLE BARGAINS AND LOW PRICES. When you look through this Catalog and compare our prices with those of other stores, you will find that our prices are for the high quality of the goods we offer—or if you compare these prices and qualities with other houses or your home town dealers' prices, say to yourself, "There is a reason for such high quality at such low prices."

There is a reason for it and a GOOD one: Situated as we are in the very heart of the greatest furniture market in the world, we have the finest facilities for picking the very cream of the goods on the market. Then, do not forget this: We buy in THOUSANDS where other firms or retail dealers buy in hundreds or dozens. We buy more at one time than most retail furniture houses buy in years, because we buy for our immense mail-order plant, and our great chain of retail stores. Buying this way (in the largest quantities known) we can afford to sell at a lower price than any other furniture concern in this country, and save you considerable money on almost any article you select; and you never get the best that enormous buying power and experience can command.

We bring the cream of the world's furniture markets right into your own home where you can comfortably select the things you want to beautify your home without the anxiety of furnishing. Furniture EVER ASSEMBLED BY ANY ONE CONCERN.

Think what this means: The world's best—the largest range for selection—brought right into your own home. No one else can give you such an UNLIMITED variety to choose from—no one else can quote you such bargain prices or such generous, easy credit terms.

REMEMBER THAT YOU CAN TAKE A YEAR TO PAY YOUR BILL IF YOU WISH IT.

A Hartman purchase means that you will have the FINEST, the BEST that 25 years' experience of buyers could possibly find after thoroughly searching all through the furniture markets of the entire world.

WHAT OUR IRONCLAD, LEGAL GUARANTEE MEANS

ON THE INSIDE FRONT COVER of this catalog you will find our guarantee printed in full. Read it carefully before looking through this catalog. It is the strongest guarantee possible to frame—and protects you absolutely—you take no chance whatever—you risk positively nothing. We have bought only thoroughly dependable merchandise, which we are not afraid to guarantee. That is why we fully pledge ourselves to return your money and whatever freight charges you have paid both ways, if, for any reason whatsoever, you are not satisfied with your purchase; or if you find the goods unsatisfactory or misrepresented.

We are in business to STAY, and we CANNOT AFFORD to have dissatisfied customers. You are the sole judge and jury in this decision, too. We put the furniture in your home and you can use it, examine it, the whole family can inspect it, and judge its value and beauty. Until you say that you are satisfied with the goods we do not consider that the sale has been made.

WE EXTEND LIBERAL CREDIT TO EVERY-ONE—EVERYWHERE. Your income makes no difference. It doesn't make a particle of difference where you live or how much you earn, we extend you the invitation to beautify your home and enjoy the comforts of a finely-furnished home while you are paying for it.

On page 1 you will find our terms, giving first payment and monthly payment according to the amount of your bill. A glance will show you how EXTREMELY LIBERAL these terms are, and how easy it is to have a beautiful home and pay for it in small monthly payments which you will never mind. Hartman's is the most modern method of extending credit known. Experience has taught us that we can trust implicitly the people who build and love their homes. We know that people who are buying home-comforts are the kind we want for customers, and the kind we are glad to trust to the fullest extent. In extending you credit we do not quibble; we do not ask questions; there is no red tape about our system whatsoever; there are NO EXTRA CHARGES of any kind; no mortgage to sign; no interest to pay. If you wish to the nearest certainty or recommendations; we have no collectors—all payments are made by mail, and no matter if your order is small or large, it will receive the same careful, prompt and accurate attention.

OURS IS A CONFIDENTIAL, DIGNIFIED CREDIT, FREE FROM ANY AND ALL OBJEC-TIONABLE FEATURES.

All you have to do is to make out your order on one of our printed order-blanks and send it, together with the first small payment, AND THAT IS ALL THAT THERE IS TO IT. After that you pay the small monthly payment as due.

And to FURTHER show you how liberal our system is, we add this: If monthly payments cannot always be made because of sickness or loss of employment, we will GLADLY help you out by waiting a reasonable length of time until you CAN pay.
How to Start an Account

Please refer to the index of this catalog, which gives the page numbers of all articles we offer. Pick out the goods you want. Write your order plainly on one of our printed order blanks. Go over the order to make sure that all is clear and complete. Be careful to sign your name in full and write your address plainly. Give your post office address, name of county and state; also the railway station to which you wish your goods shipped. Give the catalog number of each article you want. When an article is listed in several sizes state size wanted. Also mention color you desire. Figure up the total of your bill, then refer to page 1 of this catalog, which shows you how to determine your payments and how much each payment should be. We can not open a charge account for accounts less than $5.00.

Take a Full Year to Pay

We trust you absolutely and give you plenty of time to pay for the things you select. Remember that the size of your income has no bearing whatever on the size of the order you send us. With credit as easy to get as it is from us, there is no reason in the world why you should be without the things you have long wished for. So, if you really desire a beautiful home, this is your opportunity—select from this book and send in your orders at once.

You will find that our modern method of extending credit is quiet, dignified and confidential. There are no embarrassing or disagreeable conditions connected with the way we do business, as you will find out, after trading with us. We give you a square deal, and expect a square deal from you.

All Dealings Confidential

When you order goods from us they are shipped to you marked with plain tags. We do this because, as a rule, our customers do not want their local dealer to know from whom they are buying. He gives no liberal credit; his prices are high, and his assortment does not compare with ours. This is why people prefer to buy from us, because we make our open-charge-account credit strictly confidential. Every precaution is taken to insure each transaction being held private. We even address letters to you in envelopes that do not bear any mark of our being a credit-giving house. No one need feel embarrassed, however, because they buy on credit, but most people prefer to keep such affairs to themselves. Credit is a thing one should be proud of; because, if you are trusted and are considered honest by those who extend the credit.

How to Send Money

The safest and most satisfactory method of sending money is by post office money order, express money order or bank draft. Either of these must be made payable to the firm, using the full name as given. It is not advisable for you to send us your personal check, because there will be a charge at this end for collection. Should you send cash, it should be by registered letter. If payment is made by money order or bank draft and either should be lost in the mail a duplicate may be easily procured and the money would not be lost. If you live on a R. F. D. route, give your letter and money to the rural mail carrier and have money order for you and send it to us. Write your name exactly the same way each time you write to us; it will enable us to reply promptly and will eliminate mistakes.

Our Stock Ready to Ship

We carry the largest finished, ready-to-ship stock of house-furnishings in the United States. A large percentage of the goods you order from this catalog will be shipped in one shipment, direct to you, from Chicago, instead of coming from various points.

All goods, whether shipped from Chicago or factories, or warehouses, are carefully inspected before being packed. We take every precaution to see that goods reach you in perfect condition. Occasionally, it is necessary to ship large, bulky articles "knocked down." Shipped in a "knocked down" state, you save money on the lesser freight charge, and the large articles are easier to handle, thus saving them from possible injury.

No Cash Discount Allowed

We quote one price to all, whether you pay us cash or buy from us on credit. Customers who wish to pay cash are just as welcome to our bargains as credit customers. It is simply impossible for us to give any discount whatever, because our catalog prices are figured with only one small percentage of profit added to the special low factory prices we obtain through our great quantity buying power. You pay us no middlemen's profits as this is entirely eliminated. There is nothing added for the credit we extend, and, as our price on every article we sell is lower than that of dealers and mail-order houses, you can see that it is absolutely out of the question to allow any discount for cash.
WE ACCEPT ORDERS FOR ANY AMOUNT, but we do not open charge accounts for less than $5.00. Should you wish to order small priced items amounting to less than $5.00, please send the full amount with your order. We advise you to order goods amounting to more than $5.00, as it is more profitable to you; besides you get the advantage of our long time credit. We never ship goods C. O. D., because we sell on open-charge-account, credit-terms. We take all risk by allowing customers to have full possession of the Goods before they are paid for, and if, after comparison and inspection, you decide not to keep them, the goods may be returned to us at our expense, as per our legal guarantee, and any money you have paid us as well as freight charges paid out by you will be promptly refunded.

CUSTOMERS PAY THE FREIGHT WHEN THEY RECEIVE THE GOODS, EXCEPT WHEN WE SHIP GOODS to any prepaid station where there is no agent to collect the freight charges, these charges must be prepaid by you. Figure the freight charges to some town near you, which is equally distant from Chicago; by referring to page 14 for table of freight rates. Look over the freight rates carefully; if your point is not mentioned, take the nearest town to you as a basis, and you will have no trouble in estimating the charges. In the case of prepaid stations, include the extra amount for prepaying freight with your order so that we can prepay the freight for you.

Be liberal in your freight allowance; if you send more than is required the balance left will be credited to your account.

You will observe the rules we have outlined, we feel confident we can adjust all matters satisfactorily.

IT IS VERY IMPORTANT that you be careful and inspect your shipment BEFORE accepting it from the transportation company. This should always be done so that they can be held responsible for damages or shortages which sometimes occur. Should you discover either, SEE THAT YOUR AGENT MAKES NOTATION IN THE CONDITION OF GOODS ON THE RECEIPT EXPENSE BILL he gives you for freight you pay. BE SURE to have the agent write the nature of the damage or shortage, if any, in full, for with this agent's notation on the expense bill, you are then in position to secure satisfaction. Send the expense bill with its notation, to us, and we'll take steps immediately and do all in our power to protect you from any loss.
The Views on this and following Pages give a splendid Idea of the Immense...
Here are Interior Views of Our Administration Building

A BUSINESS CONCERN as large as Hartman's cannot afford to be SMALL in anything, nor can we afford to misrepresent anything; therefore when we unreservedly guarantee EVERYTHING we sell, and GUARANTEE your satisfaction, we KNOW that we can please you. We KNOW that we can save you considerable money on furniture, and we KNOW that after you have once dealt with us you will THINK OF HARTMAN'S when you next think of buying furniture.

It is, and always has been, A PERSONAL OBLIGATION with us to please a customer in EVERY respect, and to this we pledge ourselves fully.

THE PICTURES on this page are photographs of some of the departments of our great mail-order plant, which covers an entire city block and has a frontage on four important streets. These offices are used exclusively for the transaction of business with our vast army of customers located in cities and towns, villages and farms, all over the United States. It is here that over a million and a half happy families send orders for things they want—buying by mail, on our modern open-account-credit plan, the furnishings that make their homes beautiful, their farms profitable, their surroundings pleasant, and their lives more enjoyable.
Let Hartman Feather Your Nest
where correspondence from our million and more customers is handled

You would enjoy visiting our big mail-order plant in Chicago. But, since only a few of our customers come here, we reproduce photographs of our beautiful buildings, and some of their interiors, for the benefit of all who desire to know what their present or prospective trading place looks like. If you could see these great structures and study their wonderful arrangement, we know you would be wonderfully impressed. They are the finest, most modern, best equipped mail-order merchandising buildings in the United States, and if you ever visit Chicago, we extend to you a cordial invitation to call on us and inspect our wonderful institution.

Our modern offices marvelous shipping facilities, convenient location and fireproof construction of our buildings, make the handling of your mail orders rapid, economical and absolutely safe. Every modern office and warehouse appliance known has been installed, permitting us to handle every order with ease and with the highest possible degree of satisfaction to our customers. All this reduces our working expenses and naturally contributes to the reduction of our prices. In every manner possible we always strive to reduce the cost of home-furnishings, and other goods we sell, to a point that no other concern can equal.
HARTMAN'S
ENDORSED BY LEADING BANKS

THE BANK LETTERS PUBLISHED ON THE FOLLOWING PAGES show you CONCLUSIVELY how the prominent officials of the GREATEST, STRONGEST banks in the United States bear official and personal testimony to the financial responsibility, honest mercantile reputation, and absolute DEPENDABILITY of the Hartman Furniture & Carpet Company.

THESE EXPRESSIONS WERE MADE only after a long business acquaintance and close association; and every man and woman in the United States may accept WITHOUT QUESTION the statements of these great banks with their total of many millions of capital and surplus.

WE NOT ONLY GUARANTEE, BUT WE INSIST on your complete satisfaction in every transaction with us, and back of that pledge, is not only our enormous capital, running up into figures that are several millions of dollars MORE than any concern in our line of business, but a deep sense of our MORAL obligation as well.

IT IS AGREED, UNDERSTOOD AND GUARANTEED that all goods you order from us must measure up in every particular to our claims, and more—they must prove as MONEY-SAVING and VALUE-GIVING as we claim them to be. We leave the decision entirely in your hands.

IF YOU ARE NOT SATISFIED IN EVERY PARTICULAR in your dealings with us, you are at perfect liberty to return the goods AT OUR EXPENSE, and we will immediately, without ARGUMENT or DELAY, either send in exchange any other article you wish, or refund your money—TOGETHER WITH EVERY PENNY you have paid for freight BOTH WAYS. A fairer, squarer offer never was made by ANY firm; and you can see that you risk NOTHING in dealing with us; and you can see how genuine is our desire to make a friend of each customer.

THREE SCORE YEARS AGO WHEN WE STARTED OUR BUSINESS we knew that our success depended in a large measure upon our customers' confidence in us. We realized that it was within our power to make or break that confidence. Millions of people have since given us their utmost confidence and in return we always give them a fair and square deal and have treated them in the fairest way we know how. We will do the same by you. Send us your order and let us prove it.
HARTMAN'S IN BUSINESS TO STAY

ON PAGES 6, 7, 8, 9, 10 AND 11 YOU SEE PHOTOGRAPHS
of our great Chicago mail order plant and our chain of big retail stores in the principal cities of the United States. We show you these actual photographs that you may better realize the great size of our concern. Look at all these buildings carefully. To build up so great an enterprise has taken many years and the investment of many millions of dollars. The very vastness of this enterprise is your most binding guarantee. It means that for sixty-one years we have been here, and it means THAT WE ARE IN BUSINESS TO STAY!

IT STANDS TO REASON that such a great enterprise as ours, serving over a million and a half customers, could never have been built if we did not give the people BETTER values at BETTER prices and BETTER treatment than they could possibly get anywhere else. Since we have been in business we have made beautiful a great many homes for the wage-earners of the country; people in every walk of life, who were shrewd enough to avail themselves of our liberal credit terms, and enjoy a fine home, while paying for it.

SO GIGANTIC A SCALE OF DOING BUSINESS and our enormous growth tell their own story. WE HAVE ALWAYS MADE GOOD! We will ALWAYS make good, and we will always back up every word we say. It is worth something to know that you are sending your order and your money to a firm that has given over sixty consecutive years of successful service to the public. You take no risk—you are not EXPERIMENTING when you deal with Hartman's.

Bargains on Credit
RUGS, CARPETS-
Linoleums, Oil Cloths, Curtains Etc.

SELECTED FOR VALUE FROM WELL KNOWN MILLS

Our Credit Terms Make It Easy For You To Purchase

With credit as easy to get as it is from Hartman's, there is no reason in the world for people to live in poorly furnished homes. It must not be forgotten that home happiness depends a whole lot on pleasant, comfortable surroundings. They can be easily and economically acquired by this broad, liberal credit plan of ours. No matter who you are—where you live—what your occupation may be—or what your earnings are—you can buy on credit from us. After you have once started dealing with us, and found out how fair and honest our methods are, we are sure that you will at no time order home furnishings elsewhere. A trial order and comparison will settle that question.

THE CARPET AND RUGS
shown on the following colored pages are the product of the most reliable mills which have established a wide reputation for high quality, best design and beautiful colors in floor coverings. We buy these goods at decisive savings in large lots. It is the demand of our great army of over a million customers and our enormous capital that gives us the power to buy these big bargains at a price which permits us to offer them to you at our low prices.

WE WANT YOU TO KNOW that not only did our mammoth purchasing power enable us to buy our present line of rugs and carpets at a saving but our prestige in the market is so great that we practically had the choice of all the new and best designs.

WHEN YOU ORDER A RUG carpet or any other floor covering from this catalogue you have new patterns and colorings to choose from. So that you can prove all this to your own satisfaction, you can take ample time to compare prices and quality, as we will send any rug, carpet or curtain to you for examination. All you have to do is send your order—receive and take the goods in your home—let your entire family see, use and judge them—give them any test you please—then, if you are thoroughly satisfied—satisfied that the price, quality and all are just exactly as we tell you—buy them on our liberal easy payment plan. But, if for any reason whatever, you are not pleased, return the goods to us at our expense and we will be more than glad to refund your money, including the freight charges. Our policy is to satisfy.

THE FIRST IMPRESSION in buying a rug or carpet is usually made by its appearance. If the pattern is pleasing and the color combinations harmonious, the sale is usually made—but greatest care should also be given in examining the actual quality of the materials that enter into the manufacture of the goods. A rug of beauty is often like human beauty, "only skin deep," but our entire business policy is based upon a more substantial foundation than appearance. We are sure of the quality before we offer the article for sale.

THE RESULT is that you take absolutely no chances when you buy by mail—of us—you are positively sure of getting the most desirable product of the best looms. We couldn't afford to ship carpets, rugs, etc., to customers unless we were pretty sure the goods would prove themselves worthy of making the order a bona fide sale—so you see we rely upon the Quality and Price as well as our liberal credit treatment to make you a steady, satisfied customer.

ACTUAL COLORS SHOWN The following pages faithfully describe and illustrate, in actual colors, our rugs, carpets and draperies so that you may get an idea of how beautiful our line really is. You have our binding guarantee as to low price, excellence and lasting quality. Now, with all these assurances, don't you think you can feel just as safe—just as satisfied—in doing your buying by mail as though you were in our establishment to make your choice?

SAVE MONEY Our offer of low price bargains makes up a great sale of floor coverings and curtains. If you are in need of such goods, you will make a very wise purchase by sending us your order for whatever your wants in this line might be.
Waste in Matching Carpet Explained

For the Benefit of Those Who Do Not Thoroughly Understand Why There Is a Waste in Cutting Carpet So That the Pattern of Each Strip Matches, We Wish to Submit the Following Explanation: The Figure on the Edge of One Strip of Carpet Must Match the Figure in the Pattern of the Strip Adjoining. If Several Strips of Cheats Were Cut along the Grain, the Strips Would Be Too Close to the End. While on the Next Strip the Figure Might Come Anywhere From 6 to 36 Inches From the End. You Can Readily See That It Would Not Match at the

MEASURE THE DISTANCE AROUND THE ROOM IN YARDS, which gives the exact number of yards of border required.

TO GET THE NUMBER OF STRIPS OF CARPET necessary to go inside of the border, subtract the width of two strips of border or 45 inches from the width of room. Divide by 27 inches, which is the width of one strip of carpet, which gives the number of strips of carpet.

TO MATCHING PATTERNS. The cost of saving carpet with border is 5 cents per yard extra.

IF YOUR ROOM SHOULD REQUIRE MORE THAN AN EQUAL NUMBER OF STRIPS, you should still allow for one full width. If there is any waste we will send it to you with your carpet.

WHERE OUR LACE AND WHITE GOODS ARE MADE

HE NEWEST IDEAS. This colossal mill employs a large force of thoroughly experienced and expert designers both in this country but abroad as well. They are kept in constant touch with all the developments in the field of decorating, and every new tendency is reflected at once in the conceptions that are brought out in our goods. We particularly direct your attention to the large variety of specially designed lace curtains on the following pages of this catalogue. Look them over carefully for a full appreciation of the magnificence of these patterns, excellent values and reasonable prices.

UNSURPASSED QUALITY. The cotton yarns which are chosen in the production of our lace curtains have long, strong fibres, which insure good wearing quality. This is a point worthy of consideration, because you are certain of securing the kind of curtains which every particular housewife should demand. Service is an important factor, for the reason that when you buy lace curtains you do so with the intention of having them last for a long period of time. The bleaching and every one of the processes of finishing tends to increase and improve the wearing merit of our lace curtains.

THE VALUE OF "VALUE." When you buy a piece of merchandise, let "value" be your watchword. We encourage the standard of value and even court competition, because we thoroughly appreciate the value of our values. We have anticipated the demands of our shrewdest buyers and the extra, in a word, way we do not hesitate to ask them to compare the offerings which we make with those of other mail order houses; in fact, a comparison with the buying opportunities found in the ordinary channels of trade will only strengthen our claims. A tremendous purchasing power places us in a position to carry merchandise at prices that are positively bedrock. An endless array of customers enables us to sell this same merchandise with comparative ease. The patrons who have made this investigation what it is have the confidence that has encouraged us to develop our wonderful and successful business enterprise. This rocker is an example of true Hartman value.

THIS ROCKER will delight every member of the family. All of the finished parts are made of solid oak, the balance being of sound hardwod. The deep carvings on the front and back are well distributed and beautiful in style. The finish is a genuine golden oak, so popular as to require no special comment. The seat is nice and roomy and very strong, containing six stout springs. Over these settings there is a filling of tow with jute covering. The upholstering is imitation black leather which is known for its long wear, and its remarkable resemblance to genuine leather. Below we give the dimensions of this excellent rocker. From these measurements you can readily see what a splendidly proportioned rocker this is. But to fully appreciate its worth you should see this elegant piece of furniture in your home. Order it on approval.

MEASUREMENTS. The seat is 23 inches long by 15 inches wide. One inch stock is used on the front posts, measuring 4½ inches wide and 2 inches long. The arms likewise are cut from 1 inch stock, are 2½ inches in width and 3 inches in length. Particularly note the beautiful design of the front posts, the two paneled back and the very elegant carving on the frame. We have not cheapened the materials in order to reduce the price. It is really worth more than we ask. Shipping weight, about 50 lbs.

THE BEST at the highest price is no more to be desired, from a standpoint of value, than the ‘cheapest’ at the lowest price. We list all grades of merchandise and in each grade we state emphatically that we offer the best quality at the lowest price to be secured through use of the various channels of trade. That is a pretty strong statement, but we can back up every word of it in every instance. Take the rocker illustrated to the right as a convincing example.

IT IS MADE In a substantial manner, all finished parts being constructed of thoroughly seasoned solid oak. The balance being of hardwood. The front legs and ears are lavishly carved, as shown in the illustration. The finish is a richly glazed golden oak. The upholstering is of the popular imitation Spanish brown leather, which looks like the real Spanish leather and gives no end of satisfaction service. The filling is of either wood-fibers or jute with strong jute covering.

SIX SPRINGS are used to support the seat. This method of construction means not only long life to the rocker, but added comfort to the one who is lucky enough to select this number. Seat measures 15½ inches in length. The lumber from which this rocker is cut is 1 inch stock. The height of back is approximately 27 inches and the other dimensions are of just a right size to give this piece of furniture both graceful and symmetrical lines. Shipping weight, about 5 lbs.

THE UNITED STATES occupies an almost unbelievable area in comparison with the European countries. Some of Europe's powerful dominions cover little more than a handful of our states. If you were to take all of Europe and place it across the surface of this country, you would be dismayed at the relative sizes of the two. Europe with its many countries, the United States, consolidated under one central government. Yet in spite of this tremendous size of our country, Hartman feathers the nest of families found from the Atlantic ocean on the east to the Pacific ocean on the west. Think what this commercial supremacy means! And although we occupy such an enviable position, bear this fact in mind: We are just as glad to receive a small order as a large one; that may seem strange to you, but it is true.

The fact is, we are building up an ever-increasing business on a policy of satisfaction to our customers, and we find that as every patron is satisfied, the more orders we receive, the greater is our following.

THIS EXCELLENT ROCKER is typical of the values that have added to our business developing our wonderful business. The quarter-sawn oak is used on the arms and the panel separating the upper and lower sections of the back. The balance of the exposed parts of the frame are made of substantial kiln-dried solid oak. Finish is a rich golden. The seat is nice and firm, measuring 20 1/4 inches. It is supported by sinuous springs and is filled with excelsior. The covering used on the seat and back is imitation Spanish leather, looks like the real Spanish leather and gives very satisfactory wear. Measurements as follows: Arms, 4 1/4 in. wide, front posts, 5 in. wide, front and back rails, 4 1/4 in. Wings, 5 in. wide, 17 inches from floor, back is 25 in. from seat to top; seat height, 20 in. Distance between arms, 20 1/2 in.; arms are 11 in. above seat. These prices are for the rockers of the massiveness of this model. Wt. about 60 lbs.

The Test of Time.

There is no test as positive and as assured as that of old Father Time. He picks, he tries, and shows the spotlight on the best of everything. Time is the one factor that will not harbor misrepresentation, and that is why we so proudly point back to our record of thirty years of successful business practice. Our principles have been based upon fair and square treatment to our customers. That has been the very essence of the House of Hartman and the guiding star of our business career. Satisfaction is a very big word, yet it was never so big that we could not and did not realize all of its intended features. Quality, moderate price, service, easy credit and an iron-clad guarantee demand an equal share of attention and have received their attention and consideration. In presenting the mammoth value on this page we want you to consider that the utmost care has been exercised to maintain our reputation for unprejudiced value-buying. In fact, we have gone an extra step, if possible, to make this a buying opportunity of unusually tremendous significance to our customers.

THE MASSES, NOT THE CLASSES. Abraham Lincoln
embraced the people. There is a little episode that is typical
of this great man that will bear repetition. He happened
to be within earshot of a woman who commented to her
husband: "What a lonely man the President is." Lin-
coln turned to her, smiled and said: "Madam, God loves
many people; that's why he made so many of them." The
martyred President was of the people. He was a
fine, poor man who made good. There are hundreds of
people who belong to the masses whom we want to
say: "Make good." We cater to the masses, not the
upper classes and particularly seek to serve the hard
working people of this country.

an opportunity of adding a part of your income to your
savings account and, then, besides, when you buy from us
you are investing your money into something tangible. You
are furnishing your home and therefore you have a per-
manent investment.

THE FRAME: The arms and posts are made of attrac-
tive, genuine quarter-sawed oak; the
finished parts are constructed of re-
sawed and kiln-dried solid oak. The remainder of the frame
is made of strong, substantial hardwood. The front legs are
naturally and gorgeously curved, as you will observe by an
examination of the illustration shown. The finish is the
rich, glazed, golden oak which harmonizes so well with all
surroundings. The upholstery is imitation black leather.
Covering is a close duplicate in appearance of the real
leather and is recommended for its good wearing quality.
A two panel back with neat roll is illustrated, and
two rows of pleats on either side. A very handsome design.

THE SEAT: The seat contains six strong springs and is
covered with either excelsior or tow filling
with jute covering. The entire
overall length of the chair measures 19x10½ inches
Height of back is approximately 32
inches. Notice the shaped, tapering
arms, each supported by three slats.

The Rich Carvings On The Frame Of This Rocker Enhance Its Attractive Appearance

THE DESIGN of this massive rocker is of a type that is in keeping with the progress that we have made in furniture construction; and once you see it in your home you will agree that it is an extraordinary value for the money. One of its predominant features is the nicely shaped back and the removable slip seat. The elaborate carvings on the ears and front posts are of a pattern that should appeal to lovers of artistic home furnishings. All of the exposed parts are made of durable seasoned solid oak, the wide arms being constructed of genuine quarter-sawn oak. These arms are gracefully shaped, as shown in the illustration above, whereas the next panels under the arm rest Glimmer golden finish. The back is divided into two panels, the upper one being set off with a neat ruffling across the top. The seat is supported by any steel and is resting on strong channel bars and is reinforced with corner blocks. See page one for our liberal, easy-to-pay credit terms.

THE UPHOLSTERY is of a desirable quality. Wood fiber is used as a filler or similar material as a covering, over which is placed an imitation Spanish brown leather, which resembles the genuine Spanish leather, has good wearing qualities. The measurements are as follows: Extreme width 31 inches, extreme height about 41 inches, height of back rest about 30 inches, width between arms 21 inches. The seat is 18x20 inches. The attractively shaped arms measure 2 inches in width, the front posts about 2 inches, and arms about 14 inches. Our liberal guarantee of satisfaction applies to this rocker. We feel certain that you will be more than pleased with the value here offered and you to send for this rocker upon approval with the understanding that if it does not suit in every way, you are not obliged to keep it. MORRIS CHAIR
Made Of Quarter-Sawn And Solid Oak, In Golden Oak Color, Seat Contains Six Springs Supported By Steel Channel Bars.

The illustration of this handsome piece of furniture does not by any way exaggerate its beautiful lines. It is made of thoroughly seasoned, kiln-dried solid oak, the arms being fitted with genuine quarter-sawn oak. Comes glossed with oak finish. The upholstering is imitation Spanish brown leather, which looks like the genuine Spanish, and is exceptionally durable. The seat is supported on six heavy steel coil springs, resting upon steel channel bars. The back, likewise, is produced by steel. The filling used is wood fibre and moss, adding the comfort-getting qualities of this handsome piece of furniture. The lavish carvings on the frame cannot be overstated until you view this substantial Morris chair.

The back can be adjusted to five different positions. This back is made in two-piece sections. This is heavy Morris chair, designed to serve its owner a thoroughly satisfactory manner. It stands 41 inches high with the back in first position, measures 17 inches from the floor to the seat and 28 inches from the seat to the top of the back.

ROCKER TO MATCH

The Morris Chair Above. Quartered And Solid Oak Frame. Is Lavishly Carved.

This rocker is high class in appearance, excellent in workmanship, is constructed of solid, substantial materials; yet the price is extremely low. Surely you could not wish for a better combination than this. And we urge you to place your order for this number if you want your money to accomplish its fullest ends. This rocker is made of thoroughly seasoned and kiln-dried oak, with genuine quarter-sawn oak arms. It has the look of one golden oak finish. The seat is supported on six heavy steel coil springs, resting upon steel channel bars, over wool fibre and moss filling. The back of this rocker is reinforced by steel strips as to add to its durability.

The covering is imitation Spanish brown leather. This looks so much like the real Spanish leather that it takes the eye of an experienced person to detect the difference. The arms measure 42 inches, extreme width of back overall is 23 inches, front rail is 53 inches wide, seat measures 17 inches. The back, likewise, is made of two-piece panel with seat ruffled top, as illustrated. Ruffled section is 10 inches wide. The arms measure 5 inches wide, front rail is 53 inches wide, seat measures 17 inches in width. The two panels under the arm rests give this rocker the finishing touch of style.

The seat measures 17x17 inches. The rocker makes a fine companion piece to the Morris chair illustrated above. Shipping weight about 55 lbs.

QUARTEERED AND SOLID OAK MORRIS ROCKING CHAIR

$7.88

Fitted With Patented Adjustable Recliner
Attachment And Special Foot Rest

A FEATURE of this rocker is the fact that you can adjust the back to five different positions without moving the seat. Another point of interest is that the foot rest slides on metal bar and can be pulled out to different lengths and swung from side to side. In this arrangement, if foot rest is extended and you wish to change your position, with your feet resting on the floor, it is not necessary to push foot rest back. Merely swing it to either side and it is out of the way, without the inconvenience of storing it in the seat. The solid oak seat is used on the arms and front legs; the balance of the finished parts being of quartered sawed Oak; all other parts of the frame are constructed of durable handrail. You can have your choice of imitated genuine leather or fumed finish as you desire. When ordering, please state which suit you prefer. The curved back legs are newly shaped and measure 5 inches at the widest point and are approximately 3 1/2 inches long. The arms are made from 5-inch stock and measure about 29 inches in length. This rocker is furnished with 6 tempered coil springs. The filling is fine tow or wood fibres covered with jute. You can have your choice of either imitation black or imitation Spanish brown leather, both of which are made to resemble the real leather. When ordering be sure to give the correct number to insure your receiving the upholstery you desire, shipping weight, about 60 pounds.

THE ADVANTAGE of making your purchases from Hartman's is
apparent to all who have had the good fortune
to do their shopping there. Because the great army of customers who buy
from us by mail cannot personally come to our mammoth establishment in
Chicago, we make it easy for them, to see whatever they desire right in
their home before actually making their purchase. In other words, we
send our goods to you when you need them, and after making a careful examination of the
product, you may return it, if it does not please you in every way, you are not
obliged to keep it. You are privileged to return it at the expense of this
town and we willingly refund all money that you have sent us, as well
as any transportation charges that you may have paid.
You see that we
have so much confidence in our values that we will
only send them to you upon approval without the
inconvenience costing you a single penny, if not satisfied.

THE CONSTRUCTION

is strong, as this rocker is
made by men experienced
in this class of work. The materials used are likewise
a thoroughly dependable quality and for that reason
we have no hesitation in giving this number our heart-
set endorsement and absolute guarantee. The frame is
made entirely of kiln dried hardwood; the exposed parts
are finished in an attractive mahogany color. You
have your choice of either imitation black leather
imitation Spanish brown leather upholstery, both of
which bear a resemblance to the real leather and pos-
seas good wearing qualities. Tow and cotton filling
and over five springs are used in the seat. These
springs are supported on steel bands, as is the uph-
olstering in the back, this method of construction leav-
ing the possibility of sagging. This is a feature that
will appeal to those desiring substantially constructed
furniture in their home.

LUXURIOUS ROCKER

BUYING ON CREDIT. Do not think for one moment that you need feel peculiar about buying goods on credit. On the contrary, you should feel very fortunate that you are treated in this manner. And then, didn't you ever stop to think that most big business is done on this same basis? The promotion of big industries are practically all handled on borrowed capital. When we offer you easy terms on credit, we are virtually doing the same thing for you—instead of lending you the money, we are letting you buy the goods and permitting you to pay for them in easy payments. Yet, unlike the financiers who promote big industries, we do not charge you one cent of interest. That's genuine credit for you. We believe that the working classes of this country should have the same privileges as the mercied classes and we've always tried to prove this claim.

MUSEUMS OF ART we see a rocker that was used by Washington, a chair from the palace of Napoleon, the bed in which

a whole generation of men and women slept, and pieces of furniture that were seen in the homes of the world's famous

in and women. In your own family do doubt there are articles with which you would

the like to see, for these are "heirlooms," articles, as it were, as if your own

father or great grandfather, perhaps. Some day your children will feel the same about

furniture that you have and that they remember from their childhood. That's a

telling fact above. It will give years of satisfaction service and, as an article that

are generations will cherish and admire. This is an exceptionally fine rocker at the

exploit its meritorious qualities. You must see this handsome rocker before you

can recommend it and at the same time not be disposed to pass it by at this price. Read the

ttaited descriptions in the paragraph to the right and you will marvel at the possibility

this great record-breaking offer.

FEATURES OF THIS ROCKER. Observe the luxurious, comfortable head

roll between the two impressive double-ruffled wings, the soft diamond-tufted back, the handsome ruffling around the front.

joining the great big roll arms into a symmetrical design. How tastily is the

front set off by the single raw of ruffling just below the seat. Remember that this

fine Turkish rocker has NINE SPRINGS IN THE SEAT, and is expertly filled

with tow, cotton and hair. It is also equipped with strong coil rocker spring. The frame

FINE SPRING CONSTRUCTION

SECURE THE BENEFIT of having from this great house of
hurricanes. When you go into
your local store to make a purchase, remember that the storekeeper
has made up his mind to sell you. He is going to do all in his power
to make a sale, and in his desire to do so he is likely to say some-
things unfriendly to null-rockers, or the unscrupulous dealer may
make other false statements. All men will not do this, because some
are too fair to make untruthful remarks. Don't buy from unreliable
dealers because you can't have confidence in what they tell you.

YOU CAN BUY Turkish rockers in your home town, no doubt,
but you will not find the equal of this one at
our prices. The frame is made entirely of kiln-dried kirschenholz with
the exposed parts expertly finished in a rich mahogany color. The back
is perfectly diamond button tufted. The head rest, ears, fronts of arms
and seat are artistically ruffled as shown in the illustration herewith. The
routed edge feet are of a striking design. The upholstering can be in
either imitation black or imitation Spanish brown leather, both of which
are made to resemble genuine leather and wear remarkably well.

THE SEAT has six strong springs supported on steel bands to
prevent sagging. It is filled with tow and cotton and
is equipped with strong coil rockers springs. The measurements are
as follows: height of seat from floor, 33 inches; height of back from
seat, 29 inches; depth of seat, 15 inches; width of seat, 21 inches;
width overall, 35 inches. Comfort, appearance, durability and low
price are the features of this fine Turkish rocker. Shipper weight,
about 90 lbs.

FOUR PIECE LIBRARY SET
An Unequalled Value For The Money

NO. 5K937. PRICE COMPLETE

QUALITY IS THE FIRST CONSIDERATION IN MISSION FURNITURE. Each piece of this massive library suit you will find strictly dependable in quality; in fact, you will find every detail of construction fully up to the standard of the best makers of mission furniture. This style of furniture has become immensely popular, and is in use in the homes of those who require the best in style and comfort.

WE WOULD like to call your special attention to the fine oak finish used on these pieces, which is obtained by special treatment, producing a rich, dark effect, which is extremely popular. This finish shows that shows to advantage the beautiful natural grain of the oak.

MADE OF THOROUGHLY SEASONED HEAVY OAK

This library set is made throughout of substantial thoroughly seasoned heavy oak. The wood is carefully selected and each piece has a full box frame with seats securely fitted and joined to the massive corner posts. The seats in all the three chairs are of solid oak, saddle shape. The panel backs are high and broad, the table has a 30\x22 x 20\x22 full leg top with full leg extensions, panelled ends and a broad lower shelf complete with convenient drawer in center. You can't afford to overlook this big value!

WE INVITE the most critical comparison of this splendid four piece suit, with any other suit offered by other dealers. If you desire to purchase one or more pieces separately, you may do so, but we strongly urge the purchase of the entire suit, as they match perfectly.

SUIT No. 5K937 FOUR PIECES COMPLETE $14.85

THE LARGE MISSION ROCKER AND ARM CHAIR are inviting to do extremely popular. It is a finish of oak feet. They are big, roomy, comfortable, well made, and, together with the balance of this suite, make an ornamental addition to your home. The arm chair and rocker have broad, comfortable flat arms, middle high, panelled back and large, roomy, saddle shaped seats, as strong and solid in construction as it is possible to make them.

IT IS the fundamental principle in our business that quality must never be an afterthought. It follows that our prices are the manufacturer's cost, with but one small profit. The more you place in and on your other, the better we shall be pleased. Shipping charges for entire suit, about 200 pounds. $14.85

No. 1K2193 Price $5.85
Made Of Solid Oak In Fumed Finish

THE TABLE is exceptionally well made for one marked at so low a price. It is constructed of durable, well seasoned solid oak and finished in the popular fumed color. The rooey top measures 25 x 40 inches in size. Has a convenient, stationary drawer fitted with two drawer knobs (cut shows only one). It is typically mission in style, the straight line effect being apparent throughout. Has shelf 8 inches wide, two panels on either end as illustrated. The legs are cut from 2-inch stock and the rim measures 3½ inches deep. It is fitted with “domes of silence” instead of casters, preventing the tearing of rugs or marling of hardwood floors. Shipping weight, carefully packed, is about 60 pounds.

No. 5K1007. Table With 26 x 40 Inch Top
Price . . . . . $6.10

ARM CHAIR is made to match the other pieces on this page. Is of correct mission design, substantially constructed of thorocrib seasoned solid oak in the rich looking fumed finish. The seat is supported on 3 springs with wood fibre and jute filling. The back is built with 4 steel slats supporting it. The upholstery used is imitation Spanish brown leather, which looks like real Spanish leather and gives very satisfactory wear. Stretchers across the front and sides are cut off in an attractive manner. Measurements are as follows: Extreme height 33 in., extreme width 19 in., distance between arms 16½ in., height of seat from floor 13½ in., of back from seat 21 in., width of back 16½ in., seat measures 18½ x 15 inches; arms are 3½ in. wide. Fitted with “domes of silence” instead of casters. No tearing of rugs or marling of floors, a feature that will appeal to the particular housekeeper. Shipping weight, about 50 pounds.

No. 5K1008. Arm Chair
Price . . . . . $4.85

THE ROCKER is a duplication in style, construction and materials of the arm chair described above. The only vital difference is found in the runners which of course are not possessed by the chair. The total height, likewise different, the rocker measuring only 28½ inches overall. The fumed finish, solid oak frame, the simple mission design, the attractive imitation Spanish leather upholstery, all combine to make this a desirable rocking chair for the money. Strong spring construction under the seat and the steel slat supports on the back. Shipping weight, about 40 pounds.

No. 5K1009. Rocker
Price . . . . . $5.15

THE SETTEE is illustrated to the left. This photo shows the straight line effect that characterizes the mission pattern. But it does not reveal the rich fumed finish presented by the article itself. Give you a fair idea of the strong solid oak used in construction, but it cannot convey the rigidity of this piece of furniture and the good workmanship embodied in it. For that reason we ask you to send for this settee up, so as to convince yourself of its perfect construction and dependable quality. We are sure that you will be pleased with it that we are glad to advance it to you at this. If you are not satisfied in every way, remember you are not obliged to keep it.

NEW DESIGN SOLID OAK MISSION LIBRARY SET

**The Three Pieces for $15.85**

The Finish Is Fumed Oak

**SOLID OAK** is used on all pieces, a rich fumed finish. The table top measures 24 x 42 inches. Particularly observe the convenient shelf near the bottom and the two handy book shelves at either end. These end panels are attractive and harmonize with the wood back panel on chair and rocker. This is an excellent set and is highly endorsed by us. Shipping weight is approximately 150 pounds.

No. 5K972. Price Complete $15.85

**THE ARM CHAIR** illustrated above is a true Mission model, harmonizing perfectly with the other pieces of this handsome three-piece library set. It is made of solid oak, in the rich fumed finish. Upholstered over four springs with barclay, moh and felt. Covering is the popular imitation Spanish brown leather, which looks and wears like real leather. Measurements are: Seat, 19½ inches wide, 18 inches deep; front posts, 14 x 14 inches; arms, 31 x 22 inches; back, 18 inches wide; 28 inches high above the seat.

**THE TABLE** is unique in design, yet very practical in construction. Is made of solid oak in fumed finish. Has a 24 x 36 inch top, which is just a nice size. Is fitted with easy sliding drawer with Mission design drawer pull and very convenient magazine racks at either side. Observe the rich fumed oak finish. The construction is very exceptional.

**THE ROCKER** is built exactly along the same lines as the chair illustrated and described to the left. Solid oak, fumed finish, imitation Spanish brown leather upholstered, resembling the genuine leather. Neat cut-out wood panels on both sides of the upholstered back. Good strong rocker. Upholstered over four springs. Shipping weight of complete set is approximately 150 pounds. Order is open approval and if it does not please you in every way we will gladly refund your money.

No. 5K973. Three Pieces Complete $16.95
**THE TABLE** is illustrated directly above and shows the elegance and simplicity of this true Mission design piece of library furniture. The table top is made of genuine quarter-sawn oak and measures 26x42 inches. The balance of the table being constructed of thoroughly seasoned and kiln-dried solid oak. The convenient book shelf at either end and the strong lower shelf are desirable features, as they give added strength to the table and at the same time afford additional surface upon which can be placed books and magazines. The panels are made to match those on the backs of the chairs and rockers and the magazine rack. This table comes in the attractive fumed oak finish and is an approved Mission design. If you do not order the entire set of six pieces illustrated and described on this page, we would particularly urge you to choose this table and one of the rockers and the arm chair to make up a three-piece set. The prices are so reasonable and our terms so liberal that you will never miss the trifling sums that we ask in shipping weight of table, about 69 lbs.

No. 5K975. Price of table $7.75

**QUARTER-SAWed OAK**

**TABLE TOP IS 26x42 IN.**

**THESE ROCKERS** are constructed with genuine quarter-sawn oak arms, the balance of frame being made of thoroughly seasoned and kilndried solid oak in the approved fumed finish. The seat is upholstered with genuine Spanish brown leather, as is panel in back. This covering is known for its splendid wearing quality and bears a remarkable resemblance to genuine Spanish leather. The wood panels on either side of the upholstered panel in back are constructed with cut-out design to match other pieces shown on this page. Six steel rollers on seats then support the seat. Size of seat is 14x17 inches. The height of the back from the seat measures 23 inches. The curved arms give these rockers a distinctive appearance; these arms measure 4 inches in width. If you do not care to order the entire set, at least select one of these rockers, the table and arm chair, to complete a three-piece library set. You will be well pleased with this rocker, as its receptivity is just as much in favor as its artistic appearance. Shipping weight of each rocker, about 40 lbs.

Is Very Handsomely Designed

IN THIS PARLOR SUIT we are offering you one of the most pleasing designs in a suit of unusually good character, both in point of appearance and construction. While the prices are exceptionally low, the suit is made with due regard to great strength and durability—the quality being there but the same as if it cost more than the price we ask. Every home should have one of these fine parlor suits, Hartman brings the price away down—saving you many dollars.

COVERINGS are made of durable materials and no matter which you select will be charmed by the appearance of your parlor suit when you put it in your living room. It’s perfectly natural, though, that the more you invest for the upholstering of your parlor suit, the better quality of fabric you receive, and for that reason we suggest that you order one of the genuine leather coverings. The back of each piece is diamond tufted, each tuft being secured by a steel pronged upholsterer’s button. The seats are constructed with a setting of “Monarch” oil tempered steel springs.

THE FRAMES are constructed in a serviceable manner, being put together most substantially, every joint well mortised and doweled. The top panel on back is adorned with a deeply carved head and rich scroll design, which greatly enhance the beauty of this elegant suit. The arms of the divan, arm chair and rocker are completed with a beautifully carved head at the front. The Birch used in the construction of these 5 pieces has been thoroughly seasoned and kiln-dried, and is finished in rich mahogany with a high finish. This suit is made to last and will give good service.

WE WANT YOU to take advantage of our generous credit plan, which is freely offered to our friends and customers, and order this magnificent suit once. Have it shipped to you on approval—examine it closely and you will find it to be the great bargain we claim. We doubt if you could duplicate this parlor suit at your local dealer’s store or from any other home furnishing concern at the low prices we quote and an extra added feature to this wonderful saving in price is our liberal credit term and furthermore, you get a year’s time to pay. Shipping weight of entire set, about 225 lbs.

Hand Rubbed And Polished Finish

A Design That Will Always Attract

EXAMINE THE ILLUSTRATION of this beautifully proportioned, gracefully designed parlor suit that must appeal to those who have a keen appreciation of true furniture style. If you order it upon approval, place it in your parlor and see if among your home surroundings you will then realize how advantageously it will enhance the appearance of your household appointments. You can have your choice of genuine quarter-sawn oak veneer, American walnut veneer or mahogany birch, as you prefer. Each piece is hand rubbed and polished, giving a rich, bright finish. When ordering, be sure to state the wood that you desire. You can also have your choice of imitation black or Spanish leather, genuine black or Spanish leather or floral designed tapestry at the prices which we quote at the bottom of this page. Each one is an excellent value at our very reasonable figure.

SPRING CONSTRUCTION. There are 5 oil tempered springs in the seats of the chairs and rocker and 8 oil tempered springs in the seat of the settee. Over these are placed two filling with cotton top. The web bottom used on these pieces is similar to that found on the most expensive parlor suits. This construction adds firmness and lasting qualities. We direct your attention to the graceful shape of the arms, the curved lines of the backs and the pleasing contour of the front posts. Observe also the diamond tufting on the backs. These are secured with steel pronged upholstery buttons, holding the tufts firmly and securely. Take advantage of our liberal credit terms.

MEASUREMENTS. The settee measures 34 inches high. The seat is nice and roomy, the width being 43 inches and the depth 20 inches. The chair and rocker each has a six inch seat, the side chair each has a 17 inch seat. These side chairs are of particularly attractive appearance with long, sweeping arms, as illustrated. This suits our heartiest endorsement and guarantee. Shipping weight, carefully packed, is about 660 pounds.

**Wonderful Brass Bed Value**

Has 2-Inch Posts and New Polet Finish

**THIS BRASS BED** is an enormous value at the price we ask and is beyond comparison. The finish is the New Polet style, which is a satin finish on the posts, fillers, and top and bottom cross rods, and bright finish mounts. The bright brass ornaments form a very striking contrast to the satin (dull finished) parts. The bed is of the continuous post style, with 2-inch posts, making it very stately. The mounts are unusually large and imposing. The design of the bed is one of our new patterns for this year and is sure to meet with much favor with our customers. You should not delay in sending your order, for you can buy it on our liberal credit terms shown on page one.

**YOU CAN** have your choice of ordering this bed in any size: 3 ft., 4 ft., 5 ft., or 6 ft. inches, at the same price. Be sure to state size you wish, when ordering. Y MORE—PAY LESS. This term statement applies applies to your transactions if you buy from us. We always endeavor to save you money for a stimulated arm than other houses. Always that you figure it, you far better off to do your shopping here. You may say to yourself: "Oh, well, it is far for them to "not their own here." But, friend, remember that we don't ask you like our word for it. On the contrary we urge you to do your own investigating. We you to convince yourself, regardless of what you have to say, and to accomplish this in the most logical manner we permit you to use the goods you buy from us on spot, so that you can determine whether or not they are all that we claim. In the event you are not thoroughly pleased in every way, you are at liberty to return whatever you see and procure your money back. We not only pay the return freight charges, but also pay you for the transportation charges which you paid when you received the handles. That is the literal treatment you receive at the hand of this broad gauged manufacturer. In that way you are taking absolutely no chances whatever. We ask all the risk, you receive all the benefit.

THIS MASSIVE BED is a true value of the "pay less" type. We think so much alike that we devote an entire page to this one number alone. That is pretty good evidence of the confidence that we have in this value. In describing this wonderful bed, we have explained how light it is to handle, in proportion to its size: But do not be misled as to the magnitude of its proportions. It is a mammoth looking bed, yet an extremely graceful one. The continuous posts are 2 inches in size; the cross rod and fillers likewise measuring 3 inches in diameter. The head end stands 32 inches from the floor; the foot end, 25 inches high. These end measurements include casters. We offer this extraordinary number in the full size, which is 4 ft. 6 inches in length. Our experience in the sale of beds dates back many years. We have bought and sold hundreds and hundreds of them in a comparatively short time. But never in the history of our experience have we seen an offering that can compare with this one in a steel tube bedstead. The value is stupendous at this incomparably low figure.

THE DRESSER is made throughout of thoroughly seasoned and kiln dried oak, golden color. The single end panels are of durable solid oak and the back panel is 3-ply lumber. The attractive serpentine shaped base top adds greatly to the appearance of this dresser. The shapely mirror frame standards, and neat carvings shown, combine to make this dresser one that demands your attention. To be sure, it is not overly lavish and it is its very simplicity that will appeal to all critical buyers. The base top measures 38x19 inches and the French bevel plate mirror is 20x18 inches. Total height is 66\(\frac{1}{2}\) inches. The two overhung top drawers and the two full length drawers below afford ample capacity for the needs of anyone. Round wooden knobs used on the drawers. Observe the French shaped feet and the neat panel across the bottom of this dresser. Complete with hardwood casters.

THE BED is very well constructed in a workmanlike manner and made throughout of thoroughly seasoned and kiln dried oak, golden color. The panels in both the head and foot ends are made of 3-ply lumber. You will observe that the carving at the top of the bed and that across the foot end harmonize beautifully with the embellishment appearing on the dresser as well as the commode. Like these other two pieces, the finish is a rich golden color, which will be found to be very appropriate with all surroundings. Neat French shaped front legs are attractive in appearance, as is the entire design of this piece of furniture. The rails are 72 inches long, the slats are 4 feet, 6 inches, thick being a full sized bed, and the height over all is 66\(\frac{1}{2}\) inches. This bed is furnished with hardwood casters.

THE COMMODE is the counterpart in style of the dresser shown and described above. The towel bar standards are gracefully curved to correspond with the mirror frame standards on the dresser. The deep carving is made to match perfectly; the shapely serpentine front of base top corresponds with the dresser to perfection. This commode has a full length top drawer and a double door cupboard below, as illustrated. Drawer and cupboard door both fitted with round, wooden knobs. It is made throughout of thoroughly seasoned and kiln dried oak; the single end panels are of solid oak, while the back panel is 3-ply lumber. The finish is a rich golden color to match both bed and dresser. The base top measures 29x17 inches, being just a nice size, and the height is 45 inches from the floor to the extreme top. This commode is fitted with hardwood casters. The shipping weight of these three pieces, all carefully packed to insure safe arrival, is approximately 250 pounds. $26.75

THREE-PIECE BEDROOM SUIT

Very Stunning Colonial Design
Substantially Constructed of
American Quatered Oak In The
Rich And Attractive Golden Color

TAKE A YEAR TO PAY

We Trust You

THE DRESSER is the latest production of one of the largest furniture factories in America, as are the bed and commode forming this extremely attractive, highly serviceable bedroom suit. The dresser is constructed throughout of durable thoroughly seasoned hardwood, to which is applied a finish in imitation of genuine quarter-sawed oak, which very closely resembles the real wood. The rich, golden color adds greatly to its attractive appearance. Three-ply, built-up stock is used in the back and drawer bottoms. A method of interior corner beading holds this piece of furniture perfectly square and very rigid. The base measures 20 1/4 inches and the French bevel mirror with rounded top is 23 1/2 inches in size. Colonial arms at the mirror correspond with the sharply corner posts in the base. Finishes a high gloss finish, overlying top drawers and two full length drawers below, as illustrated. Bound wooden knobs.

NAPOLEON BED is made of the same durable materials as the dresser and the Napoleon posts hold the mattress beautifully with the shapely contour of the dresser posts. This very massive bed is made of thoroughly seasoned hardwood, to which is applied a highly figured imitation quartered oak finish bearing a remarkably close resemblance to genuine quarter-sawed oak. The high gloss golden oak finish enhances the appearance of the bed, making it exceptionally pleasing to the eye. The height of the head end is 54 inches and the foot end measuring 28 inches from the floor. This is not a small size bed by any means, as it measures 54 inches in width (4 feet, 6 inches) and is constructed throughout in a workmanship manner, all parts being carefully cut and firmly joined. The panels are made of three-ply, built-up stock which will not split or crack. Like the dresser and commode, it comes complete with casters.

COMMODE is also constructed of kiln dried hardwood, finished in a rich imitation quartered oak. This is made of substantially constructed hardwood, to which is applied a high gloss finish. It is another example of our sincerity in presenting to you merchandise that is not skimmed in any way. The back and drawer bottoms are made of three-ply wood. Has full depth drawer and double door construction below. Bound wooden knobs. Shipping weight of complete set, about 345 pounds.

NEW "IMPERIAL" CIRCASSIAN WALNUT

Or Imitation Mahogany Finish Is Used In This
FINE COLONIAL BED ROOM FURNITURE

THESE PIECES are made by a special process. The lumber used is substantial, durable hardwood to which is applied a rich (solid) Circassian walnut finish, or a dull rubbed mahogany finish (imlmi), either of which is closely comparable to the genuine wood. In fact, it is difficult for the most critical eye to detect the difference.

THERE is a very stately piece of furniture, beautifully proportioned, in the true Colonial design. The mirror frame sets off the artfully designed stand. The mirror is a fine French bevel plate and measures 23x32 inches. The two straight front top drawers and the false back drawers are fitted with wood drawer pulls. The top front corner posts are also of Colonial design.

This Princess Dresser is illustrated on this page. It measures 30 x 20 inches and has two large drawers. The top drawer is 17 inches wide and 14 inches deep, and the bottom drawer is 20 inches wide and 14 inches deep. The side drawer is 18 inches wide and 14 inches deep. The drawers have a small front.

This Beautiful New Set Comes Finished In A Rich Golden Oak, Highly Glossed.

Dresser and Commode Have Artistic Serpentine Fronts.

**THE DRESSER** is a very attractive piece of bedroom furniture. It possesses graceful lines, without undue or lavish embellishment. The mirror frame standards are finished with rounded wooden knobs. The French feet enhance the appearance of this dresser, giving it the finishing touch that it requires. It is made with genuine quarter-sawn oak serpentine front, the balance of the wood being of well seasoned kiln-dried solid oak. The base top is 32 inches wide and 20 inches deep. French bevel plate mirror is 20x24 inches. Has 3-ply built-up top and drawer bottoms are constructed of 3-ply veneers. The finish is a high gloss golden oak. Comes complete with knobs, key and casters.

**THE BED** is elegant in its simplicity. A casual glance at the illustration is sufficient to gain the approval of those who appreciate the better achievements in bedroom furniture. The French feet complete the generally pleasing effect of its design. It is made in a thoroughly workmanlike manner, is substantial in construction and contains excellent material. Genuine quarter-sawn oak is used on the panels, being selected for its large flaky grain. The balance of the bed is made of seasoned, kiln-dried solid oak. Like the dresser and commode this bed is finished in a high gloss golden oak. The head board measures 60 inches from the ground. It is a full size bed, measuring 4 feet 6 inches in width. It is equipped with slats and casters. We know that you will be well pleased with this bed if you order this suit. Be sure to read the complete description of the dresser and commode—and we know that you will want this fine suit.

**THE COMMODE** is made to carry out the artistic lines of the dresser, and a comparison of the two will convince you that they are matched in a very pleasing manner. The towel bars standards of the commode are of the same design as the mirror frame standards on the dresser; it possesses the same style, serpentine top and drawer and terminates in shapely French design feet. Made with a two door cupboard, with paneled fronts as illustrated. Drawer and doors fitted with rounded wooden knobs. Genuine quarter-sawn oak face is used on the serpentine drawer, the balance being well seasoned solid oak. The base measures 18x32 inches, and the base top is made of 3-ply built-up stock. This commode is finished in high gloss golden oak. Order this magnificent 3-piece bedroom suit and you are sure to be pleased in every way. Shipping weight of complete suit about 225 pounds.

of this dresser will appeal to those who admire the plain styles in bedroom furniture. It is well proportioned, graceful in design, yet devoid of the fussy embellishments found on some dressers. It is well constructed and is offered as a good value for the money.

It is made of substantial hardwood to which is applied a finish in imitation of genuine quarter-sawn oak. This is known as American quartered oak and bears a close resemblance to the real wood. It is nicely finished in a pleasant golden color that is generally used. Has two top drawers and two full length drawers as shown.

Mirror

Is French bevel plate. It measures 18x24 inches. Frame is carved at top and is supported by nicely curved standards. Base top measures 18x24 inches; is of planked style. Plaited with round wooden drawer knobs, locks, key and casters. Ends are attractively paneled. Shipping weight, about 146 pounds.

Colonial Dresser

The money problem confronts every man. The man who makes his money do the greatest amount of work for him makes his money do the greatest amount of work for himself. He is the man who achieves the greatest measure of success. We are in business to make money, and by doing so we like to please ourselves in a way to increase the value of our own investment because naturally the better we give to our patrons the more rapidly our business grows. The size of this firm is directly responsible to the fact that we have offered such high values to our customers.

This beautiful dresser is a typical Hartman value. It is made of thoroughly seasoned hardrock and quarter-sawn oak and is of the attractive mutation quartered oak. This is made to resemble quarter-sawn oak and to the average eye looks just like the real quarter-sawn.

The octagon shaped mirror frame and French bevel plate mirror gives this dresser a very classic appearance. The style is colored by the Colonial mirror standards and corner posts, as well as the two overhanging top drawers. This dresser is a perfect Colonial design and is built upon lines sufficiently low to prove practical piece of furniture. The finish is the rich golden oak.

The Base top measures 19x23 inches, the French bevel plate mirror being 3x24 inches in size. There are two full length drawers below overhanging top drawers which afford ample capacity. The back, bottom and ends of the base are made of three-ply built-up stock, which prevents splitting and warping. The grain matched on this piece of furniture is even throughout and will appeal to all critical judges of household furniture. Shipping weight, carefully packed, is about 300 pounds.

Princess Dresser

This is a Very Attractive American Quartered Oak Dresser. Has Heavy Plank Top. Swell Lower Drawers.

The time to buy. When you are really in need of furnishings for your household, then is the time to fulfill your requirements. We do not require your patronage merely because our merchandise is low in price. We will say frankly, however, that because of our bargain offers at times the majority of orders we receive reduce our stock so low that it is well to place your order early to avoid possible disappointment. It costs no little to have just what you want and it is a matter of fact that you will not waste time if you see some article that suits your fancy. Take for example this fine Princess dresser.

This Princess Dresser is made of hard wood which is applied a finish in imitation of genuine quartered oak. It has a heavy plank top measuring 3x20 inches and an attractive long French bevel plate mirror measuring 19x24 inches. The mirror rests between two gracefully shaped Colonial standards, as shown in the illustration. There are two full length drawers in the top and two full length drawers below, the latter being made with massive swell front. The corner posts are of beautiful Colonial design to conform with the shapely Colonial standards given. This Princess dresser is fitted with wooden drawer pulls as shown. Base height, 31 inches.

A NEAT COLONIAL DESIGN

In An American Quartered Oak Dresser of Substantial Construction. Has Overhanging Top Drawers As Illustrated.

THE RICH STYLE of this Colonial Dresser is not often found in dressers selling at so low a price as we quote here. Every housewife who likes good, high grade furniture in her home will be immensely pleased with this article, and we have never known a better model to be made that could be sold at lower figure.

The chiffonier, too, which we offer to match this dresser, and which we show on another page, is equally as big a bargain. If you want to swell pieces for your bedroom, study these very carefully.

AMERICAN QUARTERED OAK

The solid quartered oak is used in this dresser in imitation of genuine quartered-oak. The rich golden finish very popular. It is made with a square edge top, which measures 41 inches wide by 19 inches deep. A French bevel plate mirror is fitted, and is 22 inches wide by 22 inches high and supported by nice curved Colonial scroll standards.

SIDE PANELS are of full length and are solidly mortised to framework, and back posts. The four deep drawers are equipped with locks and turned wood pulls. The two upper drawers are of small and convenient size. The front posts are curved in Colonial sea effect. Shipping weight, about 123 pounds. If you desire to purchase the chiffonier to match this dresser, refer to No. 3K1772 shown on page 184, the price of which is given below.

TRIPLICATE MIRROR

Is The Feature Of This American Quartered Oak Dresser: A Fine Value At This Price

THE LUMBER used in this dresser is substantial hardwood, to which a finish in imitation of quartered-oak bears a close resemblance to the real wood. Has two overhanging drawers and two full length drawers below. The neatly shaped front posts terminate in Colonial scroll feet, as illustrated. Drawers are fitted with round wooden knobs.

TRIPLICATE MIRROR enables you to observe your reflection from the front as well as from left and right profiles at the same time. This is easily accomplished by bringing side mirrors slightly forward (see small picture to the left). This is a very desirable feature in a low priced dresser.

MEASUREMENTS. The base top measures 44 inches wide and 19 inches deep. All three mirrors are French bevel plate, the center one being 22 inches in size, the side mirrors each measuring 22 inches. The center one is of next design. Fitted with locks, key and casters. Shipping weight, about 125 pounds.

IF YOU STUDY the illustration of the dresser shown on the left, you can gain some idea of the excellence of this wonderfully built, thoroughly substantial article. As its companion piece, it is made of hardwood, to which is applied a finish in imitation of quarter sawed oak which looks like 100% genuine wood. It has a tatty rounded mirror frame, beautiful heavy standards, massive plank top and corner posts. This elegant construction of both dresser and chiffonier is such as to appeal to you.

THE BASE particularly we wish to call to your notice, because it measures 45 inches across, being 21 inches deep. The mirror is nice and large, measuring 27x11 inches and is of a quality French bevel plate. There are the small top drawers made to resemble four, as shown in the picture and two full length drawers below. These are good enough to afford sufficient space for the needs of anyone. They are easy to slide in and out and are fitted with round wood drawer pulls.

Quarter-Sawed Oak Dresser With Serpentine Front And High Gloss Golden Oak Very Attractive French Bevel Plate Mirror. 42x21-Inch Top

THE GREAT DIFFERENCE between homes is not confined to the exterior, or outward appearance, by any means. For, a great many homes that appear to be almost identical from the outside seem so unlike after stepping inside that you will marvel at the distinction. What makes this difference, we ask? Is it the amount of money spent on the furnishings? Not always. Because we have seen many homes furnished by Hartman's with really very handsome equipment that surpass others upon which vast sums have been expended. The taste of the individual coupled with the home from which you buy, very largely determines the attractiveness of your home. Furthermore, when you buy from us you are taking no chances. You can place the goods in your house; and if they don't measure up to your opinion of what they should be, ship them back and we will pay all expenses.

ON THE OTHER HAND if the goods you buy please you, you can make your payments a little at a time as explained in detail on Page 1 of this handsome book. Order this dresser and pay one fourth of the total amount when you order. The balance is to be paid in 3 equal monthly installments. The quarter-sawed oak is used in the entire front, base top and mirror frame and standards, the sides being of rotay cut solid oak. Serpentine shaped front is carried out on the drawers and top with the mirror frame designed to correspond. The finish is a high gloss golden oak, which harmonizes so well with the usual surroundings. There are two top drawers and two full length drawers, all fitted with turned wooden knobs. The double top effect enhances the appearance of this high-class piece of bedroom furniture.

THE ARTISTIC DESIGN is further improved by the French shaped mirror frame which we believe to be one of the greatest offerings that you have ever made. In fact, we want you to shop around and if you can find anything like it at our exceptionally low figure, then you will really appreciate what a wonderful value it is and we know you will send in your order. COLONIAL DESIGN DRESSER

IN THE GENUINE
QUARTER-SAWED
OAK OR IMITATION
CIRCASSIAN OR MAHOGANY

$22.65

THE ELEGANCE of this design is such as to improve the appearance of the bedroom in which it is placed. Its rich Colonial lines are created in walnut, as shown in the illustration. Observe the nicely curved mirror frame standard, dressing table and attractive scroll feet. Note also the arched mirror frame, the rounded front and rounded top drawer. Another feature of this dresser is the heavy planked top. These are matters of appearance which we can see from the illustration. But the quality of the materials and the durability of workmanship are features that are not revealed until you actually make the examination of the dresser itself. Send for it upon approval to convince yourself of its merits.

QUARTER-SAWED OAK is used on the front, top and toilet. Or if you prefer the Circassian walnut finish, you can order this dresser in "imitation" or imitation Circassian walnut, which is a satin-finish finish applied in such a way as to give the appearance of the real thing. We also furnish this model in imitation mahogany in rich-looking dull rubbed finish. When sending us your order, be sure to state which finish you desire to have us send. This wood is a matter of taste, but we will secure a good value regardless of which finish you select. Our guarantee of satisfaction is your protection.

THE PLANK TOP measures 42 inches in width and 21 inches in depth. Under this base top are three small drawers with rounded fronts as shown. Below are two full length drawers with full curved front. These five drawers are all fitted with wood wooden drawer pulls. The French bevel plate mirror measures 18x18 inches in size. Below the mirror frame is a background of a style to correspond with the Colonial idea which prevails throughout the design of this dresser. It is in every way a piece of old room furniture that you will be glad to own, and goes out with our heartiest endorsement. Our liberal credit system enables you to pay for it as you use it. Shipping weight, about 175 pounds.

Link Fabric Steel Frame Bed Spring

WHAT DOES $3.35 REALLY AMOUNT TO when compared to the cost of this double fabric steel frame bed spring? It is a link fabric spring with copper wire edging. The links are attached to end angles by heavy oil-tempered helicals. The heavy angle iron frame is well finished in black jap and is strong and substantial. Compare our price with that of others for a spring of equal merit, and we feel sure that you will send us your order without further hesitation. Shipping weight, about 40 pounds. State whether springs are wanted for iron or wood beds; also give width of bed.

No. 3K1806. Price..................$3.35

Crown Brand Steel Fabric Spring

HIGH GRADE STEEL FABRIC BED SPRINGS made of malleable material, with frame of 1 5/16 inch steel tube side rails, with an iron end and high rise corner castings. These corner castings extend around the angle iron ends, making a smooth and round corner, thus protecting the mattress and bedding from catching or tearing. The castings (shown in enlarged view immediately below) elevate or lower spring five inches. Spring is finished in golden bronze, giving it a rich appearance of solid brass. Fabric is made of Crown patented double loop wire, close mesh, tinned, with 54 oil tempered steel helical springs with 1 1/2-inch steel strap edges. Shipping weight, 48 pounds. State whether springs wanted are for iron or wood beds; also give width.

No. 3K1808. Price complete..................$5.25

The heavy double arm protected malleable steel corner casting, which we show to the left in an enlarged view, elevates the bed springs above the side rails of the bed in a manner that gives a better spring effect and makes an exceedingly comfortable spring.

Crown Steel Frame Bed Spring

THE SUBSTANTIAL FRAME is constructed entirely of steel угол and firmly braced at each corner. The fabric is of fine quality tinned mattress wire made up of alternate double and single weave, ribbed at edges, with heavy steel wires running through at sides and securely fastened to the ends of frame. Support consists of 3 rows or 18 coppered steel coils locked in place by six long and three cross wires, which are hooked at one end of spring, and at the other to oil tempered helical springs, making the support strong, yet elastic and preventing the fabric from sagging. Japan finish. Furnished in all sizes as shown below. Shipping weight, about 42 pounds. State whether wanted for iron or wood beds; also give width of bed.

No. 3K1807. Price..................................$3.98

Bed Springs No. 3K1808 and No. 3K1809 are equipped with this new style, durable and sanitary double arm corner casting which gives added strength to the springs. It insures the greatest amount of rigidity to the springs as well as service and lasting quality.

Interweave Slat Fabric Bed Spring

SANITARY SLAT FABRIC BED SPRING. The illustration to the right tells the story without words. It shows clearly and decisively the superior, durable construction of this exceptionally fine bed spring. It shows how the strong slat fabric is interwoven to produce the desired effect. The spring is firm yet resilient and will give no end of satisfactory service. The sanitary feature is of great importance. Being made of metal it will not harbor dirt, lint or vermin. There are 54 oil tempered helical springs which join the horizontal slats to the end rails as shown in the accompanying illustration. Has 3/4 inch malleable corner rise, 3 inch straps and 5 1/2 inch tubular frame. An enlarged view of the corner casting is shown above. This spring is made of one of the best bed spring factories in the world. Each spring is carefully inspected before it is shipped, and passes the most rigid examination possible. Shipping weight, about 50 lbs. State whether springs wanted are for iron or wood beds; also give width.

No. 3K1809. Price complete..................$5.85

Steel Spring With Double Arm Casting

The Highest Rise Spring Made. Has High Rise of 7 Inches

TUBULAR STEEL SIDES. Measure 1 3/4 Inches in diameter. This exceptionally fine bed spring has heavy steel angle ends, firmly riveted to heavy double arm protected malleable steel corner castings (brought out by use of magnifying glass). Through this construction the fabric is elevated 7 inches above the side rails of the bed; giving a box spring effect, and making an exceedingly comfortable spring. The durable double weave fabric consists of tinned steel mattress wire, well covered through body. Observe the heavy, strong rope edges on each side. To support the fabric, a series of 21 copper coils is used. These are interfaced and locked to six long wires running lengthwise and four running crosswise. The cross wires of the support extend to the rope edge, and are firmly attached which reinforces the spring surface. The oil tempered helicals connecting the support with the end rails are used to relieve the strain upon the fabric, making it resilient and extremely restful. The finish is a bright gold bronze. Shipping weight about 45 pounds. State whether wanted for iron or wood beds; also give width.

Crown Spiral Wire Steel Spring

These Crown Springs are dependable in every way and at the price. We quote them at a price that will save you money.

These spiral springs are made in the Crown factory and the inspectors are constantly supervising their manufacture. They are made of standard steel springs of high 139 continuous winding spirals, and are black japanned. Where fitted they are on both sides with our patent interlocking top. Of course we do not recommend this spring in preference to our more expensive one—because it is not as desirable; but for the price it is a bed spring that will give full value for every cent of its cost. State whether springs wanted are for iron or for wood beds. For iron beds it is necessary to use slats which we show on another page of this book. Shipping weight, 21 pounds.
No. 3R1866. Spiral Spring. Price $2.45
No. 3R1861. With Woven Wire Top. Price $3.15

20 Year Guaranteed Steel Bed Spring

Your Choice of this excellent steel bed spring in the two styles which we quote below. It is guaranteed for a period of 20 years as indicated. All metal and spring work must be of a very high grade to stand back of a guarantee of this length. The best grade of high carbon steel wire is used, being oil tempered at 990 degrees Fahrenheit; 25 continuous windings of extra heavy spiral are attached to steel slat bottom. Angle steel side rails. Extra heavy 9/16-inch border wire is used and double crimp top construction. It is finished in oxidized copper, presenting a very attractive and pleasing appearance. When ordering state whether springs wanted are for metal or wood beds; also give width. We are sure also to give the correct number to insure your receiving the style that you prefer. The shipping weight is approximately 65 pounds.

No. 3R1862, Spiral Spring. $6.75
No. 3R1865, With Woven Wire Top. $7.65

25 Year Guaranteed Steel Springs

All Coils Are Joined By Helical Springs With Steel Center

This bed spring is one of the best ever designed. It is made of the best grade of highly tempered carbon steel wire. It contains 50 seven-single case spiral and heavy 9/16-inch border wire. The heavy angle steel side rails are exceptionally strong and substantial. All of the coils are joined to one another at the top by four helical springs with a steel center as shown in the smaller illustration at the right. An edge brace gives this spring additional strength, and acts as a regulating device that makes it "come back" to its original shape. All metal and spring work guaranteed 25 years. Black japanned finish, shipping weight, about 70 pounds. State whether springs are wanted for iron or wood beds; also give width.

GUARANTEED BED SPRINGS

We Have The Exclusive Sale Of These Nationally Advertised Products Among The Credit Mail Order Houses Of America.

THE WIT-EDGE is a feature found on Nos. 3K1840 and 3K1841 springs, illustrated and described on this page. This is one of the very desirable features of the Englander products and is a point of advantage that deserves special mention. The small picture to the left shows a mattress placed upon a spring having the famous WIT-EDGE. Look this over carefully and observe how this edge holds the mattress in place.

THE SIDE GUARDS through their ability always hold the mattress in the proper position likewise help to keep the mattress in shape. It is prevented from sagging and shifting—thus eliminating any wear and friction on the ticking, keeping the mattress from packing down, thinning out or spreading. This means double life to the mattress, while the springs possessing this feature will wear indefinitely. Insures a firm, trim mattress.

All Springs Come in Following Sizes: 3 ft., 3 ft. 6 in., 4 ft., 4 ft. 6 in. State Size Wanted and Whether for Metal or Wooden Beds.

ENGLANDER WIT-EDGE SPRING

THE ADVANTAGES of the WIT-EDGE are explained in the paragraphs at the top of this page. This feature is possessed by the spring illustrated to the right. With these patented upright extensions on either side the mattress not only will not spread or shift from side to side, but furthermore add a reinforcement to the sides of the springs, giving added strength and comfort. It is a bed spring guaranteed by us and backed up in every way by the Englander factories.

YOUR CHOICE of all sizes for metal or wood beds. When ordering, state size that you desire. The Englander link fabric is reinforced by four very strong steel bands. 3/4-inch helicals attach the fabric to the 2 1/2-inch angle iron ends. The link fabric is the very best available. The springs are properly secured to the fabric. The springs are guaranteed to be free from sagging and wear. Ship. wt., about 51 lbs.

No. 3K1816. Price $5.95

ENGLANDER WIT-EDGE SPRING

READ OVER carefully the details of the WIT-EDGE explained at the top of this page for a full and complete understanding of one of the important advantages of this spring. This provides the comfort, resilience and neat appearance of a fine box spring with none of its insanitary features. These patented upright side guards offer complete resistance to strain and wear which the edges of ordinary springs cannot resist. It is fully guaranteed by the Englander factories as well as by ourselves—a double guarantee of satisfaction.

ORDER IT in your choice of all sizes for metal or wood beds. When ordering please state the size that you prefer. The fabric is duple woven wire, reinforced by 21 cables and is attached to 2 3/8-inch angle iron ends by 68 tempered steel helicals. 1 1/2-inch tubing side rails are fastened to the iron corner blocks which elevate the fabric 5 inches above the rails. It is a spring that will be sure to please you, order it on easy credit. Shipping weight about 78 pounds.

No. 3K1840. Price $8.85

KANE KORE KABLE EDGE SPRING

A FEATURE of this spring is the 1 1/16-inch diameter Kable Edge. This is a core of round cane, light, very strong, which is introduced into the edges of the spring shown to the left. This core core reinforces the corner where the greatest wear and strain always applied and prevents the possibility of the fabric from sagging. It will keep the edge straight and firm in a very desirable point. Other features of importance are covered in the following paragraph.

SIDE RAILS are heavy tubing These are fastened to the iron corner blocks which elevate the fabric 5 inches above the rails. The link fabric top is connected to the angle ends by 68 helical springs. The angle ends are very substantial, being constructed of 2 1/8-inch steel straps. The steel bands through the center and on each side reinforce the link fabric top. These bands each measure 1-inch wide. This spring comes in a size and is made for wood or metal beds. State size wanted and shipping weight about 48 pounds.

"JEWEL" IMPROVED SECTIONAL BOOK CASES

This page shows another proof of the great values we give; and are in the form of very finely built "JEWEL" sectional bookcases. No argument from us is needed; the customer is your proof. The expansion bookcases. You will quickly see that it is the most practical bookcase that could be placed in the modern home. The bookcase is both permanent and expandable—a bookcase that is always complete, and yet permits growth by the addition, at any time, of sections that match perfectly and which we always carry in stock.

JEWEL sectional bookcases are carefully built, the cabinet work being done by trained workmen. The cabinet is finished in either fine Mahogany or Oak. The construction is wonderfully simple. All parts may be separated for moving; sections are 34 inches wide.

TO BEGIN

A complete set of JEWEL units you should start with the sections here illustrated, bookcase top and base. As your library grows, add units or sections of any required size, one at a time or more as you need them.

Extra Quality "JEWEL" Sectional Book Cases

EVEN FAMILY who do not think of having a modern home should equip their library or living room with a sectional bookcase. The JEWEL is one of the best constructed sectional library cases on the market and at the prices we quote you can save the purchaser several dollars. The average family begins with a few books and a top, two, or three or four section bookcases, and grows to the collection as they add to and increase the things they add to time to time. In this manner you need, you can have a large library and a handsome set of bookcases.

OAK OR MAHOGANY

Our extra quality JEWEL sectional bookcases are constructed in the best possible manner by experts, and of selected material. It is made with solid quarter-sawn oak front and solid oak panels in your choice of Oak or Mahogany, all finished a polished golden or in mahogany finish. The cases are beautifully finished and highly polished. The glass and sliding doors of book sections are easily removed and fitted with brass knobs; top is beveled moulded and has four finials. Sections fit together absolutely perfect. As many sections can be added from time to time as desired or as you can keep them conveniently in stock.

DESKTOP SECTION

The desk section unit shown in the illustration to the right is a conveniently arranged writing desk with drop lid which forms a ready writing desk. The desk with paper trays and top stationery drawer. The desk lid is supported with a metal frame which fits perfectly with lock and key. To any one who values a high class desk this sectional has absolutely no comparison. We recommend the desk section as the model desk all modern homes should have.

IF YOU WANT an impressive library table that will

never disappear from your horizon, then, the table is

for you. Never before have we been able to offer such a good, solid

mission table in exactly mission style at such an extremely low

price. You will know immediately upon looking at it that the

quality is unequalled for a table at so low a price, and you will

genuinely appreciate your bargain when you get it home. We know

what a rare bargain this table really is at this low figure and you

will find it so, too.

DETAILS. The top measures 42x28 inches and is securely

edged and mortised to the box frame. There is a long smooth running drawer fitted with a wood pull. The

long upper shelf is a very convenient feature and the part-

ticles at each end are most attractive, as may be seen in the Illustra-

tion. All in all, it would be hard, indeed, to find a more

handsome table in this particular style at any price. The

corner posts of this table will appeal to all admirers of mission

furniture, and at our price it is a most desirable bargain. You

will be proud to have such a mission table in your home, and the

usefulness of it is to create that in a short time you will wonder

how you ever got along without it.

BOOK SHELVES at the sides form a con-

venient receptacle for magazines, books and periodicals, while the

lower shelf can be utilized for money articles. It is practically

a library table and book shelf combined—two pieces of furniture in

one—handsome, practical and built to last for years. Have one

shipped to you on approval. If you don’t like it, return it to us.

But we know you’ll be well pleased in every way.

CONSTRUCTED in a fine way, this strictly Mission Li-

brary Table is a very good example of this

popular style of furniture. The heavy square legs, straight line top and

rails underneath conform absolutely to the true mission style. It is made

of thoroughly seasoned, solid oak, carefully finished in Fumed color.

A table like this one is necessary to complete the appointments of your library.

Solid Oak Library Table

With Quartered Oak Top

LOOK AT THE DESIGN of this table and see how

convenient it will be with book shelves, large top and spacious drawer. This is a well

made table offered at the remarkably low price of a year to pay,

again with its size. Its massiveness, quality of finish and wood-

manship, it is just a bargain. You will notice by glance at the Illustration that the mission idea has been perfectly car-

ried out and that it is a table unusually odd in design. If you aim

at furniture built along mission lines you cannot select a better

model than this very table.

IT IS MADE of solid oak, with quartered oak top, in

style that will be extremely popular in years to come. It is a model that will be an ornament to any library.

THE LOW PRICES make this table one of the most remarkable values ever offered by this institute. We placed a contract with the manufacturer for a large quantity of this particular design, and we obtained them at prices that enable us to offer them to you at these tempting figures. Select the size that you require and order it sent upon approval. It will go forward without delay.

HEAVILY BUILT through and through, out of well seasoned hardwood, to which ingenuity has applied a finish in imitation of the genuine quarter-sawn oak. It is offered, not as a remarkably high grade table, but as a fine value. The pedestal is non-dividing. The wood used in constructing the top and base is joined by a dovetailing machine, which lessens splitting and warping.

Dining Room Extension Table

THE DESIGN of this dining room table is not overly elaborate, but is sure to appeal to the taste of those who prefer the simpler patterns in dining room furniture. The severe, straight lines of the pedestal are enhanced by a neat molding, shown in the illustration, and are set off to advantage by the very attractive Colonial scroll design legs. For full particulars concerning this model read the following paragraphs.

THIS TABLE is made of solid oak throughout, in a rich golden oak finish. The top measures 42 inches in diameter, and can be ordered to extend to either 6 or 8-foot lengths, as desired, at the prices which we quote under the illustration. In ordering, be certain to specify which you prefer, so as to ensure your receiving the correct measures.

FITTED WITH Its legs are smooth running extensions, which prevent "sticking" common among modern raised dining tables. It is fitted with straight rim, which measures 2½ inches in size. Pedestal is 7 inches square, which is just a nice size to support the 12-inch top. Gracefully shaped scroll design legs measure 1½ inches and are made from 2-ply birch stock.

THE LEGS extend about 1 inch from pedestal. This dining room table is fitted with casters as shown. Workmanship of this table is of a grade that would expect to fit tables selling at higher prices than we ask.

UNIQUE DESIGN IN A SOLID OAK DINING TABLE

THE STYLE of this dining room table is very unique, and attractive as well. It is a Mission type, with William and Mary design pillars standing out in relief against the seven square inches of the drum. The illustration shows this style to great advantage and it will give you a clear idea of how you should order it. And yet the picture, at best, does not do justice to the table itself. To thoroughly appreciate the value that we offer in this model, you should see it, upon approval, so that you can examine it in your home. Thoroughly seasoned, bass dried solid oak is used throughout in your choice of golden or fumed finish, as you prefer. When ordering your order, kindly tell us which finish you desire us to ship to you.

WONDERFUL BARGAIN IN A 48 INCH PLANK TOP TABI

THIS TABLE is a splendid example of the kind of solid oak value you receive here. It is made of quartered solid oak throughout, and comes in either golden or fumed finish. Has a heavy planked top, 48 inches in diameter that is 1 1/2 inches thick. This is about twice the thickness of most table tops. It adds to the substantial and sturdy construction of the table, reducing the possibility of the top warping out of shape. The table size is 27 1/2 inches deep. The lower boards are also made of solid oak and measure 1 1/2 inch thick. Can be extended to 6, 8 or 10 feet as quoted below.

THE PEDESTAL in shape and size is a splendid example. Each face measures 9 inches across. The feet are very attractive, yet massive, extending 14 inches from the base. At the large end, where they are attached to the base, they measure 8 inches deep and are 4 1/2 by 4 1/2 inches thick.

IN ORDERING be sure to specify the finish you desire. Also mention whether you wish this table to extend to 6, 8 or 10 feet. By so doing you will avoid further correspondence and change of driving. It is fitted with strong set of 10 heavy, extending, planked slides. It is sold under our 14-day approval or your money back. Shipping weight 6, 7 1/2, 10, 14, 16 1/2 lbs.

The top is attractively hand rubbed and polished, giving it a beautiful glossy finish.

**Choice of Golden or Fumed Finish.**
In this world, there are two kinds of people: those who think and those who do not think. Money does not greatly increase the number of thinkers; but it is often the result of hard work. On the other hand, many persons have fallen into impotence and futility, who are rich, but do not fully appreciate the use of money because they do not know how to think. Others are poor in worldly things but rich in thought. These are the people who have the insight into life that really counts. People are the ones who study and learn, who develop the home, because they appreciate its true value. They are the people who live from us on credit because they realize that by so doing they are making their money fulfill its greatest purpose, and at the same time are enriching their homes and their surroundings.

Handsome New Substantial Sideboard Made Of Seasoned and Kiln Dried Oak Attractive Serpentine Top Drawers
Observe the Very Striking Carvings

BUSINESS METHODS have changed materially in the last sixty years. When we first opened our doors we found our competitors all operating practically upon one line. They all figured that the only way to achieve success was to quote as much for an article as they thought a customer would give. Our policy was different; we estimated that by buying in large quantities we could buy for less and therefore sell for less. We found that this theory was correct, because our sales exceeded our fondest hopes. Realizing that this was the proper policy to pursue we have been operating along these lines ever since. The more we sell the more we can buy, the cheaper our prices—and as our business increases the greatness of our values naturally improves in proportion. You don't have to look for or become convinced of the truth of our assertions. For this fine new design called oak sideboard is an excellent example of economic value.

LOOK AT THE PICTURE. That is sufficient to convince you of the rare beauty, artistic outline and splendid proportions of this handsome solid oak sideboard. It is made throughout of thoroughly seasoned and kiln dried solid oak in the handsome golden color. The beautiful serpentine top drawers are made of quarter sawed oak and one is lined for silverware. This sideboard has three-piece single end panels and is trimmed with wood knobs and hardwood casters as shown in the illustration. Particularly note the strong, bold carvings at the top, on the panels of the doors below and on the front posts. There is a large full length lower drawer below the two top drawers. Above the latter is a heavy top measuring 42.25 inches. On this top rest the two attractive standards which support the side brackets on either side of the mirror. The French beveled plate mirror is of attractive outline and measures 24 X 39 in. Observe that the measurements are all taken on the standards corresponding with those on front posts.

SEND US YOUR ORDER. It seems almost impossible to persuade you that you can have this elegant sideboard on most favorable, liberal credit terms; but that is exactly what you can do, and more than that, it will be to your advantage and you are to be the judge. If it does not come up to your expectations or you are not pleased with it in every way, ship it back at our expense and we will return every penny it has cost you. If you care to keep it, make your payments according to our liberal terms as shown on Page one of this bargain book. Shipping weight about 250 pounds.

Comes complete with casters. Below give the dimensions of this number.

MEASUREMENTS: The top of this attractive buffet is 21 x 42 inches; being a very desirable size for average family use. The French beveled plate mirror is 10 x 23 inches and the height over all is 54 inches. The posts measure 1 ½ inches wide. Order this excellent piece of dining room furniture on approval. If it does not please you, do not keep it. Shipping weight, about 250 pounds.

AN ELEGANT WELL MADE COLONIAL BUFFET WITH RICH AMERICAN QUARTERED OAK FINISH HEAVY PLANK TOP

We believe that the working people of the country deserve every consideration possible to give them; nor is this mere talk, we "practice what we preach." Our great mass of employees are all well paid and well cared for. Their comforts consist of rest rooms, hospital, dining rooms, and every feature that could be desired to add to their convenience. Those working for others we want to serve likewise, but we serve them in a different way. We fulfill their household requirements and give them a year in which to pay their bills. We go further than that, we search the world's markets for the best values that can be procured and give our customers the benefits of our vast purchasing power and easy credit terms.

As proof of our stupendous value-giving, your attention is directed to this massive, heavy, plank top buffet. Its lines are graceful, its workmanship is excellent and will prove a wonderful value at the price. The lumber used is seasoned hardwood to which is applied an imitation quartered oak finish in a rich golden color. This finish so closely resembles the genuine quarter-sawn oak that it takes the eye of an expert to detect the difference. The large French beveled plate mirror measures 10 x 23 inches and is gracefully rounded at top as shown. The attractive top is supported by 4 artistic Colonial design pilasters to match the Colonial pattern posts. Also observe the shapely, scroll ornament between the doors on either side.

THE PLANK TOP measures 20 x 12 inches. It is made of 1 inch chestnut core with two layers cross banded veneer on top and bottom and 1 ½ inch bender strip mortised on around outside. There are 2 straight front, overhung top drawers, one of which is usually lined for silverware. Below these top drawers is a full length drawer, as shown, for linens, below which are 2 compartments; the latter, as well as the drawers, are all fitted with rounded wooden knobs. Shpg. wt., about 175 lbs.

Another feature is the rich wood scroll used in the door, as shown in the illustration. Quarterly also the French shaped legs, carved claw front feet and the neat curving on the apron across the front.

Quarter-Sawed Oak is used throughout in the construction of this excellent combination buffet and china closet. The lumber used is thoroughly seasoned and is made so as to give the kind of service that you have a right to demand when you purchase a piece of furniture at this price. The finish is an attractive golden oak, which is found in so many homes, because it harmonizes so beautifully with good surroundings. We feel sure that you will be more than pleased if you send us your order for this model. It is sold upon approval and you can make your payments as outlined in detail on Page 1 of this catalogue. Remember, that our liberal guarantee of satisfaction applies to this desirable piece of dining room furniture.

The China Section. At each end of this buffet is an enclosed compartment for chinaware. The ends are oval in shape and are fitted with double strength bevelled, bent glass. Between these china sections are two center drawers fitted with round, wooden knobs, locks and key. The lained door below is likewise fitted with round, wooden knob, as shown. The base top measures 40 inches wide and 16 inches deep. You thus see that this is a good sized article that will command attention and enhance the appearance of your dining room. Running on the base is a clearly defined frame enclosing an 8x10-inch French bevel plate mirror. This mirror is shaped in a pleasing design that harmonizes with the general style of this article.

We Know that we will make a friend of you if you permit us to place this handsome and large piece of dining room furniture in your possession. It will always remind you of the great benefits to be derived from this institution and its matchless values and everlasting methods. Should it not entirely please you in every way, we will refund every cent that you have paid out in the course of the transaction. This is a value appeal of Hartman's and one that we are proud to offer to our many friends and customers. You make a wise selection when you choose that combination buffet and china closet. Shipping weight, about 325 pounds.

A COMBINATION QUARTER-SAWED OAK CHINA CLOSET AND BUFFET OFFER

Your Dining Room is a room where greater interest is taken than displayed in any other room in the house. It should contain the very best furnishings. Every housewife who appreciates art designs in dining room furniture will immediately see the advantages of this article. It is not only the artistic design of this article that makes it so much to be desired, but the way it's made, the quality of material and the low price at which we offer it, as well. It is extremely practical and worth, before a buffet and China Closet combined. Its construction is excellent, and a glance at the illustration shows how sensible it is and how ornamental it will be in your dining room.

At Each End is a compartment for china, fitted with an indispensible triple glass door and quality shelves. These doors are supplied with lock and key, and the glass used is of double strength. The center compartment is of large size and has a door fitted with wooden grille work, wood center panel at front door pull. There are two alternate doors above this compartment, each having lock and key and strong drawer pulls. At extreme bottom of center division is a large drawer for bows. These drawers and compartments provide ample space for placing all articles used in the average dining room.

Quarter-Sawed Oak is used in building this elegant combination buffet and China closet and is of splendid quality. It is beautifully finished, polished finish for future State which is lacquered. Veneered edges. The front panels are of magnificent new designs as shown in picture and are completed at bottom with scroll edges. The top is very artistic in style, being graceful in contour as illustrated. It is as portable as handsome Colonial standards.

Generous Size will be found throughout this article. The planked base is 11 inches deep and 48 inches wide. The French plate mirror in the top has deeply beveled edge and measures 16x11 inches in size. GENUINE QUARTER-SAWED OAK IN CHOICE OF FUMED OR GOLDEN FINISH

THE BUSINESS OUTLOOK is great. We are not optimistic through theory but through experience. When others about us have said that business was bad and that the people were not buying, we looked at our record of daily shipments with a smile of contentment, and well we might, because our business has been steadily increasing during the months that others complained. Such a condition is not an accident. It is the result of serving the people not as others have served them but in the unique Hartman way that's easy to get and easy to pay. Such values as these explain the reason for our giant strides.

THIS MODEL combines utility with beautiful design and substantial construction. The entire case is made of first class materials. Genuine quartered oak is used in building it, being finished in high grade, glazed, golden or fumed, as you prefer. Please state which you desire. It is a double-top construction. The upper section has bent glass ends and center glass door, the latter made with grille work to correspond with the base. This base, in addition to the china cabinet with bent glass ends, is made with two drawers, one being lined for silverware. Equipped with shelves, as illustrated. This case is trimmed with wood knobs and casters.

BASE TOP measures 45x17 1/2 in. Two Colonial pilasters rest upon this spacious top and support the upper section. Behind these pilasters is a fine French bevel plate mirror measuring 6x3 3/4 in. The Colonial pilasters on either side of base harmonize with those above, as well as the Colonial scroll front feet. Neat carving across center of back guard. Base back made from built-up stock. Height, 75 in. From the dimensions quoted you can gain a fair idea as to the size of this great big combination buffet and china closet. But to really appreciate its massiveness and beauty, send for it upon approval, and satisfy yourself that it is all we claim. (Only articles mentioned included.) Shipping weight about 250 lbs.

Two Fine China Closets Priced Very Low

**This One Has Genuine Quartered Oak Front Beautifully Finished In A Rich Golden Oak**

**YOU EAT TO LIVE.** There are two classes of people in this world—those who live to eat and those who eat that they may live. One doesn't have to be a glutton to enjoy one's meals, and even though you do not live because of the pleasure you derive from your food, there is no reason on earth why your meals should not be enjoyable. Did you ever consider the effect that pleasant surroundings have upon the appetite? A dingy, poorly appointed dining room is enough to take away the desire for food from even a hungry person. But there is no reason for any family to have an incompletely fitted unpleasant dining room because they can buy just what they want from us, and can pay for it on our liberal credit plan.

**FINE WORKMANSHIP** characterizes this newly designed piece of dining room furniture. The entire front and top shelf are made of genuine quarter-sawn oak, presenting a rich, handsome grain. It is finished in a beautiful shade of golden oak. The back is cut into an attractive manner. It can be had either with or without the mirror top at the prices quoted below. The oval mirror is a good quality French beveled plate. Closet comes complete with interior adjustable shelves, made of three-ply lumber. Has up-to-date spring push button catch on the door, as illustrated.

**MEASUREMENTS.** This china cabinet stands 74 inches high with the mirror ornament and 61 inches high with the back board. It is 34 inches wide and 131/2 inches deep. The mirror is 81/2 inches, and the interior shelves are 13 3/4 inches. The crockery shown in the picture is not included at the prices quoted. If you are perfectly satisfied with this china cabinet, pay for it at small amounts. The shipping weight is approximately 140 pounds.

**This One Is Made Of Genuine Quarter-Sawed And Solid Oak. It Has Neat Colonial Scrolls**

**THIS CHINA CLOSET** will make a decided improvement in any home. Consistent with our methods of doing business, we offer it to you on easy terms as shown on Page 1, giving you a full year in which to make the last payment on the balance. Genuine quarter-sawed oak is used on the deep frame, the circle note and the top, the balance of the case being constructed of very durable, solid oak. You can have your choice of either solid or fumed oak finish as you desire. In offering, please mention which finish you prefer. There are 3 shelves which are made of 5-ply veneer with a groove in each shelf for holding dishes within. This seems like a small detail, but will be appreciated by those who are familiar with the usual cabinet construction.

**BENT GLASS DOORS** add style and class to this piece of furniture. The corner posts of continuous construction, embellished with scroll ornament, terminate in graceful, "Colonial" shape feet. Order this cabinet with or without mirror top at prices quoted. Height, 74 inches; width, 36 inches; depth, 15 inches. Prices and dimensions shown are not a price quoted. Solid Oak Kitchen Cabinet

A Well Made Kitchen Cabinet With 41x26 In. Top, A Good Value

MOST MEN are not vitally concerned as to the method of running the household. But their evening indecision takes another turn, should it not be harmonious and pleasant. The question of how the meal is prepared does not interest him nearly so much as how it tastes. The matter of when you start to prepare it does not bother him just so long as it is ready when he returns home, after the day's tasks are done. But you women who have the responsibility of the management of the home must seriously consider these matters. Therefore, it is to your interest to possess a kitchen cabinet such as this, because it will save you time, labor and vexation.

SOLID OAK is used in its construction, being thoroughly seasoned and nicely finished in an attractive golden color. The top section is fitted with two full length shelves, affording ample room for dishes, glassware, etc. This compartment has two doors of clear crystal glass, set off with artistic lattice work. The table top measures 41x26 inches. Under this top is a handy bread board. To the left of the base is a roomy cupboard fitted with shelf at top. The doors to this section, as well as to the cutlery drawer on the right and the cupboard doors in the top, are fitted with wooden knobs. Flour bin fitted with wood drawer pulls. The base has panelled sides as illustrated.

Returns in Attractive Golden Oak

Complete Cabinet With Room For Everything. Has 42x25 In. Top

IN THE ORIENT there are women who prefer slavery to other countries to marryage on their own native soil. The bride in one of the smaller countries is not permitted to speak aloud until the birth of her first child. In another part of the globe, the wife is second in her husband's affection to his horse, and women are regarded very unfavorably in some of the countries of this universe.

Fortunately, in America we respect womankind as queen of the household. Every attention is given to reduce her work and to lessen her worries. Every device that accomplishes this end is looked upon with favor by the American people.

The kitchen cabinet is a Godsend to the household, which we illustrate in the left and describe herewith.

THE KITCHEN CABINET is reasonably in price; at the same time it is a complete article such as every home-loving woman will highly appreciate. It is carefully and substantially made of solid oak, containing the metal flour bin of 46-pound capacity and metal flour sifter. Door to this section is of handsome art glass. And to correspond with two-door compartment on the right.

LATER a very convenient place for keeping dishes and glassware. In fact this cupboard you will find a very convenient rack upon which can be kept staple articles of food.

LARGE TABLE TOP is made of care fully sanded solid wood and measures 41x26 inches. Easy sliding kneading board is beneath this top. Handy utility drawer and deep drawer below, fitted with nickel-plated drawer pulls. Lined rack, also wire roller rack on inside of lower cupboard door. Height is 42 inches. Construction at extreme top forms a very convenient shelf. (Only articles mentioned included.) Shipping weight, about 175 pounds.

This is the finest Kitchen Cabinet we offer in our line of Comfort Cabinets, and the arrows show you its many features. It is made of selected Solid Oak and is 72 inches high by 48 inches wide. The Table Top, when pulled out, gives a working space of 48 x 35 inches. It is a wonderful value.

THE TOP is white enamel lined and has a large 50-lb. white enameled metal automatic swinging four-bin with removable sifter, and is fitted into a section with a handy shelf at the top. The door to this section has on the inside a handle, a three-compartment built-in ice ticket tray, and a spring clip for bills, slips, or your cook book. The china cupboard is fitted with a sliding glass door, while the pantry, metal, enamel lined cake box, which can be lifted out of cabinet, has three removable wire shelves and is fitted with a painted wood door. The lower part of top which contains a sugar jar and spice jars can be concealed by a disappearing, sliding roll top. We furnish with this cabinet an 8½-lb. glass sugar jar, 6 glass spice jars, glass coffee jar, glass tea jar, which have aluminum tops, and glass salt jar.

THE BASE is strong and substantial and has a sliding Nickeloid table top, which when pulled out gives a working space of 48 x 35 inches. Below the table top is fitted a large, removable bread board, divided cutlery drawer, large utility drawer, and bread drawer with ventilated sliding metal lid. On either side is found a large cupboard with removable wire shelf in center and sliding shelf at bottom with protection rail. The doors of these cupboards have pan rack on the inside. A handy rolling pan rack is provided in the cupboard. The entire cabinet is made of selected solid oak, finished in a light golden, dull rubbed to give a velvety appearance. Exceptionally well braced and braced throughout, stands 72 inches high from floor. The hardware has a copper finish. Shipping weight about 275 lbs.

A SEWING MACHINE is necessarily a very delicate machine and is supposed to be able to perform certain functions with the skill of the human hand. Building a sewing machine is like building a watch. Each little part must be perfect within itself in order to obtain satisfactory operation. The materials used must be of such quality as will give the machine strength, yet without losing of durability. The mechanisms in the head of a sewing machine must not only make the finest quality work, but they, too, must be adapted with the greatest care.

DEPENDABILITY OF QUALITY.

While we speak particularly of the excellent work of the "Columbian" machines, we refer also to the excellent work of the "Hartman's" machines. The following pages will tell you of their great efficiency and very low price, yet we want to mention the fact that these machines are of great possible durability. We assume you that only fine grades of materials are used and every little particle in every machine must be found to be perfect before it is sent into our very cheapest machines. We give a ten-year guarantee with each machine we sell, regardless of the price. We can do this for we know that when our lowest priced "Columbian" is built right, will give the satisfaction that the best or most expensive does and last for many years as to make it the most profitable investment for the owner of the machine.

Improved
Columbian "A"

Sewing Machine

FOR A MODERATELY PRICED good quality sewing machine; one that is reliable and guaranteed by the manufacturers and ourselves, there is none to surpass this Columbian "A" for the money. When you stop to consider that machines of this style have been sold for many years and are giving satisfaction today, and have for years, you come to the conclusion that they are pretty good machines.

THE CABINET is made of solid oak and is nicely varnished. It has four drawers, the front panel is adorned with rich carvings, while the drawers on either side are fitted with neat ring pulls. The edges are expertly rounded. It is fitted with a high arm which when opened gives ample space for resting a large quantity of material. The table of machine is made to give plenty of working room and is not congested, as is often the trouble with inferior brands of sewing machines.

STRONG STEEL WORKING PARTS. Every working part is made hardened in oil and has a good surface, that is scarcely affected by years of hard use. The accurate fitting of these superior parts gives the machine the light running qualities so much sought after and well known to exist in our Columbian models. The fine head is of the improved type and is finished in black enamel and ornamented with decoration. The stand is of a heavy design, counter balance, automatic bobbin winder, ball bearing steel pinion, steel drawer runners, and automatic drawer locks which do away with keys that are possessed by this machine.

TEST IT AT HOME by letting us ship it to you on approval. Before you have used it ten days you will find that all we claim for it. Although the Improved Columbian "A" has all of these desirable qualities we do not claim that it is as fine a machine as the more expensive models. In fact, we recommend one of the better designs for the fullest measure of satisfaction, but we will say that for the money it is an excellent value.

Lock and Unlock Automatically.

THIS SEWING MACHINE has four drawers, drop locked, and also possesses front automatic lift and it is of the easy running, ball bearing type. Cabinet is solid, golden oak throughout, imported in China finished, the exception of the lid, which is of genuine quarter-sawn oak. Hardwood tape measure on cast iron felt operating mechanism goods without radius. Cabinet is prudently designed, having easy front flaps, brought out in neatly figured oak. Exceptionally strong construction insured, by the fact that each working part is fastened independently, or centered directly to iron stand.

THE STAND. The improved Columbian "D" is equipped with new, beautiful, strong, French leg stand made of very best gray iron. Lines are sweeping and graceful. This stand is very easily dusted. It is given a high luster finish of black Japan. Ball bearing steel Pitman is used on the improved Columbian "D", not the old style, easily broken, hard running, wood Pitman found on many older patented machines now. No key required. When you turn back lid, drawers unlock automatically; when key is inserted, drawers lock securely. SECRET SPRING UNLOCKS DRAWERS when machine is closed. Steel Drawer Runners. High Balance Wheel.

YOU CAN SAVE

the price of this beautiful, automatic lift, ball bearing, convenient and light running machine in your home the first year along through the many things that it will produce for you. Its time-trending and labor-saving conveniences that you will find so thoroughly satisfying are listed below. They are of great significance to the woman who does her own sewing, as you will appreciate after once trying the improved Columbian "D". Remember, that in purchasing one, we send this machine to you upon approval subject to our legal guarantees of satisfaction, or your money back.

IMPROVEMENTS constitute the following:

Locking Drawers eliminate the necessity of using keys on this machine. It has steel drawer runners, on which the drawers slide easily and smoothly without sticking; steel ball automatic lift raises and lowers the head automatically; the high lapped French leg stand is strong, beautiful in design, and being of open pattern is very easy to dust and keep clean.

OTHER FEATURES are the steel Pitman ball bearing, which is in place of the old fashioned wood Pitman, which breaks easily and is far from satisfactory in results: the ball bearings insure easy running; this easy running feature means a great deal to the woman who does a large amount of work as it transforms drudgery into a pleasant occupation. The high, large balance wheel increases the speed as well as the class with which this machine operates.

Raised Design on Panels as Illustrated

THE DRAWERS are perfectly square, as are the panels and pilasters. The strictly mission design with an attractive and highly artistic raised effect on panel is one of the most beautiful ever put on a sewing machine regardless of price or name. Drawers are fitted with heavy, mission style wood drawer pulls, as shown in large illustration. The woodwork is full quarter-sawn oak throughout and the finish is of a very high grade. Therefore you will have a machine that will please an ornament in your home; and also a piece of mechanism of superiority in every sense.

SEWING HEAD is large and roomy, being 13/4 inches under the arm and the width of the head to correspond; in fact, this is one of the largest armed heads on the market. It is strong and substantial in its operation and is guaranteed to do any and all kinds of work in every satisfactory manner. You are sure to enjoy this machine.

THE FEED, needle bar, shuttle and take-up parts are very strong. These four parts of head are the very parts that make the stitch. Latest improvements will be found on this head, which include a square four-motion feed, self setting needle, self threading shuttle, independent take-up, automatic bobbin winder, bed plate, stitch regulator, etc.

These illustrations convey some of the desirable features of the "Marvel".

NOTE ESPECIALLY that this dress form is divided just as the hip line which is no other make of form of which we know that gives the advantages of adjusting and widening the hips, seat or abdomen. IN the KIRTL LENGTH MEASURE AND GUIDE this is the most important improvement that has been made in adjustable dress forms. In addition to this, you can enlarge the bust without affecting the waist, hips, or seat. Likewise, you can make one shoulder higher than the other—an adjustment that is required by many persons.

You can adjust this form to suit the lines of a model, or to the lines of a skirt, without affecting the bust, hips, or seat. You can also use it as a pattern for making your own dress or skirt. The Marvel 16-Section Dress Form is made to order in any style, and is sold at a nominal cost. It is made according to our specifications. The Marvel 16-Section Dress Form is made of heavy jersey cloth, and is washable. The full nickel trimming found on this dress form add to its life as well as to its bright and pleasing appearance.

REVOLVING STAND on which the "Marvel" Adjustable Dress Form is mounted is made of iron, and is very strong and substantial. You can adjust this form to any height that you desire. Fitted with claws and talon feet instead of casters which get out of order and cause considerable annoyance. We desire to impress you with the fact that when you see a Marvel dress form in this 16-sections that has the many desirable features of the "Marvel", at this low price, you are obtaining a value that is worth of its name. Shipping weight, about 45 lb.

By glancing at the pictures of our line of Kitchen Cupboards you will quickly see that they are all of pleasing design, and that any one of them will prove an ornament to your home. The inner construction of furniture adds greatly to make up its quality, but does not show in an illustration. Therefore we refer to the strong reinforcing on the inside, smooth finish, and perfect joining of all parts, all equipped with key and lock—not with knots as illustrated. Drawers have knobs, not handles.

A REMARKABLE lawn swing in many ways. As sold with or without canopy, as desired, at the low prices which we quote on this page. By referring to the illustrations and the descriptive features brought out with the aid of the arrows, you can gain a good idea of its excellent construction. It is without question one of the best values we have ever offered. The derrick is painted red, the balance of the swing being a natural varnish finish.

THIS DERRICK is made from 1 x 3 inch rounded stock, has noiseless knife edge hangers, 8 ft. high, and occupies a ground space of 4 ft. 6 in. by 3 ft. The width of seat between arms is 31 inches. depth of seat 12 inches, hanger rods 8 ft. 3 in. Seat and hook can be adjusted to three positions and platform can be raised to second dowel for children's use, or level with seat, to form a couch. The advantages of these features must surely appeal to you.

THE CANOPY is made of standard 6 oz. blue and white awning stripe. Has full scalloped braided drop and full braided edge on ends. Gives it a fine finished effect. Sets upon strong angle iron, which are firmly bolted to insides of derrick. Swing comes packed to insure lowest freight rate, but can be set up in a very short time. State whether wanted with or without canopy. Shipping weight of swing, about 150 lbs.

A Very Strong Swing With 1¾ x 3 In. Posts. Full Box Frame Seat

Bolted Construction And Equipped With Heavy Galvanized Chains And Ceiling Hooks. Fine Fumed Finish

Bolted Construction And Equipped With Heavy Galvanized Chains And Ceiling Hooks. Fine Fumed Finish

This Massive Swing is made of solid oak in full finish, over which is placed a coat of lacquer, which gives it a wax-like finish and furnishes a tough, weather-proofing against unfavorable weather conditions. BOLTED construction is used in the building of this swing. It is a very rigid and substantial article. Extensive width is 50 inches; the seat measures 17½ x 48 inches; distance between arms about 4½ inches.

Bolts are from 1½ to 2 inches above where it is regular attached to footrest and attachment, footrest and chains and ceiling hooks, shown in the illustration. Has side panels and wide arm rests. The arm rests, in addition to being of bolted construction, are fastened with 3-inch heavy screws. This swing has a tie bolt running completely through the ends. The method of building this Automate is such as to produce a strong, braced construction. This swing is self-propelling and has ample space back of footrest to step in and out of swing. The footrest propels the swing and the slightest pressure of the feet starts it in motion. It has a shaped seat, as illustrated. A feature of this Automate which is a great improvement is the adjustable footrest.

You will notice that the footrest can be raised and bolted about 1 inch above where it is regularly attached. This is provided so that it will be suitable for children or small people. The arrow in the illustration shows this feature. The extreme width is 54 inches; the seat measures 17½ x 48 inches; distance between arms about 11 inches; distance above seat, arm measures 11 inches above seat, length of arms 22 inches, width 2½ inches; the seat construction is strengthened by the use of four braces. It is constructed of 1½-inch rounded slats. Footrest drop is 1½ inches, width of footrest 13½ inches. The footrest chains are easy, smooth motion; shipping weight, about 45 lbs.

Finished in the Rich Baronial Brown. The Tapestry Upholstering is Floral and Leaf Design in Harmonious Colors

WE ALWAYS have the interests of our customers in mind when we search the manufacturing markets for articles to offer in our big line of bargains. Our offerings are high grade and the prices are absolutely the lowest possible. Join our big army of customers who stand by us because they know that by so doing they are taking absolutely no chances whatever. As an instance of price-slashing; as a sample of genuine bargain-giving; as a really great opportunity to purchase merchandise that you can feel proud to own, we call your attention to this beautiful, decorative, comfortable rocker. It goes out with our strongest and sincerest endorsement and recommendation.

IT'S A CERTAINTY that if you purchase it you will be pleased. This rocker is expertly made of fine Fibre Reed, superbly woven as illustrated, and expertly finished in the widely used and very attractive Baronial Brown—a color that "fits in" with practically all surroundings. The upholstery is attractive tapestry with flowers and leaves predominating, all beautifully blended in natural colors to produce a wonderfully attractive effect. The button tufted pad in the seat is removable. It is covered with tapestry to match the back and padded strip forming the seat front. The shades are delicate in hue, comprising greens, old rose, yellow, blue, etc. The back is very well padded to insure comfort.

THE SEAT has nine strong springs. It is nice and roomy, measuring 21 inches between the arms. The height of the back from the seat is 24 inches, and the height of the seat from the floor is 18 inches. We wish that you could sit in it while you are reading its description, then that you could get up and take a look at the rocker itself. In fact, you can, if you desire, for we will send it to you on approval, without any obligation on your part of keeping it, if you care to keep it, as we know you will, for it in small installments. Shipping weight, about 25 pounds.

Has Removable Pad and Spring Cushion Seat

Baronial Brown Color, Tapestry Upholstered, Very Comfortable, Has Nine Springs in The Seat

THE ELEGANCE of this very artistic rocker will be recognized by you the minute you see it in your home, for it has the earmarks of refinement, luxuriousness and high class appearance. It is made of durable Fibre Reed, handsomely finished in rich, baronial brown. This Fibre Reed is known for its wearing qualities as well as its rare beauty. The back is rounded and the upper front under the seat is shaped in a very attractive manner. Observe also the gentle flare to the arms, which gives it both grace and ease, so much to be desired in a rocker.

THE TAPESTRY is of a floral and leaf pattern, magnificently worked out in an harmonious combination of colors, with brown in predominance. The green shades as well as the delicate yellow and purple tints combine to produce a very artistic effect. The tufted, tapestry upholstered pad in the seat is removable and is neatly sewed with tufting buttons. Tapestry strip in front to match. There are 9 hand-tied springs under the seat, which are supported by 3 steel bands. This method of construction insures strength as well as rare and comfort to the occupant. It is fitted with good, strong runners.

MEASUREMENTS. The height of this excellent rocker is 34 inches, the height of the seat from the floor being 18 1/2 inches. The seat itself measures 18 inches deep and 19 inches wide. Extreme width 23 inches. From these sizes you can gain a clear idea of the relative proportions of this exceptionally fine piece of furniture. Remember, that the illustration as shown to the left is taken from an actual photograph of the rocker itself and therefore conveys its elegance and splendor. You can order it shipped on approval and take a year to pay. Shipping weight, about 39 pounds.

Special "Leader" Underglazed Porcelain Dinnerware

THE HANDSOME PLAIN WHITE PORCELAIN dinner set, which we offer for your consideration, is one of the finest of its kind to be found anywhere at the price. It is a good plain white set, the shape of dishes being that shown in Illustration above, with a neat embossed design, molded at intervals on the outer rim of each piece. While there is no gold band decoration on any of the pieces of this set, the embossed pattern does away with the severity plain appearance which would be noticeable if the embossing had been omitted. A pure white set is often more preferable than one with decoration and for those desiring a set of this kind, No. 6K341 is one of the best they can buy any place in the country at a price anywhere near as low as ours. When you consider the wonderful bargains at which this set is sold and the convenient plan of easy payment, it is surprising there is no excuse in the world for doing without this set. There is really nothing more practical than to eat good food served on good dishes. It's a pleasure not to be denied anyone. Can be furnished in either 51 piece set, weighing about 60 pounds, or 100 piece set, weighing about 95 pounds.

THE BEAUTIFUL 2-INCH GOLD BAND PATTERN of this set, in further illustration of the style of decoration now being used on the coolest dinner sets at cost many times what we quote you for this set. As the preceding style of decorating has for the past few years been cold hands on cold plates and for who desire such a set, we offer our No. 6K1952. Each piece of this set has been given an embossed design on each edge, appearing immediately below the gold edge, which itself encircles the entire edge of dish as shown in Illustration. This gold is put on by a new process at the pottery, and before the dish is given the firing and glazing. By this method, the decorating is put on very evenly and gives it avelvety finish. You can safely buy this set with assurance that it will be well made and that you will enjoy it as much as we guarantee it. It can be furnished in either 51 piece set, weighing 60 pounds, or 100 piece set, weighing 95 pounds.

OUR “NEWCASTLE” DECORATED DINNERWARE OF PORCELAIN

HELPFUL CREDIT is a necessity. There is no more
truth and instruction in this expression that
might well be taught in every schoolroom
our big United States. It is really important eno-
ough to be placed in the early books along
with “Honesty is the best policy.” You have
reason to believe what established credit means
you. It means that you can enjoy long-waits
for home comforts without bumping your purse
to pay for cash. Under OUR credit plan, you
get what you desire, use it, have your family
and friends enjoy it, and have a full year’s
pay in convenient small payments.

JUDGE THE DESIGN yourself as to whether you have ever seen its equal at a
low price. There is no doubt but what you
never have seen a like value before. The de-
sign or ornamentation is of an oriental type
in artistic pattern, beautifully formed by
colorings of blue, green and maroon. The
designs are cleverly arranged around
forming a neat border. The edge is
ornamented with a delicate crown gold band, with
a deep embossing, woman in the style of decoration. 51 piece
packed, weigh about 50 lbs, while 100 piece
weigh 33 lbs. Page 220 gives list of pieces.

“BERLINE” GOLD EDGE AND FLORAL DECORATED DINNER SET

LOOK AT THE PATTERN! of this elegant
set and see if it is not the kind desired you have ever seen on a dinner set
traveled in. The dishes are ornamented with
tones of roses, green foliage and stems, which extend around brim, formed together by a
border, from which, sprouting towards center, are sprays in natural colors. The ef-
fective decoration is most charmingly brought out by the neat gold edge and the paper white
background afforded by the highly fired and polished porcelain. These colorings are
put on by a new process.

YOUR CREDIT is good with us, and
you are invited to order the set you desire and send in your order. If, when you receive the shipment, you are
pleased in every way and find your dinner
will last a full year to pay. Page 1 of this volume shows how simple our open-account plan really is. You will find that the small
particular set will never be missed and, before you know it, it is
all paid for. Our plan is just a long, simple action of credit on the part of our customers of good quality. 51-piece set weighs 95 lbs. Page 220 gives list of pieces.

Gold Band Set.

You cannot purchase at this price a dinner set that will adorn your table with more exquisite taste than the beautiful white and gold pattern illustrated on this page. There is a narrow band of gold around all edges and likewise a fine gold line as shown on the various pieces. A striking feature that adds distinction to this set is the attractive heavy solid gold effect on the handles. These gold handles place this set above the ordinary, giving it distinction and "class," such as you rarely find at these sensationally low prices. White and gold decorations, always popular, have become the favorite because they do not offend the most cultivated taste and harmonize with all color schemes of table decoration.

The shape is the splendid new "Empress" shape, so much admired by housewives and found in the homes of the wealthiest people the country over. It is pronounced the last word in the plainer shapes now the prevailing fashion for home use. It is the leader of its class, as you will recognize after having seen the articles themselves. All pieces are pure white, of velvety texture, of abundant size, yet dainty in modelling. The contour of the handled pieces is especially graceful, eliminating the usual "stuck on" appearance found on many inexpensive lines of chinaware. They seem to grow out of the body of the piece, giving them the finishing touch of style. When you consider our low price you should not hesitate to send us your order for the 100-piece set. Either set, however, is a true bargain offer at these low figures.

51-PIECE SET CONTAINS

DECORATED “HAZELHURST” DINNERWARE WITH NEAT GOLD EDGES

NEW DESIGN is found on this elegant porcelain dinner set and it is sure to win immediate favor with all lovers of fine dinnerware. Just look carefully at the ornate and you will see in what a beautiful arrangement the border and medallions really form. A porcelain used by the potter in making these was of very fine quality and every care was taken to produce a set that for the money will be unequalled elsewhere. And they have not succeeded in turning out such a set, for we should look far before you could duplicate one piece for our low price. You don’t have to ask our word for it, either, if you don’t choose—for we will be pleased to send you a set on trial and if you don’t like it—don’t like it—don’t keep it.

THE BORDER is of a solid arrangement and you can see around the edge before the final drying and firing are done, really making it retain its lasting appearance. The border is of a neat border bordered with mol- lusions of floral and scroll effect, with a chain border and three supporting medallions, the center medallions are harmoniously blended and pleasing as well as richful in the eye. Each dish is roundly shaped and the entire set is a very pleasing production. You really will not appreciate the beauty of this dinnerware until you have used it at home. The fireplace set weighs about 6 lbs., and the 51-piece set weighs about 10 lbs. See list of pieces included in each set, see page 321.

HIGH GRADE "JOSSLIN" FINE GOLD DECORATED DINNER SET

THE NEAT PATTERN of these dishes is one of the patterns that make them so desirable. A great many people are now using dishes with a plain, conservative border decoration and for those who are looking for such dinnerware we have no hesitation in recommending this set. We consider the low prices we are quoting on such fine ware as an added lure. We ask you to make a comparison of this value with those of others and furthermore we want you to see the set and not on your table to know its real worth and beauty. If it is hard to do it justice with a picture, send us your order and let us ship you a set at approval, so you can look it over carefully and admire its gorgeous coloring and fine glazing.

THE GOLD used in decorating this set is a mixture of a splendid quality and the border is neat and attractive in green color lines and gold, crowded with gold colored diamond shaped figures intertwined with semi hair lines of gold. Each dish is shaped perfectly and made by men who know how, and by a potter who makes nothing but Chinese dinnerware. The glazing and firing are fine also, and the design is put on before the final firing in porcelain making it very pleasing. Take our advice and order this set, if you desire a magnificent pattern and a set of dinnerware that is made right. The 30-piece set weighs about 6 lbs., and the 51-piece set weighs about 9 lbs. For list of pieces included in each set, see page 320.

OUR FINEST DINNER SET, THE “TAVERN” WITH RICH GOLD BORDER

A MISTAKE can be made in selecting dinnerware. This super Dinner Set is a desire set beautifully ornamented and of high quality porcelain. This is a striking new line, handsomely decorated in gold and color. The color is nothing loud or flashy about the set, it is very simple, neat and tasteful, selected by those because of its rich simplicity. Selection of dinnerware is often overlooked, being thought insignificant and in this manner cheapening one’s appearance. But not so with our offerings, in house, we take pains to select the very best. They are a simple nature, as are known to be used on most expensive European Birthday sets and our fine will conform with these requirements.

THE ORNAMENTATION of this choice has been ornamented of a beautiful ornamental border around the edge in a Japanese effect and the bordering of color, edged with an extra rich gold band. The entire decorative idea is given a sense of refinement by the rich coloring of the body of the porcelain. The sets are either 30 pieces, weighing about 6 lbs., or 100 pieces, weighing about 15 lbs., and by referring to this page you can see exactly what pieces are contained in the set. It is a wonderful value in either size.

THE MATTER OF QUALITY is, without question, a most important one to consider in the purchase of any piece of merchandise. The matter of price is likewise of supreme importance and it is the two combined that determine the true merit of any value. In presenting this go-cart, we want you to carefully consider that the all important factor of quality has been well balanced with that of price, until we can say, with the utmost conviction, that no better go-cart value was ever offered on the market at this exceptional bargain price. It is a full collapsible model and folds with one motion.

THE ATTRACTIVE DESIGN is symmetrical, the lines being graceful throughout. The gearing is of the patent ball and socket direct bracing type, recognized as the strongest and lightest construction used. The frame is tubular in shape and is very strong. Observe the 5-piece handle with nickel plated side grips and center ferrule. The body measures 15 inches wide by 36 inches long, is equipped with the new shock absorbing springs which run the entire length of the seat and mean added comfort to the little one. The comfortable back is adjustable to 4 positions. Has padded seat and back, also auto dash as shown in illustration above.

FOUR-BOW HOOD This go-cart has a large, 4-bow hood with nickel plated fixtures. The wheels are black or brown upholstering, the material used being a good grade of leatherette. This is a go-cart that is far ahead of most others for price. We therefore urge you to send us your order today. It is sold under the liberal terms shown on page 1 of this catalogue. Sides Are Made Of Three-Ply Wood Veneer With Steel Channel Binding

CONSTRUCTION of this go-cart is far above that usually found in baby carriages at this price. No. 85 is merely a startling blow of proof. The facts as stated will be substantiated if you care to keep this feature in your favor. It is very reasonable that you cannot afford to overlook it. If you really see in search of a go-cart that's Built to last, you will want to look into this one.

THE WHEELS as mentioned in the previous paragraphs, are made of 3 1/4-inch diameter, and are fitted with 3/4-inch rubber tacks. They are expertly enameled to match the inside of the metal parts. The body is unusually large and comfortable. It is 11 inches wide between the sides and gives a bed 35 inches long. The front is a lever sprung to be used at the right position. The back is free from any attachment to the seat. It moves up and down on the seat but is not to be raised and lowered. The long cushioned seat can be made comfortable.

THE SPRINGS. There is a long leaf suspension spring under the entire length of the seat. This is a double spring that is self-adjusting to the varying weights of different children. It is a very important feature. It ensures a perfect adjustment to the weight of a child at any particular age. No carriage has an easier riding motion than this model. The sides are made of three-ply wood veneer held together with a steel channel binding. Two coats of fine grade enamelled are used to finish the sides, the second coat being rubbed which gives it a very high lustre.

THE UPHOLSTERING is of the finest grade of imitation leather, to black or brown. It can be fitted with a hood and a front and back high being very heavy padding. The back fits all positions and the hood is removable. The seat is fitted with 3 1/2-inch diameter, and is fitted with 3/4-inch rubber tacks. They are expertly enameled to match the inside of the metal parts. The body is unusually large and comfortable. It is 11 inches wide between the sides and gives a bed 35 inches long. The front is a lever sprung to be used at the right position. The back is free from any attachment to the seat. It moves up and down on the seat but is not to be raised and lowered. The long cushioned seat can be made comfortable.

STORM FRONT. If you desire, you can order the storm front for this go-cart at the reasonable price quoted below. This storm front protects the child in stormy and unpleasant weather—yet it is fitted with a window that is on a level with the child's eyes when he is in a sitting position. Every desirable feature imaginable is incorporated in the building of this article. Tell us to send it to you, and we feel certain that you will be well pleased with your purchase. The shipping weight of this go-cart is approximately 55 pounds.

**IMPROVED NEW DESIGN**

**HARTMAN REFRIGERATORS**

Here's a Refrigerator that has been designed for economy of space allowing a great deal more room than many refrigerators of smaller design, yet costing as much as this one. It embodies the most improved scientific principle of cold, dry air circulation which has been proved the most perfect for working great ice economy. The provision keeps the cold air in the refrigerator and allows the warm air to escape out. We know that you will be well pleased with this fine refrigerator at low prices we quote below. Considering the sizes and measurements of various compartments higher prices than these figures would ordinarily be considered cheap for so fine an article.

It is made of panelled construction, a splendid quality of seasoned ash being used with a rich golden oak finish. It can be ordered either galvanized iron lining or white enamel lining according to price given below. When sending us your order, be sure to give the correct number, so that we will know the exact size to ship, and also whether you desire galvanized or white enamel lining. Be sure, also, to select a size that will be sufficiently large to fulfil your requirements. Hinges and locks are strong and durable and are made of genuine brass. Waste pipes are removable. Easy rolling casters are supplied.

**ASY TO CLEAN.** The provision chamber is fitted with wire shelves adjustable to different heights, thoroughly sanitary and guaranteed in every way. Both the ice chamber and the provision chamber have large front doors which is the most convenient construction known in the building of refrigerators. This is one of the biggest money-savers ever known in refrigerators, and it preserves the food perfectly, keeping an even temperature and consuming half the quantity of cold air that is usually necessary to produce proper results in large refrigerators. Order one and have an entire year to pay for it.

**EXTRA LARGE HARTMAN REFRIGERATOR BARGAINS**

Galvanized or Enamel Lined

A WONDERFUL OFFERING

**MADE OF SOLID ASH** in all the sizes at the low prices quoted below. They are handsomely finished in a rich shade of golden. Only high grade materials are used in their construction and they are extra large refrigerators, heavily built, so as to stand extreme weights. Any size is remarkably durable. The trims, such as locks and hinges, are made of solid brass heavily nickel plated, and easy running casters are supplied. The ice racks are of galvanized steel, rigidly riveted together and of lasting quality. Ice chamber has front door and removable accessories in interior so as to be easily kept clean and sanitary. Construction of entire refrigerator is of panelled type and only well seasoned ash is used.

**THE SHELVES** are made of nickeled wire and easy to keep clean: they are adjustable and can be raised or lowered to suit the convenience of user. The provision chambers, both large and small, are so constructed that they at all times carry a perfect circulation of cold air, which fact alone assures you of an odorless box that will consume no ice and cut all high ice bills. Waste pipes are removable for cleaning. The insulation is of most satisfactory type, assuring the coldest air circulation at all times. You can order this splendid refrigerator lined with galvanized iron or elegant white enamel lining.

White Porcelain LINED "MANHATTAN" REFRIGERATORS

IF YOU WANT SATISFACTION In a refrigerator you should select one from this page. In the building of our refrigerators many things have been considered in order to make them faultless in construction and appearance, and perfectly suited for your home and economical consuming of ice. There are many refrigerators on the market which present a handsome appearance, not too expensive in price, yet their construction is such that the quantity of ice required to keep the refrigerator at a desired degree of cold temperature amounts to two or three times the quantity required for our "Manhattan" Porcelain Lined Refrigerator of similar size and dimensions. Any refrigerator which requires an unnecessary quantity of ice will quickly create enough expense to make it a poor investment for the owner. Our "Manhattan" refrigerators produce a maximum of results at a minimum expense. Every housewife who has used our "Manhattan" refrigerator will admit it is more efficiently constructed, beautiful in appearance and is the most economical ice-user ever heard of.

IS WELL CONSTRUCTED. The cabinet is constructed of solid oak (smallest in a-sh), finished and polished to an expert standard, and fitted with solid brass knobs and hinges. The double walls are insulated with sea grass quilting and thin board shielding, one of the best insulations known. The ice chamber is lined with galvanized iron, having removable ice rack with a slotted pattern on another plate of the refrigerator section, removable drain pipe and safety trap; the wire mesh shelves are removable. An air-tight top lid fits and closed perfectly and is fitted with insulated galvanized interior extension panel.

SOLID OAK GENUINE PORCELAIN LINED. This refrigerator is constructed of solid oak in the two larger sizes and the smallest size is constructed of ash. In addition to the fact that it is one of the best refrigerators made, we sell it at a lower price than is often quoted by other concerns on refrigerators inferior to our "Manhattan." It is lined throughout with heavy porcelain with the exception of the ice chamber, which has an inner sheathing of galvanized sheet. Its scientific construction will save for the housewife a large portion of the ordinary ice bill.

SANITARY AND ODORLESS. This "Manhattan" white porcelain lined refrigerator is strictly sanitary and odorous, easily kept clean, pure, and fresh. Its solid white porcelaining, sanitary wire shelves, scientific cold air circulation make unlikelihood of an unnecessary amount of care is taken. Do not forget the sanitary wire shelves, which are perfectly clean and free from any odor. The solid white porcelain lined refrigerator is sanitary and odorless, making it the ideal choice for household use. It is absolutely guaranteed in every particular. Prices and sizes of the famous and most popular refrigerator are quoted below.

**WHITE PORCELAIN LINED, SOLID OAK REFRIGERATOR**

**OUR HIGHEST GRADE COMPARTMENT REFRIGERATOR**

PORCELAIN LINED. In our "Porcelain" Refrigerator we are offering dependable quality in the materials and making of this household necessary. The arrangement of the compartments is ideal. There's plenty of room provided for ice and provisions. Good value at prices quoted below. The provision chambers are lined with genuine porcelain for superior ice storage lining, from a sanitary point of view. Large compartment is equipped with nickel wire mesh, removable shelves; four shelves in the larger sizes and three shelves in the smaller sizes.

SCIENTIFICALLY BUILT. It has scientific heavy white porcelain lined walls with air-space and filling of sea grass quilting and straw board. The inferior cold-air circulation system which keeps the ice from melting rapidly and allows the provisions, makes this refrigerator much more popular in every way than the ordinary kind. These points are especially satisfactory to the housewife who has learned from experience that a refrigerator with ice rack and which can be readily cleaned is the most desirable. All odors cut off by the victims are absorbed by the cold air, which circulates throughout the provision chamber and are carried out through the waste pipe.

**THIS SOLID OAK BARGAIN WONDER** is very carefully constructed by men who are experienced in refrigerator making. The wood used is thoroughly seasoned and joined in a workmanlike manner, smoothly sanded and glass polished. The walls are extra thick, air and sea grass quilting insulated, the massive double thick doors fit perfectly at right and have solid oak stiles plated patented automatic catch and lock. Prices, sizes, etc., are quoted below.

**WILL CUT YOUR ICE BILLS** without the least effort, as the cold air, after passing over the ice, falls directly into the provision chamber, displacing the warmer and lighter air and forcing it up the sides as either end into the ice chamber, where by coming in contact with the ice, it is ruffled, cooled, and again falls, thus keeping up a constant circulation. This principle makes a wonderful economy in ice and insures absolute satisfaction in the preserving of foods.

**VITAL FACTS ABOUT "REGENCY" STOVES**

**SECTIONAL TOP OF RANGE.**
A vital feature of the Regency range is the sectional design. The range is divided into sections, each with its own burners, providing flexibility and convenience in cooking.

**REDUCING LIDS, COVERS, CENTERS.**
Some of the burners have reducing lids that reduce the flame, making it easier to cook delicate dishes. Covers and centers are also available to protect the burners when not in use.

**Oven Measurings Are Given On Each Page.**
The dimensions of the oven are provided on every page, allowing users to plan their meals and dishes accordingly.

**LARGE AND ROOMY OVEN.**
The oven is large and spacious, accommodating a variety of dishes and allowing for multitasking in the kitchen.

**REMOVING RANGE FROM THE RANGE.**
The ranges can be removed from the base for easy cleaning and maintenance.

**OVEN THERMOMETER.**
A built-in thermometer ensures precise temperature control, ensuring that the food is cooked to perfection.

**TOASTING OR BROILING.**
This feature allows for quick and efficient toasting or broiling of breads, meats, and vegetables.

If You Wish a Stove to Serve the Double Purpose of Heating and Baking Order a Cast Iron Range or Cook Stove.
LARGE REMOVABLE FIRE POT
Our base burner fire pots are large, both at the top and bottom. They are extra heavy and strong and can be very easily removed by unlatching the strip across the front. All that is then necessary is to slide them out. To determine the size of the fire pot, measure full across the top from the outside to outside. These fire pots are of heavy cast iron.

"REGENCY" STOVE FOUNDRY "B."
The illustration above shows the plant where the famous "Regent" heaters are produced. Oak stoves, base burners and hot blast heaters are manufactured in this foundry by the most capable men in the stove industry.

We Recommend Base Burners of Capacities Listed under This Cut for Number of Rooms Indicated.

This Cut Depicts Both Hot and Cold Air Flue Construction of Base Burners, Showing the Way that the Air Travels in the Course of Heating.

HEAVY CORRUGATED BOWLS
This type is used on all styles of "Regent" oaks and hot blasts. It is a well proportioned fire pot. Notice the shape and groove. In ordering, be sure that you purchase a heater with fire pot large enough for your requirements. To obtain the correct measurements always take the measure from the outside to outside of the fire pot.

LARGE SELF-FEEDING MAGAZINE WITH AUTOMATIC MAGAZINE COVER A GREAT DEVICE

The grate has shaking ring as illustrated which clears outer portion of fire pot from clinkers and ashes, turning them into ash pan below. The result is a live fire, free from both clinkers and ashes.

AIR TIGHT SWEDGE JOINT
This construction found on better oak stoves.

YOU WILL OBSERVE the swedge joint illustrated to the left. Note how the steel drum is turned and clamped down by our famous swedge body construction. This forms an air tight joint. There are no fire pot bolts exposed to the direct fire, and consequently no burning off of rivets.

HOT BLAST TUBE
Saves 60% of Heat. Used on "Regent" Hot Blasts. ALL OF OUR "Regent" hot blast heating systems have been designed with the air from the top, forcing the fire and heat downward. By so doing there is actually a saving of about 69 per cent of the heat that ordinarily goes out the chimney. Another economical advantage is that any kind of fuel can be used without blinding the efficiency of the heater. The heat is intensified and the gases and smoke are entirely consumed.
A REMARKABLE STOVE FOR THE MONEY. WILL BURN COAL OR WOOD

Our “Superb” Regent Cook Stove, which we are offering at the wonderfully low price quoted, is a modern, up-to-date stove, from which you will get the utmost satisfaction. It is well made in the way “Regent” productions are all known to be turned out, with a very heavy cast bottom, firmly locked joints and well finished edges. The bottom is made for strength and durability, and is mounted on high legs for sanitation, making sweeping under stove very handy and easy. This construction makes it possible for the stove legs to carry many times the weight of the body and still remain very firm and rigid.

GREAT CARE IS GIVEN in the making of our stoves, to the man-

ufactured, and are a splendid value which each and every part is

made. Exceptional care is always given to castings, and the fitting of

the stove, as well as finish and ornamentation. No customer of ours ever

received a stove that has not passed a careful and rigid inspection.

Before any shipment leaves our plant, it must be found absolutely perfect

in every detail. With this great care and our broad, strong, legal guar-

antee as protection, you are sure to be well pleased in every way.

WE WANT YOU TO KNOW that we consider this a splendid value. It

is strictly a "HARTMAN" Bargain, and your experience in buying stoves at home will show you that such a

well made, large handsome Cook Stoves with so many features as are em-

ployed in the manufacturing of our "Superb" Re-ent are not usual in cook

stoves at these prices. And, don't lose sight of the fact that this stove can

be had on approval, and it must give complete satisfaction or you may send

it back.

THE DETAILS of this stove have received every con-

sideration at the factory. The most valu-

able points are as follows:

The handy pocke- feed door as shown on end of

stove, well proportioned oval

firebox, with very heavy castings; sliding and swing-

ing grate works exceptionally well with either wood or coal. Observe

the outside oven shelf, top shelf, kicke, heavy covers and centers; cut

in cooking centers and center rest, in fact, you will find every

essential necessary to make a first class stove. Pouch feed permits easy

work, to stove without removing cooking utensils on top. Oven

door opener is operated by a

slight pressure of the foot.

CASTINGS of our "Superb" Regent

cook stoves are handsomely brought out in an

ornamental recope pattern very much prefer-

red by our customers. The design, which is

very pleasing, adds grace and beauty to this

model and is held in strict accordance with the

balance of the stove. It is very neat in appear-

ance, serviceable and easily cleaned, and stoves

usually selling at our low prices quoted below seldom

have such rich designing. This model shows clearly our

ability to offer wondrous values.

BURNS COAL OR WOOD. Flat grates for

well building wood or coal are furnished with all sizes of our "Superb"

Regent. Fuel may be supplied by either the pouch

feed or swinging feed door. When ordering your

stove be sure to order a size plenty large enough

to fill your needs, as a small stove is more expen-

tive to maintain than a large size in propor-

tion to the results obtained.

YOU CAN ORDER A RESERVOIR as shown in il-

ustration, fitted to the largest size only. Reservoir

is made with heavy cast iron

with white porcelain lining. When stove is not

equipped with reservoir a large extension end shelf, as shown in lower illustration, is fitted. Bear in

mind when ordering, that the two smaller sizes of our "Superb"

are furnished with reservoir.

A Great Achievement

IS “Improved Winner Regent”

THE IMPROVED WINNER is not constructed to take either a water front or water coil, but should you desire to heat with water, you can secure this cook stove with reservoir and flue. It is not the larger sizes, a reservoir not being advisable for the smallest size. It has a Duplex grate in all sizes. Possesses single flue combustion, double flue construction for larger sizes. Its style is shown in the large illustration below, and being taken from an actual photograph of the stove itself, conveys its attractive lines and pleasing appearance. We particularly urge you to order a size that is sufficiently large to fulfill your requirements, as too small a stove is more expensive to maintain in proportion than a larger one. At the bottom of the page we show a schedule of sizes covering all important measurements. Look them over carefully.

AN ALL CAST IRON COOK STOVE WITH STRONG CAST OVEN

HEAVY JOINTED TOP. The “Improved Winner Regent” has a very heavy jointed top with good heavy centers and centers. It is supplied with removable hearth slide, large ash pan and strong, bright, French design, cast iron legs. When furnished without the reservoir, it is fitted with a neat end shelf, hearth door convenient for poking fire.

CONSTRUCTED throughout of best northern and southern pig iron. All castings are smooth and every particle of material is the best run of gray iron. The result of using very in the three larger sizes and double flue combustion for larger sizes. Its style is shown in the large illustration below, and being taken from an actual photograph of the stove itself, conveys its attractive lines and pleasing appearance. We particularly urge you to order a size that is sufficiently large to fulfill your requirements, as too small a size is more expensive to maintain in proportion than a larger one. At the bottom of the page we show a schedule of sizes covering all important measurements. Look them over carefully.

RETURN, FREE CONSTRUCTION

IS MADE to meet the demand for a fine and durable, low priced stove. It has many improved features that cannot be thoroughly appreciated until this number is placed in actual usage. The workmanship throughout is far better than you would expect in a stove at these prices. In fact it is of the kind of a stove that in every way you would be proud to have in your kitchen. Although the design plain it is strikingly handsome.

THE OVEN as explained above, is made of cast iron, which adds to its durability, rigidity and consequent lasting qualities. Possesses two doors, one on each side, and is fitted with even rack. The fine construction around the oven is such that it is exposed to even heat on all sides, making it practicable for baking and roasting.

THE FIRE BOX is made just right, being large and heavy. The heavy lining and thorough ventilation insures long life to the parts which are directly exposed to the fire. The porthole enables you to put coal into this stove without disturbing the utensils which are kept conveniently to hand.

Bailed Ash Pan Furnished Free

NICKELED PARTS. The nicked parts are on the oven door name plate and the Alaska handles used on the porthole, door, fire door and oven door. These and just enough brass to enhance the appearance of this cook stove. Is supplied with a “Kicker” for opening oven door with ease of use. In every way it is a typical Hartman value.

Oven Opens From Both Sides

Does Not Take Water From Or Water Coil

RESERVOIR is of the en- cased type, and can be secured with three larger sizes at the prices quoted below. The reservoir tank is porcelain lined, can be lifted out easily and can be set into a cast iron casing, fitted with black japanned top lids. In thoroughly rust proof, and has a fly damper to turn on or off the heat. With this stove reservoir is practically indistinguishable.

IMPORTANT. Although we use the “Improved Winner Regent” under No. S1K133, we wish you to bear in mind that we offer this size for one reason only—namely, that others do. It is not a practical size, as no stove having an oven as small as this will prove satisfactory. We urge you to order one of our larger sizes for the greatest measure of satisfaction.

WITH THE "Favorite" Regent Cook Stove

On this page we offer our celebrated "Favorite" Regent Cook Stove, which, when compared with stoves sold by others at similar prices, will prove our claims of splendid value-giving. This is itself gives you a convincing conception of the splendid buying and selling advantage of this concern.

SOME FEATURES of our "Favorite" Regent are: The heavily ground and fitted, which assures great strength and durability; useful flue lever for opening oven door, which is a great convenience; when one has her hands full of utensils and wishes to open the oven door, the operation consisting of a simple touch of the hand to a handy touch feed for supplying fuel while top of stove is occupied. The "Favorite" has a return flue construction that gives good results.

BURNS WOOD OR COAL. Flat grates are installed in our "Favorite" Regent Cook Stoves and will burn either coal or wood. Grates are exceptionally well made, being cast of durable materials. The firebox is of oval shape, thus doing away with all dead corners. Every little detail in the construction of these parts has been carefully watched, with the result that the finished product is a model in value-giving at our low price.

Does Not Take Water Coil or Front

OTHER POINTS of our "Favorite" Regent are the large hearth door, with a convenient slide shutter and embossing; correct draft at all times; and making possible a quick, hot fire: full sliding cast iron top ash-pit, which also serves as a very handy shelf, and heavy covers and centers.

This stove is roomy and is a perfect baker, with all mountings carefully ground and fitted, which assures great strength and durability. It is made of heavy cast iron, which has been burnished to perfection. The grate is heavy cast iron and is designed to function efficiently. The stove is equipped with a damper for easy control of heat. The oven is large and provides ample space for baking. The stove also includes a water reservoir, which helps maintain a consistent temperature and prevents the stove from overheating. The stoves are available in several sizes, allowing for customization based on the needs of the customer. The stoves are also designed to be easy to clean, with easy-to-access parts.
A Triumph in Cook Stoves

In the "Triumph" Regent, we offer a superior cook stove at true bargain prices. It is, in every way a typical Hartman value; because it gives to our patrons every possible benefit which our mammoth purchasing power could secure. In ordering it, be sure to select a size that will prove large enough for your requirements. It's to your advantage in the long run.

THESE POINTS make the "Triumph" a very desirable, practical cooking stove. It is equipped with improved Duplex grates, for burning either coal or wood. The swing tea shelf is very handy; and, being silver nickled, helps to brighten up the stove, as do the other nickel parts, shown in the illustration. You can order it either with or without the reservoir, as quoted at the bottom of this page. Has strong, double doors on the oven.

**FLUE PLAN**

of heat distribution is of highly efficient type. By the return flue construction the heat from the fire box reaches every part of the oven, giving an even, perfect circulation. Thus satisfactory baking results are assured the purchaser of the "Triumph."

**Oven Opens From Both Sides**

Bailed Ash Pan Furnished Free

**THE OVEN IS STRONG.** The reinforcing iron in the oven bottom adds strength and life to the stove. This oven is made of strong cast iron. It comes in the sizes quoted below. Be sure to give correct number, according to the size oven that you require. The 20-inch oven will comfortably accommodate four 8-inch pie plates.

**THE NICKELED PARTS** embrace the oven door shelf, foot lever or "kicker" for opening oven door, door panel, ash catch, tea pot stand, feed door handle and towel bar. These are all heavily plated with bright silver nickel. They set off this stove without being overlv lavish and "gaudy" in appearance. In fact, the nickel trimmings are so well distributed that the "Triumph" will prove to be an ornament in any home as well as an article of practical usefulness.

**THE IMPORTANCE of a stove can not be overestimated in the home.** That is why it is to your interest to consider this vital matter very carefully. If you order the "Triumph", you will obtain one of the very best cook stoves on the market for the money. We make this strong statement because we feel confident of its great merit.

BURNS WOOD, COKE, COBS — IN FACT ANYTHING COMBUSTIBLE

BURNS COAL, WOOD, COKE, COBS OR ANYTHING being equipped with our heavy substantial duplex grate. Another noticeable feature is the handy pouch feed. By using this pouch feed to supply fuel, it does not become necessary to remove articles that are on the top of the stove. This is a great help and saves many fingers and hands, which otherwise may become burnt in moving hot pots to supply fuel by top feed.

STEEL BASE. A strong steel base, supported by well-designed high legs, is supplied. It is well constructed of serviceable material, and is very easy to clean under. The front legs are beautifully nickelated and fit perfectly tight and rigid, thereby making the base capable of carrying twice the weight of the body. The base of a stove is one of the many important parts to be watched when constructing high grade models, and any of our stoves with a base will be found to be very secure and firm.

THE BODY is of blue polished steel, made with large cooking holes, heavy top covers and long and short centers. The 4-piece sectional top is substantial in construction and is well jointed. The hot air flues are of good size, from which satisfactory results can be obtained. All parts exposed to fire are lined with asbestos board, and this fact alone insures long life to the stove. The fire box is large, well made and arranged to give the greatest possible heat with minimum consumption of fuel. The front slide draft, opposite grate bars, is of great value in starting fires, as it gives the required draft to fire box. Cast iron feed pouch, end draft door and frame. Possesses efficient return flue construction.

THE RESERVOIR is one of the latest improved contact types. Either size can be supplied with reservoir when desired. In ordering state whether wanted with or without reservoir. On our “Prime” steel cooker the reservoir front is of east iron with neat etched design. The top fits flush to main top of stove, thereby adding greatly to space for pans, etc. The water tank is heavily galvanized and thoroughly sanitary. A lid cover is used on this reservoir which allows it to be easily cleaned and to give the utmost satisfaction.

THE TRIMMINGS are of nickel plate, being highly burnished, making a very strikingly handsome stove. The following parts are furnished nickelized: The front band, ash door, drop fire box door, oven door frame, oven door panel, oven door handle, as well as front legs. These parts are very carefully and well nickelized, so as not to tarnish, and are easily cleaned.

THE "QUICK BAKE" OVEN has an asbestos protection, insuring steady temperature, and acts as a preventive against burning out. It is equipped with an air valve, drop door with gravity handle and operated by a spring. The door, when lowered, can be used conveniently for a rest or shelf to set articles on, when taking them out, or placing them in oven. A rack is also furnished which makes it possible to raise or lower articles in oven, to get more or less heat. A good strong catch is provided to hold door fast. Oven is of re-inforced steel.

It is equipped with heavy duplex grate, which can be turned or bored either or coal, the change operation being easily accomplished from the outside. When grate is turned up and end linings removed, the firebox is prepared for wood fire. It has handy peep hole with slide draft damper. By using this peep hole you can supply fuel without removing any articles on the top of the stove. There is also another slide draft damper when starting a fire because of the direct draft it creates, and it also is helpful when poking the fire.

**NICKELED PARTS** are all high- ly polished and are effective ornamental. The silver lustre of these fine nickel trims, which assures satisfactory results. In order to avoid warping, the top is made very heavy. The parts that are exposed to fire, are lined with asbestos board and this feature, too, gives great length of duration to the life of the stove, everything is so built to insure its giving the greatest possible heat on a minimum consumption of fuel.

**A STRONG BASE.** Built of steel and supported by high, neatly designed, cast legs. Easy to keep floor under and around stove clean. Legs fit tight and make base firm. Great importance is attached to base of stove, for it base is built to be as high as possible, entire stove's stability is insured. Any of our stoves resting on bases are very rigid.

**SQUARE OVEN** is equipped with the usual spring balanced drop door, in which is fitted a center partition containing a glass section. Very convenient to see inside of oven. Latter has an asbestos lining, which prevents burning out and which insures even temperature. Is made of heavy gauge steel, reinforced with cast iron brace. Rack in oven is adjustable and can be raised or lowered to place articles so that they get more or less heat. Oven door has wood handle and strong catch.

**RESERVOIR** can be supplied for either size and is of galvanized iron, contact type. A contact reservoir is very desirable, for it is a fact that this style heats water with desirable results. The front panel is of cast iron and has neatly patterned design of casting. Top fits flush to main top of stove and has sinkable cover, which gives easy access to inside of reservoir for keeping it clean and sanitary. When a reservoir is ordered it gives additional space to top of stove for placing pots, pans, etc. When no reservoir is desired, stove comes equipped with shelf as shown in small illustration below. The "Fame" is not constructed to take either water front or wa- ter coil for heating water in a kitchen pressure boiler.

EFFICIENCY was the keynote in the construction of this range. This standard
required for the materials used in the manufacture of our stoves. We are
the only mass production, knowing that our patrons would desire a low price, we figured the "Economy Regent" range of this kind. Therefore the unusual bis
found in this model.

FEATURES. The duplex grate used is of the and will burn
coal or wood. Fire box is of a sufficient size to
the fire, but for the best results we urge you
of the larger sizes. Has steel free
construction. Reservoir can be supplied if desired. Has a
porcelain-lined hit-out tank of 14-quarts capacity.
Large double pressure boiler instead of reservoir coil, $2.50.

ECONOMY REGENT

NO BOther removing utensils
from the stove in order to place fuel in the "Economy Regent." The pouch feed does away with
this annoyance. The top on each size has six 1-inch holes. This top is con-
structed in sections, firmly bolted together, thus reducing the possibility of
breakage through expansion of heat and consequent contraction. We furnish
shaker, litter and bailed ash pan free with the purchase of this range. Order
this stove for complete satisfaction in
every way.

NICKEL TRIMMINGS are brilliant
of lasting quality. They are liberally distributed throughout, giving
this model an attractive appearance. They embrace the following: Warming closet
bars, ends and name plate, brackets, tea pot shelves, towel rod, oven door
name plate, oven shelf, hearth band, and door handles as shown. Large slide
draft damper makes starting of fire
a "snap" and also is handy for regulating
 drafts. Draft register in pipe enables you
to check heat around the oven.

THE OVEN is a
piece of beauty,
strong, and priced
at $25.95. The base is constructed of heavy cast iron set in
high cast iron legs, as trated. This sanitary
condition should appeal to you, as you can place your dish or pan on it with ease.

End plates are heavy and the legs are heavy and carry more than
weight of this range.

You are advised to order a stove
THAT IS LARGE ENOUGH FOR YOUR REQUIREMENTS.

The "Daisy" Regent Cast Range
A Bargain For The Money

$22.65

Quick Cooker and Baker

The body is made throughout of heavy, smooth, Southern yellow cast iron, carefully cast together and brazed in such a manner as to make the range almost impervious. It is mounted on a massive cast iron high back, giving positive sliding heart.

The fire box of this range has been worked out by designers of long experience. The height, width, and depth have been made exactly right for the most rapid baking possible with economical use of fuel. Particularly note should be made of the insulated linings, which are made extra heavy and will last many years. Furnished with finished lid.

The Grates. Our "Daisy" Regent is fitted with celebrated Duplex grates. The grate is made of a very substantial, perfect working grate. It is made of heavy, non-conducting materials. With Duplex grate coal or wood may be used.

Nickel Trimings. This "Daisy" Regent is fitted with Duplex grate, cast iron trimings. It is made of a very substantial, perfect working grate. It is made of heavy, non-conducting materials. With Duplex grate coal or wood may be used.

Quick Baking Oven. Guaranteed to give the utmost satisfaction for speed and accurate baking and roasting. The large oven is the most important of the fine features of our "Daisy" Regent range. It has large back flue and the flue plan of best distribution insures perfect baking results, regardless of what fuel is used. The oven door swings out with an instant action, providing a large surface for baking, making it possible to place large quantities of food in the oven easily.

The Thermometer. We furnish our "Daisy" Regent with a thoroughly reliable oven thermometer. It is an accurate heat indicator, a great convenience and a recognized feature in all good ranges.

To get Hot Water from a Pressure Boiler. This range has a pressure boiler, which can be easily put into the fire box by removing the back end and front front flues. The price of this water cell is $2.50.
THE IMPROVED "GEM" REGENT

ON A BASE of steel, securely and well fitted to high cast legs, this range is raised to the proper height to harmonize with its well-proportioned lines. There is a sanitary feature to this construction also, as the high legs enable you to clean under stove with ease. The base is extremely durable, being constructed to hold a far greater weight than that of the body. The essentials of a good appearing, smooth finished range have been carried out in the base as well as the body of this stove.

A Cast Iron Range With Steel High Closet

6-HOLE TOP of this Improved "Gem" Regent is made in sections firmly bolted together. By this system of construction, breakage caused by expansion of heat, is reduced to a minimum. A large pouch feed for outdoor fuel without removing utensile (which may be in use on the cooking holes), is located on the end of this range and is always welcome for the easy manner it affords to supply fuel. You can order this range with or without high closet and with or without reservoir at bargain prices quoted.

Fitted With Thermometer In Oven Door.

A WATER COIL may be furnished at $2.50 extra if you desire to heat water in a kitchen pressure boiler. See page of stove sizes, etc. Plenty hot water, however, is always ready if ordered with cast iron or steel reservoir. Outer casing is of durable cast iron, while removable inner tank is porcelain.

NICKEL TRIMMINGS

include the following: Fire door and handle, screw draft, ash door handle, top band, oven door handle corners, high closet brackets, tea shelves, warming closet door, panel and handle, warming closet bands and ends. These trimmings are of well burnished nickel and add greatly to the beauty of the Improved "Gem" Regent.

Can Be Ordered With Or Without High Closet Or Reservoir.

Duplex Grate

Burns Coal or Wood.

STEEL OVEN made of gauge sheet steel. The drop spring balance oven door is very useful when lowered, serving as a large shelf. An accurate thermometer is fitted in oven door. Oven is fully protected from direct heat of fire, eliminating the possibility of its burning out. Bottom is of one piece braced construction.

DUPLEX GRATE with which the fire box is fitted, burns either coal or wood. Fire box is large and oblong in shape and given necessary draft through the sliding side draft which is directly opposite grate bars. Fire construction. Accessories include shaker, lifter, ash pan and thermometer.

MASSIVE STEEL BASE is substantially constructed, being fitted to high legs and made to carry extreme weight. In buying a range, it is not alone the most important feature to determine how the stove looks, for most stoves look alike in pictures. What will the result be? How will it cook, bake and roast? Whom are we buying it from? These are all equally important factors to be observed. We don't want you to take any risk at all. Let us take the risk and then you can find out about the other things. This is one of the things that we are always trying to do. We are always trying to do what you want us to do. We are always trying to do it correct. We are always trying to do it right. We are always trying to do it well. We are always trying to do it better.

THE NICKELED PARTS are all highly burnished and plated with fine grade silver nickel. They are liberally distributed and give it just as fine a "flash" as more expensive stoves. The nickeled parts include: the front strip and front door, oven door frame and panel, ash pit door, fire door, towel bar, ornament on reservoir, tea pot shelf, high closet brackets, warming closet name plate, bands and ends.

Roomy steel high closet is made of fine polished steel, and the roll front is accurately balanced, opening and closing very easily. It has neatly designed top and side rails. This range has a cast front, made of soft iron, to prevent burning of porcelain finish. It would not be possible to make this range a model of perfection in every respect, but it will give the desired service, appearance and ease of use and will make this type more popular than ever before.

Reservoir can be supplied for any amount desired, as desired, and is the type. Dumping burns heat up or use. Reservoir has a cast front, made of soft iron, to prevent burning of porcelain finish. It would not be possible to make this range a model of perfection in every respect, but it will give the desired service, appearance and ease of use and will make this type more popular than ever before.

The Long Fire Box is a very desirable feature of our Improved "Special". This range is made in three different sizes; and in all of these sizes the fire box is of liberal and generous proportions. A good sized fire box is essential for a roaring with this range, because it is necessary to take either a water coil or water for the purpose of heating water in a kitchen, and heavy boiler.

Burns Coal or Wood. Our Improved "Special" Range is fitted with a large fire box equipped with the latest improved Duplex grate for burning coal or wood, a feature not known for special comment. A large pool of water is provided for putting the coal, and a very heavy type of stove is covered with enamels. Large steel draft gives free access to the grate; it is necessary for putting or loading the

Regent Range As Illustrated

Has A Polished Blue Steel Body. Comes Complete with High Closet

See Page One for Terms

Is Fitted With Improved Duplex Grates

THE SQUARE OVEN is of reinforced steel, well braced, and receives a high grade fire box. It is so constructed that it cannot be damaged by bucking or backing. The bottom is strengthened by heavy cast iron strips. All wire work is of quarts and allows baking on top as well as bottom, and is removable. The oven door is of the casting balanced, drop type and is supplied with divided glass panel. The tempered molded glass front door is not affected by heat and steam. The window handles on door is a safeguard against burnt fingers and hands.

LARGE STEEL HIGH CLOSET is made of fine blue polished steel, and the mill finish saves and shows very easily. There is a handy check damper in the pipe and a convenient, easily adjusted 3x3 pot stand on either side. This high closet does much to make this range a model of perfection, for it gives in the desired attractive appearance, and yet does not make it look clumsy or too heavy.

LONG FIREBOX is an improvement feature in this Improved Quality. Referring to the table shown below you can see the dimensions of the fire box in the various sizes in which the Improved "Quality" Regent is made. The importance of a liberal sized fire box is appreciated by competent stave judges, but it is not wise to impress you with this fact so that you will not overlook this feature in the range described hereafter. Sheet steel construction is the type used in building the Improved "Quality" Regent and is recommended for genuine satisfaction.

WILL BURN COAL OR WOOD being fitted with a Duplex grate. The change can be made from coal to wood by simply turning half-way with the shaker. Taking out the front and lower arms gives you more space to place large pieces of wood. A large punch feed is provided for putting in the coal and is very handy when top of stove is covered with utensils. Large side draft gives free access to the grate and is convenient for poker and lighting. A large feel door is also supplied. Handle placed top.

THE RESERVOIR can be supplied, if desired, and is of the latest improved type. The fine arrangement can be checked or opened by the use of a shaker and when opened, quickly heats a good quantity of water. The reservoir is cast of high grade gray iron and is fitted with a cast porcelain liner inner tank. If you desire your range to heat water in a Kitchen or other boiler, ORDER A WATER FRONT. Price $2.75. See full information on page of ideas, attachments, etc.

NICKELED PARTS are all highly polished and plated with our fine grade silver nickel. They are liberally distributed, adding greatly to the attractiveness of our Improved "Quality" Regent, and give it just as fine an appearance as any high priced range. The cast oven door frame, front face door, front ash door and turn screw, damper, glass out door, towel rod, nickel gas plates, and handles are all nickeled parts. Hands on high closet nickeled; corners nickeled; hand grips and other parts of the high closet. Steamer and like included.

CONSTRUCTION Every little detail in the construction of this range has been given close attention with the result that an excellent range has been produced. Body made of heavy gauge blue steel, which does not require bricking. All flues are of ample size so as to heat all parts of the range quickly. They are so constructed as to give an even heat all around the oven, and by a flue reservoir, water may be heated in a very short time. Range is mounted on a durable cast iron base.

ASBESTOS LINING This steel range contains many desirable features which insure long life to the range and complete satisfaction in operation. It has a practical asbestos lining, which protects the oven and gives an even temperature therein. This asbestos lining is a very important feature and should be given due consideration.

THE OVEN of this range is made of reinforced steel. It is well braced to prevent buckling. It is square in shape so that every inch may be utilized. The oven door drops forward and forms a large oven shelf. This door is operated by a long spiral spring encased in a cast iron covering at the lower right hand corner of the oven door.

FIRE BOX is of ample size and has a leak-proof wall. This back wall is well ventilated, which insures long wear. This range has sheet flue construction.

OTHER FEATURES Other prominent features which go to make up the superiority of this range consist of the following: A pouch feed, which enables the user to supply fuel to the fire without removing anything placed on the top. The grate is of the duplex pattern for burning either coal or wood. The sectional top with heavy covers and center are of extra strength and made with allowance for expansion and contraction. There is a poker door and draft in the end immediately under the pouch feed.

NICKEL TRIMMINGS The nickel plated parts on this steel range consist of the following: fire door, ash-pan door, oven door frame, oven door panel, oven door handle and towel bar. High closet has nickel brackets, top pot shelves, panel on high closet door, as well as bands and ends.

HIGH CLOSET & RESERVOIR This high closet is made of heavy cold rolled steel and is large and roomy. The reservoir is of heavy cast iron with extra durable removable tank with white enamelled lining, which is sanitary. Flask damper enables you to turn heat on or off.

Has pouch feed. Burns coal or wood.

Stove is made with anchor plate construction on top. Top cut in three pieces which are interchangeable. Large fire box. Body lined with asbestos.

Handsome "Purity" Regent

Extreme Height 54½ Inches. Has Copper-Bearing, Anti-Rust Steel Body.

White Enamel Splasher Back
And Nickel Trimmed

White Enamel Oven Door

THE FEATURES of the "Purity" Regent embrace a white enamel splasher on the high chest, a white enameled oven door with nickel trim, panel, which is set in a dependable copper base. The elaborate nickel trimmer likewise confers the attention of the prospective purchaser. This all-enveloping coat raises the oven door to the proper height and makes cleaning easier. The body is made of anti-rust, copper-bearing steel, which is better and more lasting than that usually employed.

THE OVEN is large in size and square in shape and by the modern sheet construction, is entirely heated to every portion, thereby insuring oven baking results. The thermometers in the oven door will be found to be of great aid in economizing in the use of fuel and, furthermore, is a help to gauge your fire and consequently baking results. The spring balanced drop oven door, when lowered, serves as a convenient shelf.

FIRE BOX is oval in shape, long in size and well ventilated, assuring economy of fuel. It is fitted with three-piece fire back, pressed, improved Duplex grates, for burning coal, wood or anything combustible. We refer you to introductory page 7 for details concerning the construction and operation of the Duplex grates. This oven comes in sizes and in your choice of four styles. When ordered with high chest, it is fitted with ten shelf. When ordered without reservoir is fitted with seven shelf.

NICKEL TRIMMINGS embrace the following: Back guard corners, warming closet hands, end, panel and handle, high chest, oven door frame, panel and handle and hinges, clean-out door and panel on reservoir check. Particularly observe the pleasing design upon the fire, ash and oven doors, all of which harmonize perfectly. We suggest your selecting the larger size as a larger stove is less expensive to maintain in proportion than a small one. Whichever one you select, however, we assure you that you will receive an excellent value for your money.

"EMPIRE" REGENT RANGE

A SPLENDID STEEL RANGE

THE ADVANTAGES of this steel range are that it is not only an efficient, high grade stove, but is very attractive in appearance as well. A distinctive feature of the high chest will be noted in the full length shelf, shown in the illustration. Has a double door, the lower one being used for warming purposes only, and in addition a high warming closet, which is a great convenience for keeping prepared dishes nice and warm, when occasion requires it. The detailed description of the range is given in the following paragraphs:

BAKING OVEN is well braced and generously equipped with warming pockets. Wire oven rack in supplied which enables you to bake on the top as well as on the bottom. Oven door is of the spring balanced, open type and when lowered in position as to the side, just below the oven is a small cut-out door. Below this you will find a handy warming oven which can be used for drying pans, pots and for storing bread, etc. The body is constructed of polished blue steel.

FIRE BOX is of a good size, as shown in the table of measurements below. This is a feature of the "Empire" Regent, as a good sized fire box means greater efficiency in combustion and therefore greater satisfaction. Extra fuel because it keeps the fire temperature constant and distributes heat evenly. Pitted with strong linings, sheet iron construction. Has the latest improved, duplex grate for burning coal or wood. Large ash pit provided for cleaning in evens, also a great convenience when top is covered with Windsor. Large slide draft gives free access to grate and enables you to poke or sift the fire.

End Shelf Is Supplied When Ordered Without Reservoir

Removable Porcelain Lined 12 Qt. Reservoir Tank

RESERVOIR is of the latest type and can be supplied for either side at price quoted below. When ordered with cut reservoir, range is fitted with top and shelf. The reservoir is of 12 quart capacity, and of the latest type with built-in porcelain pan. Steel lined. May be ordered with or without a retaining frame. Steel frame. May be ordered with or without a retaining frame.

NICKELED PARTS are supplied for getting in evens, also a "Handy" elevated rear panel.

THE MEASUREMENTS of the "Empire Regent" steel range are shown in the schedule below. Look these over carefully for a more thorough understanding of this fine stove. Has cast iron ash pit door and frame below, as well as cast iron door frame.

“WONDER” REGENT RANGE

A Splendid Steel Range With Cast Iron Base At

PLenty of Hot Water can be secured from a large porcelain lined lift-out reservoir. The reservoir has a 1½ quart capacity and is of improved flue type, which provides a means for quick heating. The damper turns heat on or off. This Range is furnished with or without reservoir.

The Steel Constructed Oven is full size and square, and is an unexcelled baker. It is constructed of heavy reinforced sheet steel, and is fitted with special expansion and contraction strips, the danger of oven plates cracking being practically eliminated. The oven is fitted with tempered molded glass panels and thermometer in a nickel plated door. We are fitting oven door with nickel plated handle as shown in this Illustration.

The Fire Box is extra large and is adapted to any kind of fuel. It is supplied with an improved duplex grate, which can be used for either coal or wood. When the grate is turned up and end linings are removed, the fire box is perfectly adapted for burning wood. Sheet flue construction.

Nickel Trimming. The bright parts of range are nicklefied fire, ash pit door, flue door, oven door, oven panel, large towel bar, front legs and front base strip. High closet has nickel teapot shelves, nickel brackets, bands and corners and panel on high closet door, as well as parts shown in illustration.

Bailed Ash Pan Furnished Free

Burns 22-inch Wood

Compare this fine high grade Range with those offered by others at similar prices and you will be immediately convinced that this is positively one of the most exceptional in a high grade Range that has ever been placed on the market for the money.

The Blue Polished Steel Warming Closet extends full length of the range body and has large capacity. This equipment has become an almost indispensable attachment to a range. It has a roll front door which rolls back out of the way, permitting the interior of closet to be exposed.

The Castings of the base of our “Wonder” Regent Range are made of extra heavy pure pig iron, most carefully ground and fitted together. Extraordinary care is given to this work, being put together with the new lock edge and when once strongly bolted will not weaken or loosen. The body is built of polished steel, being perfectly plain and easily cleaned, and on account of its heavy construction is a great retainer of heat.

The Swedge Joint Securely Holds Sheet Steel Body to Fire Pot

**HOT BLAST FEATURE** is a heating device that deserves your consideration. It not only saves fuel but in addition produces intense heat. The air is admitted through the tube, passing in and entirely around the body of the stove. It becomes overheated, mixing with the gases arising, becomes ignited and makes perfect combustion. In this operation the smoke is burned, thereby utilizing all of the heat which passes up out of the chimney in ordinary oak heating stoves.

**THE SWEDGE JOINT** is another noteworthy feature. Body possesses cup-shape flange which is fitted into a recessed cup on top of fire pot and is held in position by a deflector ring, thus securing fastening sheet steel body to fire pot with out exposing bolts to fire, which are likely to burn off. When such burning occurs, body will "buckle," lose its shape and admit air around top of fire pot. With the swedge joint such buckling will not occur.

**SCREW DRAFT** register gives perfect control of fire. In addition, there are two draft dampers in ash pit door, as shown in the large illustration to the left. Combination of these enables you to regulate the heat in an excellent and satisfactory manner. The "Hartman" Regent Hot Blast will hold its fire and keep even temperature for a long period of time.

**THE CASTINGS** used are the very finest for the purpose, are put together with smoothest joints and carefully fitted, so as to make this heater practically air tight. Taking all points into consideration you will find this one of the best values ever offered in a hot blast heating stove. Below we give the nickel parts which embellish the "Hartman Regent Hot Blast.

**NICKEL TRIMMINGS** are the very finest of the best quality silver nickel and are elegantly burnished. They consist of the following parts:—

- Swing top, large reflector name plate above the front door. Colonial columns, screw draft register, foot rails, front base strip and front legs, as well as draft dampers in the ash pit door; nickel or bronze urn. Large foot rail has neat Grecian border design.

**THE FIRE POT** is very strong. Is heavily ribbed cast iron specially treated, and guaranteed to withstand greatest degree of heat without injury. It is very spacious and increases the efficiency of the stove. Heavy cast door front with mica windows and polished blue steel body are other features of this Hot Blast. Is mounted on heavy cast iron base, as illustrated, Draw center shaker grate for coal or wood.

**SHAKER DOOR** enables you to shake the grate without opening the ash pit door, thereby preventing dust and ashes from circulating around room. Legs hold it correct distance from floor to allow proper and designed radiation of heat. The proportions throughout are such as to harmonize with the scientific construction, to produce the greatest volume of steady heat from the use of the smallest amount of fuel.

A New, Up-to-date Heating Stove at a Real Bargain Price
THE "LOYAL" REGENT HEATER

A Low-Priced Oak Stove Burns Soft Coal or Wood

THE QUESTION of price is one that makes it appeal to the majority of people. But price alone is not the measure of quality, as is undoubtedly true of bread without butter. And that is why, when we offer you a stove at a price as low as those quoted on the "Loyal" Regent that you have a right to ask whether it is of a type that will render service and satisfaction. We do not claim that the "Loyal" Regent heater will render the same service that our higher priced stoves will give, but for the money we recommend it very highly. It is worth every penny that we ask.

THE CONSTRUCTION is of dependable quality. The joints are well fitted in a workmanlike manner. The bolts and fittings are all in place, and the casting is made to set in position without wasting time, as is the case with many other stoves. The stoves throughout is good grade, as you will appreciate by the fact that our guarantee of satisfaction goes with this stove. If it pleases you, make your purchases an outlined on Page 1. If not satisfied, return it at our expense and we will refund all money the transaction has cost you.

SCREW DRAFT DAMPERS make it possible for you to regulate the heat. The smaller sizes have but one screw draft damper in the ash pit door, the larger sizes being constructed with two. There is also a check screw draft damper in the feed door, as illustrated. The shaker door with which the "Loyal" Regent heater is furnished enables you to shake the grate without opening the ash pit door, thereby preventing dust and ashes from circulating around the room. The ash pit is of good size, as is made in one piece with heavy cast iron bottom and large balled ash pan.

THE NICKELED PARTS add to the appearance of this heater, all nicely polished and consist of the following parts: The top ring, damper plate, feed door, damper, feed door handle, foot rails and ash pit. The nickel parts are shown in the illustration to the left. The body of the stove is made of heavy gauge, cold rolled, blue polished, sheet steel, firmly and securely fitted into the cast parts. The fire box is corrugated, increasing the heat radiation of the "Loyal" Regent. Possesses a good sized door to add to the ease with which fuel can be supplied to this heater.

THE GRATE is of flat style with removable center. This type is known as a non-clinker draw center grate. A good grade of pig iron is employed in the construction of the "Loyal" Regent, the castings are smoothly made, as you will agree after an examination of this heater in your home. The illustration was made from a photograph of the pattern and will give you a good idea of its neat appearance. Its service giving quality, however, can only be determined by actual test and that is why we ask you to send for the "Loyal" Regent upon approval. Our reputation of over 50 years stands back of the Hartman guarantee.

THE MONEY QUESTION. Money isn't everything in this world, but it is generally accepted medium of exchange and we must possess it in order to get along. This being the case the wise man uses it judiciously. He spends as little at a time as he consistently can and therefore buys his requirements on credit. You are in a position to lend us an assistance to that man by offering us a liberal credit plan. If you are in a search of a moderately priced heater and you do not care to pay for it all at one time, we strongly urge you to consider the merits of the "National Regent," and described hereafter. It is especially noteworthy. The body possesses a cup-shaped fire pot which is fitted into a recessed cup on top of the fire and is held in position by the deflector ring. Thereby securely fastening the sheet steel body to the pot. In this way, the bolts are not exposed to the fire, thereby protecting them against burning. When such burning occurs, the body will buckle and lose shape and admit air around the top of the fire pot. Such buckling cannot occur with a swedge joint. This is a vital point that is especially desirable.

THE NICKELED PARTS. The "National Regent," with which the "National Regent," is nickel-screw damper in brilliancy and enhances its neat appearance. These nickel parts consist of the following: Swing cover, top ring, name plate, decorative side wings, screw draft check damper, foot rails and draft damper in the ash pit door. The ash pit door is also of extra size and is made in one piece with heavy cast iron bottom and large handle as shown in the illustration. The castings are smoothly made, are well fitted and cast of good grade of pig iron. Another point that is assured to the purchaser a stove that will render the kind of service that you may expect from a heater sold at these prices.

LENGTH OF SERVICE is assured to the purchaser of the "National Regent," a fact that adds to its service giving qualities. The hitch door is also of extra size and is made in one piece with heavy cast iron bottom and large handle as shown in the illustration. The castings are smoothly made, are well fitted and cast of good grade of pig iron. Another point that is assured to the purchaser a stove that will render the kind of service that you may expect from a heater sold at these prices.

Convenient Shaker Door

Efficient In Results
It's false economy to buy a poor heater. Don't be fooled by a second-hand stove that will give you a mighty poor investment. Doctors' bills are far more expensive than the slight difference that you will pay for the best quality article and the price that some unreliable dealer or second-hand merchant will charge. In and around Chicago, most reputable dealers will not be misled by the reasonableness in price of this splendid "Acme" Oak Regent. You can have it in any size quoted; on credit, taking a whole year to pay your bill.

Workmanship and finish. There is nothing cheap about this heater except the price. All of the parts are fitted carefully in order to render them practically air tight. A generous number of bolts is used where necessary to secure permanency to the castings. Not a single casting is allowed to pass except by the most rigid and scrutinizing inspection. There is no special attention given to any one feature, but all joints receive the same careful, minute investigation. It is made in the latest Colonial design, a most artistic and beautiful looking stove. It is thoroughly practical and sanitary as well, for it possesses no dirt catching designs, so that it can be kept clean with the least possible effort.

Nickel parts. The parts mentioned above are all highly polished. They help to tone up the appearance of the heater and at the same time add considerably to its lasting quality. They are the foot rails, the beautifully designed swing cover, and the name plate over the door, as well as the screw drafts, as shown in the accompanying illustration. Nickel or bronze zinc. The body is made of heavy gauge cold rolled blue polished sheet steel, securely fitted into the cast parts, rendering all points air tight.

Fire pot. The fire pot is to a stove what the heart is to the body. It is the life of a heater—and upon its efficiency depends the desirability of the stove itself. The fire pot of the "Acme" Oak Regent is corrugated, to give the largest amount of radiation, and is made extra heavy for good hard service. This is a most important feature—and one that must be considered by every careful and scrutinizing buyer.

Feed Door. The size of the feed door deserves your consideration, because upon the size the radiation largely depends. The size with which the heater is supplied with fuel. The one possessed by the "Acme" is large, and is furnished with solid cast check screw damper. The ash pit is also of extra size, and is made in one piece with heavy cast iron bottom and large bailed ash pan.

Other features. Nickel screw draft in the feed door, and nickel screw draft in ash door. These enable you to regulate the heat. The two smaller sizes have one screw draft in ash pit door, while the larger sizes have two. The grate is of flat style with removable center and assist in a non-drafty draw center grate. The castings are smoothly made, well fitted and nothing but first-class pig iron is used. You will find no inferior material in the castings of the "Acme" Oak. It is upon solid, substantial cast legs and cast base strips.
"Royal" Oak Regent
Fine Heating Stove

A Bargain At Our Very Low Prices

A STOVE THAT POSSESSES THE FEATURES REQUIRED TO PRODUCE FUEL ECONOMY AND MAXIMUM HEAT

HEATING STOVES sold by some at even higher prices will not give you as better heat or general satisfaction as this low priced "Royal" Regent. It is practically air-tight and can be regulated by the smallest amount of registers so that an extremely hot, medium, or slow fire can be maintained in every detail of construction.

THE GREAT POPULARITY of this "Royal" heater has been earned by its own merit, and with its new improvements, we feel safe in asserting that it is much better than any other of its kind at the price.

HEAVY CAST PARTS including the handsome front and base, are made of fine grade grey iron castings, contributing to the make-up of a heater that comes up to a high standard in every detail of construction.

FIRE POT is especially designed and gives to this heater an exceptional capacity. It radiates the heat much more quickly than the old style fire pots used by many other manufacturers, and is guaranteed to hold a good bed of fire and to prevent waste of heat.

THE LEGS hold it at the correct distance from the floor to allow just the proper radiation of heat, and the proportions throughout are regulated in harmony with the scientific construction so as to produce the greatest volume of steady heat from the use of the smallest amount of fuel.

DETAILED DESCRIPTION. The Body is made of cold-rolled steel and has swaged joints. It is securely fastened to top and base in accordance with the latest and best methods and is practically air-tight. The Top is surrounded by beautiful urn, as the picture shows. The "Royal" is equipped with a draw center grate with shaking ring. Best results can be obtained by using soft coal.

THE "ROYAL" REGENT is a better heater, and is made of better materials than the ordinary oak stove. It possesses exclusive new improvements, which ensure a more economical use of fuel. We feel certain that it will equal any oak stove offered by any other dealer or manufacturer at similar prices and know that it surpasses some.

NICKELED PARTS are: Top ring, swing cover, name plate, side wings, foot rails and screw draft registers. The nickel is extra heavy silver-nickel plate, which will wear longer than ordinary grades, a point that is universally appreciated.

Improved "Air-Tight" Regent Hot Blast Heater

A Fuel-Saving, Coal-Heating Stove

WITH A NEW STYLE FOOT RAIL. POSSESSES CAST IRON LINING ABOVE THE FIRE POT. AN ATTRACTIVE PATTERN.

OUR COLONIAL DESIGN "Air Tight" Regent Hot Blast is one of the most successful air tight hot blast heaters we have ever offered. It burns chestnut coal, soft coal, coal screenings, coke, wood, coals and other cheap fuels. It has a twofold hot blast principle which enables the owner to get the greatest possible amount of heat from almost any fuel. This stove is a perfect and rich appearing parlor heater. It is fitted with latest down draft hot blast tube suspended from the main top shown in sectional view below.

A BARGAIN. It is one of the best constructed and most thoroughly satisfactory heaters these prices could buy as you will agree if you make a comparison of this value and those offered by others. Considering materials, general finish, heating qualities and the price, it stands as a typical Hartman value.

THE BODY is made of smooth sheet steel, with cast iron bottom, which set on the base, while the base is made of fine Southern gray cast iron with bottom cast in one piece without joints.

IMPORTANT DETAILS. The grate is of draw center type, made of strong and durable steel, as shown in the illustration. The front is made of cast iron ash pit door is fitted with nickel plate screw draft register, enabling the user to regulate the heat and process of combustion. Fitted fuel can be done from the top, being fitted with large feed lid. The sheet steel body is protected above the fire pot by a cast iron lining which extends almost up to the top of the stove. A fire can be built at eight before retiring and will burn over night, making it only necessary to turn on the air the next morning to increase the heat.

THE NICKEL MOUNTINGS are extremely handsome. The cast base is fitted to high legs and fitted in a fancy design. The silver nickelded parts are heavily plated and consist of the following: Base, draft register, door handles, name plate, top ring, swing top, nickel or bronze urn—just enough to ornament this stove without undue embellishment.

PRINCIPLE OF OPERATION and the general construction of our "Air-tight" Regent hot blast is very effective. The hot blast drawn through the top of the stove, passing down the hot blast tube, and is discharged just above the fire in the very center of the products of combustion. Blown into a highly heated state, all the gases and carbons in the smoke are consumed by reason of the increase of oxygen at a high temperature. The screw draft and air-tight construction serve to make the stove as air tight as possible. This feature, and the great efficiency of this heater have made it one of the most popular of our heating stoves sold at moderate prices. It has been tried and tested. Having stood the test of time, we highly recommend it to you.

IT'S VERY EASY for you to possess one of these elegant hot blast heaters. We would like you to carefully read page 1 of this catalogue that you may fully understand our liberal, confidential credit terms. Ours is the most liberal and confidential credit system in the world. Select one of the larger sizes of this stove and take advantage of these beneficial terms.

A TWO-FOLD HOT BLAST HEATING STOVE BURNING COAL, WOOD OR COKE

In Economy It Will Pay for Itself
A HANDSOME NEW DESIGN

"HOME OAK" REGENT HEATER—NICKEL TRIMMED

THE SWEDGE JOINT

Securely Holds Sheet Steel Body to Fire Pot

THIS SWEDGE JOINT is a feature that you will do well to consider carefully. The body possesses a cup-shaped flange which is fitted into recessed cup on top of the fire pot and is held in position by the screw fitting, thus securely fastening the sheet steel body to the fire pot without exposing bolts to the fire, which are likely to burn off. When such burning takes place the body will "buckle" and lose its shape if admit air around the top of the fire pot. With the swedge joint such backing cannot occur.

FIRE POT is of special construction. It is heavily ribbed cast iron made of especially treated iron, guaranteed to withstand the greatest degree of heat without injury. It is plenty large and roomy and increases the efficiency of the stove. Note the heavy cast door front with nicely polished and the heavy polished steel body. The construction of the "Home Oak" Regent throughout is exceptional indeed, and is a stove which you need not hesitate to purchase. It is mounted on a heavy cast iron base which is not only substantial but very handsome in appearance. Draw center shaker grate for coal or wood.

IS CONSTRUCTED with feed door screw draft regulator, perfect control of the fire. In addition there are two draft dampers in the ash pit door of the larger sizes, while the two smaller sizes have only one screw draft in the ash pit door. The combination of these enables one to regulate the heat in an excellent and satisfactory manner. The "Home Oak" will hold its fire and keep an even temperature for a long period of time. It furthermore is economical in the consumption of fuel as well as being a heater that is low in its initial cost. These are vital points in the purchase of a stove; because the purchase price in "cheap stoves" sometimes means an expense in operation.

THE CASTINGS used in building the "Home Oak" Regent are of just the right sort for this purpose. They are put together with smooth joints and are carefully treated, so as to make it practically air-tight. Take a careful survey of this illustration, read the details as mentioned in our description and you can't help wanting this stove at our exceedingly low figures. It combines quality, efficiency, durability, appearance and price. All procurable on our easy payment liberal credit plan.

NICKELED TRIMMINGS on the "Home Oak" Regent are of a very good quality, silver nickel and are elegantly burnished. They consist of the following parts: Swivel top large reflector name plate above the front door, decorative flaring side wings, screw draft register, foot rails, base strips, and legs as well as draft damper in the ash pit door. Nickel or bronze urn. These trimmings are indeed lavish in their abundance and make this a beautiful heater. Large foot rail has neat Greek border design.

THE LEGS hold it at the correct distance from the floor to allow the proper and desired radiation of heat, and the proportions throughout are regulated in harmony with the scientific construction in order to produce the greatest volume of steady heat from the use of the smallest amount of fuel. The "Home Oak" Regent will burn any kind of fuel. The shaker door enables you to shake the grate without opening ash pit door; thereby preventing dust and ashes from circulating around the room.

A Satisfaction-Giving Heating Stove

THE “MAGIC” REGENT

HOT-BLAST

Observe the Attractive Nickel Trimmings

CHOICE OF FOUR SIZES. EVERY HOME CAN BE WELL FURNISHED

Our helpful credit plan is for YOU. If you would furnish your home by the "Magic" Stove at home, you'll simply say you never saw real bargains before you saw our "Magic"—so don't forget to compare after you have received it for trial. We want you to do this, for we think you'll become an enthusiastic customer of ours and recommend us to your friends.

OUR “MAGIC” REGENT is a magnificently designed Blast Stove. It is thoroughly well constructed of splendid materials. Every joint is perfectly fitted, insuring excellent results as an installment heater and best of service in thousands of American homes, and if you buy one it will surely satisfy you.

READ THE DETAILS: Bear every one of the good points in mind in deciding to order this stove. You have our promise and guarantee that it will come fully up to the description and please you more than you expect. Consider the price—then consider the long time credit terms we give you. Right now giving the transaction well in your mind, and—take our word—you'll say our Hot Blast Heater offer is a "magic" one indeed.

DESCRIPTION Every part of the heater herewith offered is made for good service. The top is of heavy casting and the body is made of heavy gauge sheet steel, joined to the massive base by a most workmanlike manner. The base is mounted on massive legs. The front for door is of a good size and fitted with mica panels to show plainly the extent of the fire with the same time throw a cheerful glow upon the room. The fire pot is of the improved type, with the outer form of a massive, extra heavy and generous in appearance. The ash pit door is supplied with an air scoop to complete the Hot Blast type. It is fitted with nickel-plated Reflector over the fire hole, being mounted on ornamental columns, convenient for coal, and artistically designed and solid nickel stove base.

THE HOT BLAST ARRANGEMENT is the redeeming feature of this grand heat stove. It is the improved style by which the heat is intensified and the gases and smoke a certainty disengaged. No other heater has the extension of the top of the fire chamber, to just above the fire bed, meeting a current of air admitted through the screw damper in the ash pit door causing advantageous combustion that is found only in Hot Blast Heaters. The same illustration below will give you the idea of how a fire operates in our "Magic" Regent.

THE NICKELED PARTS are made of splendid quality nickel on prepared cast metal, and are as follows: Base, screw draft in ash pit door, foot rails, side wings, reflector, small hopper, top ring and lever handles. Also has brass or nickel ornamental urn on top. The brilliancy of these nickel parts gives the “Magic” Regent a bright, flash appearance.

Just think of it, you can now have the heater on long time-easy-to-pay credit terms, and buy it on approval from the Big Hartman Concern. Don't fail to secure your "VICTOR-Ventilator."

NO RISK, FULLY GUARANTEED. We repeat again and again throughout this book that you have no risk whatever ordering from us, we do this to impress deeply in the minds of our customers the fact that we will not consider a positive sale until they are thoroughly convinced that they have saved money and received better quality and design than they could obtain elsewhere. We give our legally executed, binding guarantee that we will satisfy you in every way or refund your money.

YOUR MONEY BACK. No matter what you select, the goods will be sent you fully covered by our regular guarantee, and if you do not find them exactly as represented, you may return them to us and we will refund every cent that the transaction has cost you.

THE MATERIAL USED. While we quote an exceptionally low price on our "VICTOR" Ventilator Regent, we have not sacrificed quality to do so. Splendid quality gray pig iron castings, thoroughly fitted and cemented, have been used. Expert stove makers have produced a perfect heater in this article and one we unhesitatingly guarantee.

INTERIOR CONSTRUCTION. This Colonial designed square heating stove has a round steel interior body encased in an openwork outside iron casing. It has a heavy corrugated cast iron pot with draw center shaker grate. The circulation created in this construction gives the heater immense heating capacity.

NICKEL TRIMMINGS. Artistically arranged nickel trimmings adorn the entire stove, giving it a decided rich appearance and making it an ornament to any room. Our best polished silver colored nickel plate cover copper is used. The nickel parts are as follows: Swing over top rim, mirror plate, reflector top, perpendiculars on either side of the mica door, foot rails, screw draft, base strips, legs and fancy urn.

VERY IMPORTANT. It is the air tight feature, the arrangement being such that the entire stove is practically air tight. The front feeding door and ash pit door are fitted into grooves. The doors clamp securely with strong turn lever handles. The ash pit door is supplied with our perfected air tight damper.

GRAND FEATURES. It has a large full size illuminated feed door, on the front of the stove, giving it a beautiful illuminating effect, and is also in keeping with the appearance of a base burner. Has large ash pit with ash pan and heavy corrugated bottom with draw center grate, with shaking rings. The elaborate cast iron fretwork sides and top improve its appearance, durability and heating qualities. Makes it a square stove and gives it the appearance of a base burner.

FINE NICKEL TRIMMINGS. Magnificent silver nickel trimmings adorn the stove, giving it a beautiful bright appearance. The nickel-plated parts are plainly shown in the larger portions of the illustration and are as follows: Large top dome, swing cover, side wings, name plate, foot rails, ash door screw draft, front base legs and three base strips. The silver nickel plating is of a good grade, being clean and bright and possessing long wearing qualities.

A Great Producer of Heat

Terms Are On Page 1

Our Stoves Are LOW IN PRICE considering the quality. This is not due to cheap material, for our stoves are using a high grade of pig iron castings, fine nickel trimmings and enjoying labor of a high and efficient character. Our prices are reasonable largely because of certain favorable conditions in the iron and steel industry and our foundries were able to take advantage of them and buy heavily while the market was at its lowest. In the price of this "Ruby" Regent Heating Stove we are giving you the full benefit of our saving in cost, because it is our policy to do this for our customers on everything we sell. It is this very same policy that has induced so many families to continue their trust with us year after year.

THE BEAUTIFUL DESIGN we have created in the production of our "Ruby" Regent is one of the most handsome stoves you have ever seen in a base burning, self-feeding heating stove. Its general outlines are graceful, its appearance magnificent, and it brightens up the room to a most wonderful degree. It has Duplex grates and two fire construction for a continuous, self-fed, charcoal, coal and firewood. Better results will be obtained if you follow these directions.

SELF FEEDING MAGAZINE. Under the large nickel plated swing cover is a smoke-tight gas cover which automatically opens to the side when supplying fuel to the stove. This lid covers the top of the coal magazine which, when filled with coal, and attended daily, will continue to feed the coal into the fire so as to keep a fire going in the stove during the entire winter.

CRATE AND FIRE POT. Our "Ruby" Regent Base Burner has large, well proportioned, very durable, cast iron fire-pot made of material that will withstand great heat. The Duplex grate is of a design with shaking ring, permits the quick removal of ashes, clinkers and dead coal. This grate is so constructed that it may be moved forward and back.

MICA ILLUMINATED. The front and side doors, and the upper panel of the main body of the "Ruby" are faced with mica, which is transparent, permitting the bright fire to be plainly seen or throwing a brilliant glow throughout the room. The doors are set in grooves and lock with nickel-plated turnbuckles.

ASK PIT AND PAN. The ash pit is large enough for the ash pan, which is made for it, so that all ashes must fall into it. Do not allow ashes to accumulate so that they rise up to the grate as there will be danger of burning out the grate.

You Will Look A Long Way Before You Find Its Equal At These Low Prices

Let Us Ship This Efficient Heating Base Burner It's THE "CROWN" HEATER

For Best Results Use Chestnut Hard Coal.

Attractive Nickel Trim-mings

BEST RESULTS are attained if you use Chestnut Hard Coal in this heater. The "Crown" is not sold as a coal stove. We tell you this in advance, so that you will understand the kind of fuel required to secure the greatest satisfaction.

If You Keep Magazine Filled With Coal it Will Burn All Winter. A Great Convenience

THE FEATURES of the "Crown" Regent embrace efficiency in operation, beauty of design and dollar-for-dollar value. This stove has a two-flue construction which permits the heat to pass down and around the base before it reaches the chimney. This construction results in thorough and practical radiation and furthermore works an econom in that there is no waste of fuel. The heat goes into the room where it is required. This principle is different from the ordinary oak heat. The "Crown" costs more than some of the burners shown in our catalog but like many things that are more highly worth an additional cent that we ask. Our credit terms make paying easy.

ASH PIT is deep and possesses a heavy solid ash trap is constructed with side shaker, front flue clean-out and base pipe flue with lid for tea kettle. The "Crown" Regent is fitted with the Joplin Ransom Duplex grate. This grate is made of hard coal satisfactorily. Refer to introductory store pages for description and operating results of this grate. This stove is self-cleaning, possessing a heavy, large cast iron magazine and a top and extending down close to the level of the fire bed. Automatic cover close and opens as nickel top swing top is moved. As this magazine filled with coal and it will last the fire throughout the winter.

NICKEL PARTS add to its stateliness a grace. These trimmings are silver nickel and include: swing top, top dome, handsome ornaments, name plate, foot legs, base or screw draft damper, as well as handles. Attractive brass or nickel urn. These nickel parts are shown in the large illustration. The heart and "flame" can be appreciated only after you have seen the original from which the picture was made. We offer this heater in your choice of three sizes, but urge you to select one of the larger ones for fullest measure of satisfaction as a small stove is more expensive in proportion to maintain than a large one. When ordering bear to give correct number.

THE APPEARANCE of this handsome heater is improved by the stunning mica doors. The welcome glow of the cracking fire may be seen through the doors and adds to the cozy aspect of the room which the "Crown Regent may be placed. The doors are held in place by strong hinges as lamps and made to fit into the crown in a proper manner and are so made that they should not warp. These are matters that deserve the attention of the prospective buyer.

THE "REFLEX"

REGENT

HEATER

Our "REFLEX" REGENT possesses a typical double-flue make-shift that is called a double-barreled heat return the prospect purchaser, but is so constructed that it not only heats the room and those adjoining it, but can actually be converted to carry heat to a room above an efficient, satisfactory manner. This transmission as regards is in the following manner: The "Reflex" Regent has a flue in the back of the stove which draws the cold air from the room. This cold air, after contact with the superheated air from the hot air flues, becomes light in weight and consequently rises. There is a vent at the top of the dome to which a hot air pipe can be attached. Connect this pipe to the room above by means of a register and the upper room will receive all the heat necessary to comfortably warm it. Nothing has been or is necessary to produce the heat, but the room has been and is a comfortable, efficient, heavy heater.

The LARGE MAGAZINE is well ventilated and has a large carrying capacity. It is made in two sections and of self-heating type, supplying a steady flow of heat to the fire and maintaining even temperature with little attention. For fullest measure of satisfaction we use cast iron. It has been this type which gives easy access to the flues for cleaning. It has a large ash pit, which is self-cleaning construction. Ash pit door has a perfect fitting screw-craft register which gives absolute control of the fire. The ash pit is deep and has cleanout door conveniently located.

GENERAL CONSTRUCTION. Every detail of construction and the materials used in this portable heater has been given the greatest care, so as to produce a most substantial, as well as a most powerful, heating stove. All castings are of heavy weight, smoothly ground and carefully fitted. The flue flanges are extra wide, giving them no chance to open up. Nothing is known about this heater—everything is of generous size, heavy in weight, and designed to last a lifetime.

FIREPOT AND GRATE. Our "Reflex" Regent is made with a large heavy pot and improved double grate with another shading flue. The firepot can easily be removed and being straight allows a large fire surface in shape. It has long vanes which admit draft freely and offers ample opportunity for placing. With one turn of the crank, the grate bars out all clinkers and dead ashes without disturbing best of fire, while the shaming ring cleans ashes from outer edges of the grate. Both fire pot and grate are of greatest possible durability.

THE NICKELED PARTS are graceful ornaments on our "Reflex," and are all of the highest quality of silver nickel. They are well finished and plated by a special process that keeps them bright indefinitely. The cast base, new cast, the two top rails, top plate, side wings, baffle, and side top are the nickeled trimmings furnished. A beautiful 12-inch urn mounts the top.

TEST IT AT HOME. Our low prices are due to economical production and selling by mail. The quality we guarantee, and to convince you of our claims are true, we ship this heater to you at our risk. If you don't find it to do all we claim for it, and are not pleased in every way, return it and we'll refund every penny that the transaction has cost you. See Page One for credit terms.

A Newly Designed Elaborately Nickeled Base Burning Stove

THE "CLASSIC" REGENT

OUR "CLASSIC" REGENT is an attractive newly designed Regent Heater, patterned expressly for us by an expert designer of parlor stoves. The massive base, the body and the nickeled trimmings, are of a pattern in keeping with the most artistic surroundings. Every outline will add beauty to the room in which it is placed. Once you have used it, you will find out its attractions and you won't part with it at any price.

THE MATERIAL used in its construction is of thoroughly high grade. Real heavy gray cast iron is used and is a specially blended mixture that is strong and durable. Every bolt and nut is of the dependable sort. The nickeled plating, in the silver-on-copper process, is famous for its lasting quality and is strongly recommended by the manufacturers and owners. All doors and grates are of top quality, making the stove economical as a consumption of fuel, because with the back draft it is always under control.

GORGEOUSLY NICKELED When you come to consider the nickeled trimmings, we think there is plenty of it on our "Classic." The quality is of the best, being real silver nickel, highly burnished. The nickel parts are base, rear a front side wings, foot rails, ash pit door, screw draft, head, front top and rear plate. Handsome nickeled or bronze 12-inch urn, etc.

DOUBLE PLAN OF HEATING is provided for convenience as well as a big fuel saver. Cold air from the floor becomes heated by contact with the hot air in the stove, causing it to rise. A collar at the top of the door is provided to which you can attach hot air pipe to the room above. By the use of a register this heat can be utilized and shut off in the upper room as desired. Thus you secure the maximum of heat with a minimum of fuel, taking advantage of the heat that goes out the chimney in the ordinary Oak Stove.

MANY NEW IMPROVEMENTS are embodied in the construction of "Classic" and consist of the following:
- Heavy cast iron fire-pot, easily removable through front door; heavy grates with shaking ring and duplex center; T- and V-shaped attachment at back supplied with 1-inch removable cover, pipe, damper and fire regulator; air tight pot with screw draft damper; carefully fitted air-tight doors throughout; swing cover to top of spacious coal magazine; easy accessible clean-out below ash; and large ash pan.

**THIS MODEL** is a typical Cannon type stove, specially designed to burn coal. It has all of the very latest improvements as you will recognize after having used it. Possesses a large coal feed door with register for controlling the draft. Grate can be replaced without disturbing the stove. Observation also shows the draft regulator extending all around the bottom of the stove as shown in the illustration to the right.

**WE ASK YOU** to find a stove of this kind offered anywhere near our prices that will equal our “Volcano” Regent, both as to quality and as to service. This heater is made to burn wood, chips and coal, but is not sold as a coal heater, as the construction is such that it will not burn coal satisfactorily. The design is very attractive, as you will see by an examination of the illustration.

**IT IS SET UP ON heavy, ornamental, cast iron legs, which enable you to sweep under it. This is a feature that will appeal to every practical householder.** Can be purchased in the five sizes listed. In ordering be sure to give the correct number. This stove has a swing top made with holes and covers the sizes as mentioned in the schedule below.

HIGH GRADE WRINGERS

WARRANTED FOR SERVICE

Thoroughly Dependable Materials Are Used
In Their Construction
Fully Guaranteed

The life of a wringer is wholly dependent upon the quality of rubber in the rolls and we have taken great care in selecting the line of wringers to be sure that this most vital part is constructed of the best quality that can be offered for the money. We offer only such goods as we consider thoroughly reliable and made of dependable materials by the most skilled workmen. Our wringers are well finished and guaranteed in every way. Our cheaper grade of wringers have high-grade rubber rolls, vulcanized to the roller, and will give satisfactory service while our better grades have soft rubber rolls which resist wear and have the required elasticity to do the best work and are recommended for service. Each wringer has a warranty tag attached, which should be preserved in case a roll proves defective within the life of the guarantee. Should this ever occur, send us the tag and defective part, stating full particulars and give name of purchase. We will replace any rolls proving defective under our guarantee. Please remember that washing compounds, kerosene, etc., destroys the rubber and any roll injured from this source will not be replaced. Loosen adjusting screw when wringing heavy articles and have them moistened when not using wringer.

Satisfaction is Guaranteed.
You are the Judge.

It Is A Marvel At Our Low Price

No. 7K1356

BALANCE WHEEL of this washer is most conveniently placed at the top of the tub, enabling you to easily and firmly attach a large sized wringer.

TUB AND OTHER WOODEN PARTS are of genuine kiln-dried Louisiana Red Cypress. The tub is made in a most convenient size, strongly bound with three metal hoop bands having a diameter of about 24 inches with a large capacity which enables you to work on about eight shirts at one time.

CORRUGATED BOTTOM AND SIDES enable you to get excellent results, while the tub, at the same time rubbing the garments against the corrugation, and thoroughly cleaning every piece of your washing.

STRONG WRINGER ATTACHMENT is another of the many great conveniences of this outfit and is fitted to the top of the tub, enabling you to easily and firmly attach a large sized wringer.

EVERY CIRCUMSTANCE which could make for the convenience of our customers has been carefully considered in the design as well as in the manufacture of Hartman's High Speed Rotary Washer. You can sit down comfortably and rest without losing any time and you achieve splendid results with great ease of operation when used as a hand power machine. This combination of efficiency and simplicity does away with all back-breaking, nerve-racking work which has previously been the lot of so many hard-working housewives. This outfit is practically a self-worker, and is another example of the height of perfection reached by our factories.

Dasher Post is a high grade equipment so built to the machine that you can wash the finest fabrics without being in any way afraid that they will become tangled or torn. This is a feature that is of importance to every washing machine user.

IRON PARTS are carefully finished with enamel paint. The advantage of the enamel paint is two-fold; it improves the appearance of this washer, and at the same time protects the metal from rust-producing elements.

IF YOU DO NOT already possess a Hartman High Speed Rotary Washer, then you are not yet familiar with the real conveniences which have been achieved by the most modern improvements in this line of manufacture. When you receive this washing machine and have actually used it, you will be absolutely astonished at the marvelous rapidity and thoroughness with which you can do your work. The only regret you will have will be that you did not purchase one of these earlier, and thus save yourself many hours of drudgery. You will find our statements to be true in every detail, and you will wonder how, at this price, we could possibly afford to supply such a complete combination of convenience, efficiency and all-around reliability. Like all our other machines, this washer is entitled under HARTMAN'S IRONCLAD, UNIQUE LEGAL BINDING GUARANTEE, so that you need have no hesitation but can send us your order without a moment's delay. Dependable Painting and Roofing

WHY HARTMAN'S CAN SELL HIGH GRADE PAINT AND ROOFING AT BARGAIN PRICES

It is a very easy matter for a manufacturer to say that his particular paint or roofing is the best in the world. But it is a very different matter for him to prove to his customers that they are the best.

The final test for paint and roofing is in the length of time they wear. For instance, a car will rust out. Therefore, it is first put on a house or barn. It may have a beautiful color and shiny luster and to all outward appearance be as fine a paint as anyone could want. But unless it stands the test of elements, it will come along. Then it clouds up and rains for a day or so. Again the sun comes out blazing hot and you notice something looks wrong with your nice, fresh coat of paint. You examine it carefully and find that it has begun to blister and peel off. Also, it has begun to fade. You touch it with your finger and find that you can read it off—the dirt is more or less powdered. It was a good paint, after all, was it? No. And why? Well, in the first place a poor grade of color pigments was used and also a cheap grade of inacised oil. The pigments were improperly ground, hastily mixed with the oil and the whole mass run off into barrels and cans, labeled and put on the market as "Fine Ready-Mixed Paint!" No wonder it blisters, cracks, peels off and fades. The proportions are wrong, the color, the luster—the appearance—of good paint, but it does not possess the wearing and preservative qualities.

Hartman's has the experience to say about ready roofing. There are no end of different makes and brands of roofings on the market. They all look a great deal alike. But again the final test is in the length of service they give. Nine out of ten warp, crack, get dry and brittle in a few months after they are laid. They don't stand the test of time and weather. A leaky roof is bound to result and they are a constant source of trouble and expense.

AS TO OUR RESPONSIBILITY

Now, when we tell you that REX-KOTE Ready Mixed Paints, Varnishes, Stains, Lacquers and Enamels, and HERCULES GUARANTEED ROOFING have a quality by the test of time, Weather, no matter how sudden or severe its changes may be—no matter how long it may remain hot or cold, or dry or wet, or dry and wet alike—it will last more than ten million dollars longer than any other brand. In other words, this paint and roofing must be so good that they would prove their quality before the customer finished paying for them. It would not do for us merely to say, "Here is a high grade paint and Hartman high quality roofing." With us it means that we must not only say that, but that we must also be prepared to prove every word of it and back up the statement with our guarantee or else lose both customers and money. And we don't propose to lose either.

How did we make so sure that REX-KOTE PAINT and HERCULES GUARANTEED ROOFING would make good under the strong claims we put forth for them? Simply because we subjected them to the severest tests that either a paint or a roofing can be put to. Mind you, our more than a million and a half customers are scattered throughout the entire United States, REX-KOTE PAINT and HERCULES GUARANTEED ROOFING cover houses and barns in Maine and in the Far Northwest, where they are exposed to the icy blasts of winter for months at a stretch. Likewise they are exposed to the warm, moist climate of the Southern states as well as to the dry, blistering heat of Texas and Arizona. These paints and roofings are extensively used throughout the Middle West, where there are often such sudden changes in temperature that the temperature will change much as 60 degrees inside of 24 hours—a warm, sunshiny day followed by snow, hail and sleet. They are also used on the Atlantic and Pacific coasts, where the salt sea air is exception-

WHY WE UNRESERVEDLY AND LEGALLY GUARANTEE OUR PAINT AND ROOFING

Before putting REX-KOTE PAINT and HERCULES GUARANTEED ROOFING on the market we knew that we would sell them on our long time, easy credit terms. Therefore, it is first put on a house or barn. It may have a beautiful color and shiny luster and to all outward appearance be as fine a paint as anyone could want. But unless it stands the test of elements, it will come along. Then it clouds up and rains for a day or so. Again the sun comes out blazing hot and you notice something looks wrong with your nice, fresh coat of paint. We have been in business for 61 years—and WE ARE IN BUSINESS TO SELL you the finest of colors and more than half a century could not have built up this enormous business had we not always dealt fairly and honestly with our customers and endeavoured always to make our name mean "If-you-are-not-satisfied" guarantee with every article sold, and stood squarely behind that guarantee with our entire financial strength. That is our trade name and that is to be our result, we have today more than one million five hundred thousand satisfied customers and they are to be found in every state in the Union. Any one of them will tell you that Hartman's goods are of thoroughly dependable quality, that Hartman's prices are very low, that Hartman's credit terms are extremely liberal compared with those of others.

Ready Mixed—Guaranteed

MAKES A NEW HOME
OUT OF OLD BUILDINGS

There is nothing that will add more to the attractiveness of your home than the application of a few dollars' worth of high-grade Rex-Kote Paints and Varnishes. There is no better way to make a new home out of an old one than by giving it a new face. Rex-Kote Paints will make any house look as new as if it had just been built. And the longer it lasts, the more your investment will be worth. And you are fully protected against the theft of your investment by the guarantee that Rex-Kote Paints are worth every cent that you have paid for them. They are sold at low prices throughout the nation, and the savings that you secure by using them are more than enough to pay for the labor of putting them on, because they last a short time and are so thin and worthless that they do not properly protect the wood they cover.

PAINTING PAYS BIG DIVIDENDS

An investment in good paint pays large dividends by safeguarding the money you have invested in buildings. We always advise the use of the better grades of paints on your buildings rather than the inferior extremely low priced kinds. By so doing you effect a greater saving because of their greater wearing qualities.

In the paint sold through ordinary channels there are usually three sometimes four profits, divided among the manufacturer, the jobber, the salesman and the local dealer. Because these several markups, each representing an individual profit, and in order to keep the prices down, the quality of the ingredients must be cheapened. Such paints are likely to be the labor of putting on, because they last but a short time and are so thin and worthless that they do not properly protect the wood they cover.

SOLD ON LIBERAL CREDIT TERMS

 Guaranteed Rex-Kote Paints and Varnishes are sold on the liberal Hartman terms of long time credit. Study the table of terms in the front of this book, they are the terms under which you can buy guaranteed Rex-Kote Paints and Varnishes. Just stop and figure how small an amount of ready cash you require to give your house, your fence, your barn, your roof, that long-needed coat of paint. Why wait until you have saved $500 or even more and then buy paint from your local dealer? Make that improvement now, prolong the life of your buildings by buying a guaranteed paint on the Hartman liberal terms.

There are no strings tied to our offer, there is no trick about this. We trust you for the paints or varnishes you need to protect and beautify your home, just as we trust you for other goods we sell. All we care to know about you is that you are honest and will pay your word for it, we don't go to your friends, neighbors and relatives to make extensive inquiries. We have no reason to think that you will live up to our terms is all the assurance we require.

There is no more liberal and wide open proposition than ours. We trust you, you ship you a guaranteed paint, you use it, and your judgment whether or not the paint we have sold you is the best is final.

If you say that the paint blistered, peels or chalks, we don't argue, we send you new paint free of charge any time within four years from the date of the original order. Is there anything fairer than this offer?

We do not govern the quality by the price, but set the price by the quality.

READ OUR IRON CLAD GUARANTEE

We unreservedly guarantee that Rex-Kote No. A1 Ready Mixed House Paints will not crack, peel, blister or chalk if applied in accordance with our directions, and that we will, any time within four years from date of your order, replace free of charge to our customers any Rex-Kote No. A1 paint that does not come up to our claims.

That's why we produce better paints and varnishes, enamels, stains, etc., than many others.

Under these liberal terms of payment and covered by as strong a guarantee of satisfaction as we give, we could not afford to send paint that was not right—we would be taking a risk too great to contemplate. It is because of the knowledge we have of how good our Rex-Kote Paints and Varnishes are that we feel perfectly safe in making the most liberal sales offer ever attempted by any concern.

We are not asking as much for guaranteed Rex-Kote Ready Mixed Paints and Varnishes, sold on such easy terms, as some do for inferior grade of paints and varnishes sold for spot cash. Look carefully at every price quotation made in our Paint Section, then stop and consider that all quotations are made on guaranteed products, backed by our gigantic resources to be exactly as represented and finally make comparison between our prices and those of others for dependable guaranteed products. Our terms are based on the real manufacturing cost of our products, and this manufacturing cost is very low because of the remarkable facilities our factory has. Then we save money in the purchase of raw material, bought in enormous quantities for spot cash. Our cash resources help us to take advantage of every favorable market condition. With all these advantages in favor we are able to reduce manufacturing cost so low that we can sell our very best, guaranteed Rex-Kote Paints and Varnishes at less than the so-called pure paints offered by many other concerns.
REX-KOTE
Ready Mixed Paints—Durable Varnish

SCIENTIFICALLY MADE IN A

REX-KOTE PAINTS AND VARNISHES represent a marvelous improvement in paint and varnish making. Years of scientific research and practical experimentation by able chemists have achieved in the manufacture of REX-Kote Paints and Varnishes products of proven quality, whose merits are shown by actual use. The advanced method of manufacture and the tremendous output of REX-Kote Paint make it possible for us to give you these superb paints at a price far lower than you pay when you buy ordinary paints. And in addition to the saving you make, you receive the full protection of our strong guarantee.

ALL PAINTS AND VARNISHES sold by us under our guarantee brand are of a high standard of quality. They are made in one of the largest, most modern and most scientifically equipped Paint and Varnish factories. Nothing is left undone to make our Guaranteed REX-Kote products the very acme of perfection, and we know that in offering our customer our scientific and guaranteed REX-Kote ready mixed House and Barn Paints, Enamels, Stains and Varnishes, we are placing on the market thoroughly high grade paints and varnishes, and we back these products with our reputation of 61 years of honest and successful merchandising.

THE FACTORY has been equipped with every labor-saving machine known to the Paint Makers; this means efficiency and a low cost of production. The factory layout is such that there is no unnecessary handling of materials; this means more efficiency and still lower cost of production.

PAINT NOW AND PAY LATER

They are Guaranteed

THE GRINDING MACHINES. The pigments are crushed by powerful millstones until fine enough to form an imperious film. Each machine weights 120 pounds, and another operation is necessary, and so the pigments pass to the floor below through the large pipes shown in the illustration.

THE AGITATORS. Sufficient oil is added to the ground pigments to secure the proper consistency and the mixture is ground in large paddles, until a perfect paint is formed.

WHY REX-KOTE READY MIXED PAINTS ARE SUPERIOR TO ANY HAND MIXED PAINTS

It has taken many years to educate painters and property owners to appreciate the high quality of ready mixed paint, and actual service has had more to do toward proving this superiority than all the advertising in the world. Paint mixed by hand cannot equal the product made by machinery. By mixing our paints in enormous quantities we are able to secure a uniform color that is practically impossible in paints mixed by hand. When the pigments are thoroughly ground with the oil, the spreading qualities of the paint are noticeable improved and, because of this fact, are the most economical. It has been definitely shown that where two neighboring houses have been painted at the same time, one with the ready mixed paint and the other with the hand mixed paint, the ready mixed paint showed the effect of the weather in about half the time and was far inferior to the other.

READ OUR GUARANTEE ON PAGE 397.
PAINT CAN ONLY BE JUDGED CORRECTLY BY A COMPARISON OF RESULTS AND PRICE

We know full well that local dealers ask $2.00 to $2.50 for other so-called pure paints and we know from the actual tests made by master painters, paint dealers' associations and by our own and other leading chemists that Rex-Kote No. A-1 House Paint when applied presents a much finer appearance and possesses much greater wearing and preserving qualities than these other higher priced paints.

Paint good enough to be sold on easy credit terms, must, indeed, be of the highest possible quality.

So sure are we that Rex-Kote House Paint No. A-1 will make good that we unreservedly guarantee complete satisfaction from every gallon you use.

EASILY APPLIED BY ANYONE

Any hand mixed paint would require the services of an expert painter to secure satisfactory results, but because Rex-Kote being made and mixed by the most perfect up-to-date machinery in a wonderfully equipped modern paint factory, every gallon is always of the same uniform quality with every other gallon; its easy, even flowing qualities can be utilized to the fullest degree even by an inexperienced person.

In buying No. A-1 Guaranteed Rex-Kote, you are buying quality and we don't hesitate to say to you that we know of no better product in ready mixed house paint made by any one or sold at any price, and our full guarantee of satisfaction covers every gallon.

You will make no mistake in ordering A-1 Rex-Kote Ready Mixed House Paint, made according to a formula which years of experiments has proven to be best. Its covering and protecting qualities are unsurpassed.

Don't let your painter or any one else tell you that paint mixed by hand is better than our A-1 Rex-Kote Ready Mixed House Paint. Such statements can only be made by misinformed or ignorant persons. Our guarantee of satisfaction is your protection.

BIGGEST PAINT BARGAINS WE HAVE EVER OFFERED

From any viewpoint our fully guaranteed Rex-Kote House Paint No. A-1 is unquestionably one of the biggest Paint Bargains we've ever offered. First, it is guaranteed by the great Hartman Concern, with every last cent of its enormous resources; secondly, it is sold to you on credit, so that while you are paying for it you have a chance to watch how well it wears; lastly, the price at which we sell it, even on our liberal credit terms, is no higher than the prices asked by many for grades inferior to Rex-Kote House Paint No. A-1.

You should bear in mind, however, that in paints, like in other goods there are various qualities. It is much better in your own interest to always select the best; it may cost a trifle more in the beginning, yet in the end it will be much cheaper. The best grades of paint will cover more surface, will look better, will retain their color longer, will keep their elasticity for a greater number of years. The oil film, which is the real protector of the wood surface, will not dry out and crack on the A-1 quality for years and years, and we recommend to you in all sincerity that when considering the purchase of paints you select for the greater economy and better satisfaction, A-1 Rex-Kote Paints.

We furnish it in 39 different colors, which are illustrated on page 410. Don't forget to give name and number of the color you want. It will avoid errors.
This is our second quality in Rex-Kote House Paint. It is designated as No. 2. It would be against our long established policy of honest dealing to tell you that this grade is as good, as serviceable, as economical as our Rex-Kote No. A. When buying paint it is well to remember that the best is the really economical and most satisfactory in the long run.

However, if you desire, we can furnish you with Rex-Kote Ready Mixed House Paint, No. 2, and give you a fairly good article, which is made in our factory from ingredients carefully selected and tested. We will stand back of this paint with a limited guarantee, but we say to you in all frankness that you will be money ahead if you select our Rex-Kote No. A—it will give you much better satisfaction.

Rex-Kote Ready Mixed House Paint No. 2 comes in 22 different colors, which are shown on page 466. In your selection refer to these colors and be sure that you mention the name as well as the number of the color you want.

We guarantee that this Rex-Kote No. 2 Ready Mixed House Paint will not crack, peel, blister or chalk if applied in accordance with our directions and that we will any time within 5 years from date of your order, replace, free of charge to our customers any Rex-Kote No. 2 Paint that does not come up to our claims.

REX-KOTE SHINGLE STAIN

Too much stress cannot be laid on the necessity of preserving your shingle roof and protecting it against the weather. Rex-Kote Shingle Stain is a paint as well as a wood preservative—a combination of pure, strong colors, ground very fine and thinned with refined creosote and oils that double the life of shingles. It is better than paint for shingles, as it does not clog the surfaces; it leaves a clear, non-porous, roof, and it will not affect the rain water which runs off the roof into your cistern.

Two and one-half gallons of Rex-Kote Shingle Stain will saturate 1,000 shingles, dipping them, or a gallon will cover from 1½ to 2½ square feet of roof surface when applied with a brush.

We furnish Rex-Kote Shingle Stain in 6 colors as shown on page 496. Specify color you want.

Rex-Kote Roof Paint is one of the best substances known for repairing roofs and keeping them in good condition. It preserves shingles, tin, iron or felt from the action of the weather and will make an ordinary roof last many years longer. Can also be used for structural iron work, iron tanks, iron shutters, steel bridges, stand-pipes and fire-escapes. It is an excellent damp-proof coating on brick and concrete cellar walls, when heavily applied on the outside of the wall.

Apply very heavily when painting the roof; a good thick coat of Rex-Kote Roof Paint is equivalent to an extra layer of felt.

Thus you will get the full benefit of the weather-enduring qualities of natural asphalt and linseed oil.

Linseed Oil Rex-Kote Roof Paint is guaranteed free from rosin. It is made from natural asphalt, linseed oil and other suitable ingredients which form a combination that is waterproof, acid-resisting and imperious to atmospheric and climatic conditions. When dried, it forms a waxy coat (not sticky and not brittle), therefore does not run when exposed to the rays of the hot sun, neither does it crack when covered by snow or ice.

Comes in black, maroon and green. Will cover about 250 square feet per gallon, one coat.

**Rex-Kote Black Carbon Paint**

An excellent low-priced black paint for smoke-stacks, iron fences, bridges, fire-escapes, felt and composition roofs. It does not compare in elasticity or wearing qualities with our LINSEED OIL REX-KOTE ROOF PAINT, but at the price we sell it it is a very satisfactory product. Has been giving excellent service to thousands of users. For sheds or structures that in the course of a few years will be removed or torn away, it is an ideal preservative at a low cost. Will save its cost many times over by the protection it affords.

**Rex-Kote Auto, Carriage and Buggy Paint**

Is a very durable and beautiful color, ground and mixed in copal varnish. It is ready for use and if applied in accordance with our simple directions will refresh your auto, carriage or buggy entirely satisfactorily. You can do the work yourself. For an automobile or carriage use about ½ gallon, for a buggy one quart can is usually sufficient. The paint dries with a high lustre, which it will retain for a long time, even though it is subjected to destructive influence of mud, dust, soap and water. **Rex-Kote Wagon and Implement Paint**

Primarily intended for repainting of farm wagons and farm implements to keep them looking new and bright. It has been conclusively proven by farm experts that ordinarily wagons and implements last about 6 years if not placed under roof and kept in paint, but that where care has been taken to give each wagon and each piece of implement one or two coats of Rex-Kote Wagon and Implement Paint in a year, they would last almost indefinitely. You will find it a lot cheaper to buy Rex-Kote Paints for your implements than to buy new implements.

**REX-KOTE VARNISH STAINS**

(GLOSS LACQUER)

This is about the most useful product of the paint industry and is without doubt one of the most wonderful wood finishes ever produced because of its brilliancy of colors and lasting qualities. It is far superior to the ordinary wood finishes. It is so easily applied that the purchaser can go ahead and finish any room with the proper color by himself. The price is so low that you may buy old and scratch pieces of furniture look as good as new at an expense of a few cents, and the finished work will be almost as satisfactory, and about as rich and beautiful as if it had been done by an expert painter or cabinet finisher. Indeed, the greatest merit of REX-KOTE Varnish Stains lies in this one quality—that it does not require expert handling to produce satisfactory results. It is put up by us for readiness for use; nothing is to be added by the purchaser; just open the can, pour a little of the liquid into a saucer or cup and brush it on the piece of furniture or the woodwork you wish to decorate, following the very simple directions we send with the can, and in twenty-four hours' time the newly decorated piece of furniture or woodwork will be ready for use. Apply with a flat 2¼-inch varnish brush or brush. It will make an oak finish out of mahogany and oak finish later on. If wanted, will hold the scratch finish of any dark mahogany finish. It is wonderful the amount of artistic brightening up you can do with REX-KOTE Varnish Stain. We have been in the Furniture Business for 41 years and thoroughly understand the requirements of an efficient Varnish Stain—we proclaim REX-KOTE absolutely perfect.

**REX-KOTE WHITE SHELLAC**

Like orange shellac, the white shellac is a necessity as a first or prime coat in finishing panel, furniture or fine interior woodwork. It should be used on such articles as are to have a color or a very light natural finish. White shellac dries in from 2 to 4 hours, comes in a thin, lightly varnished as ready for use. Can also be used to cover up knots in gummy spots on sappy woods before painting. Order by catalogue number and be sure to state that you want white.

**REX-KOTE ORANGE SHELLAC**

Shellac is used by finishers as a first or priming coat on pianos and fine furniture. It dries quickly in from 2 to 4 hours, is transparent, and brings out the pores of the wood, at the same time accentuating the natural grain of the wood. We do not recommend the use of liquid filler on pianos, fine furniture or store fixtures as a primer or varnish. Shellac is the priming substance and is very much more satisfactory. Use orange shellac only on furniture, pianos or store fixtures when they are to be refinished in dark oak, mahogany or any other dark finish.

REX-KOTE liquid wood filler is what its name implies, a filler, of the finest estuarine. The finest wood to be used on a first coat. It dries in about 10 hours, fills the pores of the wood and will save that much varnish as it has taken wood filler to put on the first coat. For sizing plaster about to be painted it is without an equal; in fact, for any purpose as a first coat to prepare the surface for painting or varnishing liquid wood filler is the best.

**Rex-Kote Sanitary Flat Wall Finish**

The new Sanitary Flat Wall Finish is another triumph of the Rex-Kote Paint Works, made to supply the need of a delicate and attractive germ-proof wall covering. After years of experimentation we have succeeded in bringing out a hard, flat drying oil paint that never does away with that old-time, unhealthful and unsanitary kalsomine and wall paper for bedrooms, library, pantry or kitchen decoration. Rex-Kote Sanitary Flat Wall Finish is washable; it is economically; its first cost is less than that of wall paper and it will last ten times as long as kalsomine and always look better.

GUARANTEED ROOF PROTECTION

The roof is more continuously exposed to the weather than any other part of a building. Therefore, in the construction of any roofing material, its weather-proof and wear-resistant qualities must be given first consideration. Hence, when we decided to enter the roofing field, we determined that we would bend all our energy toward the production of roofing which could be absolutely depended upon to be of the high quality that a combination of years of experience, skill, modern machinery and unlimited capital could produce.

HIGH GRADE ROOFING AT MONEY SAVING PRICES

We occupy a position entirely different from the ordinary roofing manufacturer because we depend upon the continual patronage of our customers, not only for roofing but for their home furnishing requirements as well—not only for the present but for years to come. Therefore, we must see to it that you get your money's worth in every purchase.

Roofing good enough to be sold to you on small easy credit payments must indeed be of a very high quality—it must be a roofing without a flaw and without the slightest objection.

Our Hercules guaranteed roofing has reached a very high point of perfection in roof covering and compares very favorably with roofing sold by others on a strictly cash basis.

ABSOLUTELY UNIFORM IN QUALITY

Every inch of Hercules roofing is just exactly the same as every other inch. Its quality is the most uniform ever achieved in Ready-Made Roofing. It is not only composed of truly remarkable wear-resisting, element-resisting materials, but is so nearly uniform in its construction and manufacture that we give it our unqualified endorsement. Our experts go on the theory that if roofing is made uniform, the same throughout, that it must give out all at one time or keep in perfect shape all the time. A chain is no stronger than its weakest link, a roofing is no stronger than its weakest inch and if there are no weak inches, then how can the roofing ever show wear? Hercules Roofing should give longer wear than we guarantee it to give—it's made that way.

ROOF YOUR HOUSE AT OUR RISK

Reason for yourself why we successfully compete with all others and give our customers astounding values. We are the Largest Credit Company in the world with a capitalization of Twelve Millions of Dollars, with customers in every state in the country, numbering more than one million five hundred thousand. Because our output on roofing is enormous, every inch guaranteed with the broadest guarantee ever given—manufacturing costs are reduced down to the lowest fraction permitting of perfect quality at real genuine bargain prices. Because we are satisfied with one reasonable profit our prices are rock-bottom.

RUST-PROOF—WATER-PROOF—WEATHER-PROOF

Our Hercules Guaranteed Roofings are proof against rain or snow, heat or cold. Climate conditions and sudden changes in temperature have no perceptible effect upon them. They can be used in any part of the world—in tropical or polar regions with equally satisfactory results. For that reason you need feel no hesitancy in ordering this roofing from us. We have all grades for all purposes. Every grade is fully guaranteed.

HOW TO FIND THE QUANTITY NEEDED

To find the quantity of roofing required for your house, measure the length of the rafters and multiply this dimension by the length of the building; this will give you the number of square feet needed for one side of the roof; double this amount and divide by 100; the answer is the number of rolls of roofing you will need.

Don't waste money on tin roofs that rust into holes, and wood shingled roofs that rot away.

A strong and serviceable roofing which can be laid with the flint surface or the rubber finish to the weather, according to your preference. This roofing is easily adapted to cover temporary shelters that will be removed in a year or two. Will also make an inexpensive covering for side walls of summer houses, poultry sheds, etc.

It comes in rolls 32 inches wide, containing 108 square feet of roofing, and each roll will cover 108 square feet of roof surface. Sufficient nails and cement are packed inside the rolls for laying.

OUR GUARANTEE PROTECTS YOU

If laid properly and in accordance with our directions it will wear and give satisfaction for a longer term of years than guaranteed. Hercules guaranteed roofing will make good, or if it doesn't, we will make good to you.

SEND FOR FREE SAMPLES

We will gladly send you a set of samples showing our complete line of roofing, if you prefer to see the roofing before buying; you can, however, select your roofing right from these pages. They show and describe our complete line. They are in the form of descriptive literature, the weight in each roll of Hercules guaranteed roofing is correct, and any selection you may make is filled and shipped subject to our legal binding guarantee.

THE ECONOMY OF THREE-PLY ROOFING

Knowing Hercules guaranteed roofing as we do, knowing the comparative strength of 1, 2 and 3-ply roofing, we want to suggest to you that you carefully consider these different thicknesses of roofing before definitely deciding which to order. Remember, that while 1-ply and 2-ply roofing cost a trifle less than 3-ply, for the slight additional cost 3-ply roofing will return to you ten times the amount in longer wear and better protection to your roof.

FLINT SURFACED ROOFING

There is a real economy in Hercules guaranteed roofing. The first cost is the only cost and you save all repair money and all painting money. Your roof will not require it. Here's the reason why Hercules guaranteed roofings are superior to all others. All prepared roofings should be made from high grade roofing felt, just like Hercules—some unscrupulous makers work in paper, which weakens the life of the roofing. Pure asphalt is necessary to make a strictly high-grade, lasting roofing—here some manufacturers lower the grade by using tar substitutes. Tar cracks in cold weather, melts in summer. Oil evaporates, leaving the roof dry and brittle, so that it buckles and cracks.

Hercules Roofing contains no substitutes for pure asphalt or felt base. Whenever asphalt roofing is mentioned, the Hercules Guaranteed Flint Surfacd kind is always in the foreground. Its wearing qualities put it there.

When you buy Flint Surfaced Hercules Roofing you are guaranteed an honest roofing which will give you complete satisfaction.

MICA SURFACED ROOFING

WEATHER-PROOF — WATER-PROOF — HAIL-PROOF

A very superior roofing of great strength and exceptionally attractive appearance. Mica, from roofing felt, thoroughly impregnated with lasting asphalt solution, which renders the felt waterproof, strengthens the fibers and makes it elastic immediately after the felt has been immersed in the asphalt, while the roofing is still hot and the asphalt yet soft, flaked mica is pressed into the surface on both sides with pressure rollers, hence imbedding the surfacing into the asphalt, so that neither wind, rain, snow nor hail will loosen the flakes. In appearance there is nothing more beautiful than the clustering surface of a roof covered with Hercules guaranteed mica roofing and the finish is as durable as the roofing itself. It can be laid tightly stretched, and will not tear or crack with the changes of temperature or weather. When laid over old shingles, be sure that all shingles are tight, that all sides are driven into the roof, that places where shingles are missing are filled in so that there will be no unevenness. For new roofs the roof boards should be laid close, and the surface clean and free from nails or splinters.

SOLD UNDER OUR IRON-CLAD LEGAL BINDING GUARANTEE OF SATISFACTION.

USE THREE-PLY ROOFING — IT WEARS LONGER.

Made from felt, saturated and coated with asphalt compounds, that give wear-resisting qualities and long life, in which mica flakes have been imbedded in the asphalt saturated and coated felt base of the roofing that the surface is smooth and even. There is practically no wear out to the mastic surfacing. It is unaffected by heat or cold, sun or rain, and will stand up in any climate.

Can be laid over old shingles as well as on roof boards. It is very easy to lay and once laid needs no further attention. It makes a very attractive roof.

Comes in rolls of 108 square feet; will cover the square feet of roof surface. Nails are set firmly in sufficient quantity packed in every roll of roofing.

MARBLE SURFACED ROOFING

NOT AFFECTED BY HEAT OR COLD. CAN BE SAFELY USED IN ANY CLIMATE. YOU TAKE NO CHANCES WHEN YOU BUY IT.

Here is a strikingly new roofing-surface. The marble of nature is gray, a handsome silver staple that won't bleach out, will always be the same in color, just the same as the marble it is made from. The surfacing is ground marble chips, so thoroughly imbedded in the asphalt saturated and coated felt base of the roofing that the surface is smooth and even. There is practically no wear out to the mastic surfacing. It is unaffected by heat or cold, sun or rain, and will stand up in any climate.

We guarantee every roll to be made of a high grade felt impregnated with pure asphalt compound. We do not impose that it be laid smoothly and properly nailed and cemented. Anyone can do this; there is no secret process. We furnish it rolls of 108 square feet or sufficient to cover 108 square feet of roof surface and all nailing. Cement and large headed nails are packed inside to suit each roll and you can lay it yourself, even though you had no previous experience. Directions how to lay it come with each roll and you require no tools but hammer and nails, a pair of shears.

ROOFING EVER MADE
Per Roll of 100 Sq. Ft.

Hercules Rock Surfaced Roofing will outlast and surpass in beauty any Ready Roofing on the market.
Its popularity is increasing every day, but its wear-resistant qualities and beauty can be fully appreciated only after it has been laid and in use for a number of years.
You can buy roofing for less money—we list such on the preceding pages—but you cannot, at any price, buy any kind of roofing that will afford you better continuous satisfactory service and lasting beauty. These facts make our Hercules Rock Surfaced Roofing the most economical in which you can invest.

Hercules Rock Surfaced Roofing is made from a very high grade felt base. It is of extra heavy strength and weight. The fibre is carefully and mechanically-saturated with the greatest water-proofing compound known to the Roofing World—Pure Asphalt. After the process of Pure Asphalt saturation is completed, it is given an additional mechanical treatment, requiring great time and care, to make it still more water-proof and durable.

THE COLORS DO NOT FADE—THEY'RE NATURE'S OWN PRODUCT

The next step in the process of manufacture is to give the roofing a bath of especially prepared high-grade coating which protects the fibres from the weather, wear, tear which is coated on both sides with finely crushed rock. This rock surface which will never fade, produces the beautiful appearance shown in the illustration and also materially aids to the fire resisting and lasting qualities of the roofing.

Great Care is Used in the manufacture of this roofing, as it is necessary that the rock surfacing is so well imbedded into the coating as to make it difficult to remove or pull off.

WILL GIVE MORE THAN 15 YEARS OF ROOFING SATISFACTION

We cannot recommend too strongly the purchase of this roofing, for it will add to the appearance of any building—it is of high quality and manufactured from Pure Asphalt—it is far superior and less expensive to apply than shingles or any other kind of roofing—it will retain its beautiful appearance—its water-proof qualities are the best because of the careful refining to which the asphalt solution is subjected—there is nothing which can be drawn out of the saturation that will discolor the crushed rock finish. Our Fifteen Year Guarantee Protects You Fully.

You cannot possibly make a mistake in ordering this guaranteed ready roofing for your house, barn, sheds or any other buildings because it successfully withstands the elements. Summer heat or arctic cold has little or no influence on its wearing quality. If laid right to begin with, if our directions covering laying and cementing are followed, it will not warp, buckle or rot, and snow, sleet or rain will not affect it in the slightest degree. While the rock surfacing is put on primarily for protection, it gives the roofing a beautiful appearance to be found in no other ready roofing.

MADE IN TWO COLORS:

Hercules Red Rock Surfaced Roofing
A natural deep red rock surface of remarkably striking beauty.

Hercules Green Rock Surfaced Roofing
A quiet, restful greyish green rock surface that is pleasing to the eye.

ONE PASSENGER CAR. CROSS-OVER AND 12 PIECES OF TRACK

Engine is Equipped With Piston Rods and Brake

Order this Outfit for The Children

The Doors in Freight Car Open and Close

THE BOY who is mechanically inclined will particularly appreciate
this landy train outfit. Being very strong in construction
it will last a long time, and will always prove a great entertainer for
the child and his companions. It consists of an iron, steel-gunned
 locomotive with tender; one baggage and one passenger car; one cross
over and 12 pieces of track (two straight and ten curved). The track
is easily taken apart and just as easily put together. The locomotive
is well camouflaged in black and is thoroughly baked, trimmed with silver
bands and gold decorations.

THIS ENGINE is equipped with piston rods and brake and the
rear casing is bolted in the engine casing by a
crystalline spring. The key winds up the throttle in the engine. Bear in
mind that this is a set of which the children will not tire. The engine and
Tender cover all measures 10½ inches, the baggage and passenger car each
measures 24½ inches long and 9½ inches breadth. Comes in colors divided
into 5 sections — engine, tender, track, freight and passenger car. Shipping weight, about 14 lbs.

A SPLENDID POCKET GUN

LONG RANGE, SINGLE BARREL

GUARANTEED, AMERICAN MADE, BREECH LOADING, SHELL EJECTING FIRE ARM

This gun is made for us by one of America's most expert manufacturers of firearms. Although we sell it at a very low price, it is not a cheaply constructed weapon, but a gun built for service and accurate shooting. It has a genuine armory and black barrel, full choke bored automatic shell ejector, top snap break, rebounding grained walnut plated grip stock. The gun is made in 12 gauge and has a 30-inch barrel. We guarantee this gun. Order this single barrel specimen, examine and compare it carefully. If you don't find it exactly as described and illustrated you can return it to us and get your money back.

SPLENDID GRADE AMERICAN BAR LOCK HAMMER GUN

FULL CHOKE BORED FOR EITHER BLACK OR NITRO POWDER

$15.89

This is unquestionably one of the greatest gun bargains we have offered. A genuine specimen from the factory of a celebrated New England maker, equal to double-barrel breech loading shot guns made and sold by some makers at a higher price.

HAS BREECH LOADING DOUBLE BARREL——HAMMERLESS

SHOT GUN 12 GAUGE

$21.65

Standard Length BARREL

How This Gun Is Made

THE BARRELS are standard length, made from standard gun barrel steel, turned out of solid bars. Barrel heavily at the breech so as to withstand any factory load of nitro powder. The RH is mated, extension rib is extra heavy. Barrels are finished and choke bored for close and hard shooting. The stock is milled from American straight grain, well seasoned walnut, beautifully shaped, with checkered plated grip, fitted with fancy butt plate, and well finished. FORE END is of the compensating type which automatically takes up any oscillation by mending and closing the gun. TRIGGERS are of the spring back type and so constructed that the safety blocks the sear of the gun, making a premature discharge almost an impossibility. THE FRAME and top lever are beautifully molded and case hardened. Gun is fitted with safety catch of the positive locking type.

At retail value and our liberal terms, this gun is a splendid value, and we strongly recommend the purchase of it.

No. 6K2023

You’re on doubt been promising yourself to buy a lawn mower and you’re waited to pick out a satisfied one. Here’s your chance to have a good one at a very close price and on easy terms. The blades of this machine are made of a fine quality of steel. The red spokes are of malleable iron and strung to the steel shaft by cross hardened steel setscrews. This is the most practical construction. 10-inch wheels, 5-inch reel. The cones are hardened and especially tempered by a secret process, producing such a hard surface that unless the frame construction is intentionally changed the cone will never require adjustment. It runs with perfect ease and is almost noiseless. A wonderful bargain at this low price and is one to give good satisfaction. Weighting about 22 pounds.

HARTMAN'S
LEGAL WATCH GUARANTEE.

WATCH Guarantee

We Herby Guarantee every watch we sell to be an accurate timepiece, in perfect running order and to correspond in every detail as pictured and described in this catalog. Cases and movements are positively guaranteed to wear as specified.

We Agree to replace and repair, free of charge, at any time, any part or parts of any watch purchased of us which may give out because of defective material or workmanship.

We Guarantee to ship each and every watch on approval, and if within 30 days from its receipt it does not prove perfectly satisfactory, we will accept its return and when received by us, refund all moneys paid including payment of transportation charges.

THE HARTMAN WAY
A YEAR TO PAY
**The Worlds Greatest Watches**

**Our Reason** for handling only the Elgin, Waltham, and Rockford watches should be your reason for owning one of these dependable standard makes. We will not carry watches unless they have an established reputation—watches which time and usage have demonstrated to be the very best that the watchmaker's skill can produce—and you cannot afford to own any other than these makes—a watch which will give you a lifetime of satisfactory service; which becomes a family heirloom and can be handed down in perfect working order from generation to generation. Such a watch is either an Elgin, a Waltham or a Rockford.

We were practically forced into the watch selling business. At first we received an occasional request from some customer for a good, accurate timepiece. Later these requests became more numerous and finally they came so thick and fast that nothing was left but to add a complete Watch Department to our already enormous and extensively departmentized business—the largest of its kind in the world.

**In Organizing** our Watch Department, we set about it with the same thoroughness and well-being of our customers in mind, which has for 60 years characterized the policy of the mammoth Hartman institution. We made a careful survey of the entire watch industry. We secured the services of some of the ablest watch experts in the business and placed the department in their entire charge. Personal visits to the leading watch factories were made to note their equipment, processes of manufacture and other phases of the watchmaking business. It might be said that every known make came up for consideration and was subjected to every conceivable test for reliability, dependability, durability—in fact, for every known watch quality.

**Why Did We** go to so much trouble and expense in establishing one of the many departments of this great business with its mammoth mail order department and more than one million, five hundred thousand satisfied customers? Simply because we were determined to carry no make of watch that would not stand up under the Hartman guarantee, and our instruction to our experts in the Watch Department was this—"Take no chance. We are not in the business to make our profit off the watches and buy inferior makes on account of making a larger profit, because we expect to make friends by the very quality of the watch we sell; and if we sell anything but a dependable watch it will affect, to a certain extent, the balance of our enormous business."

**The Result** of this investigation brought out two things—that the best watches in the world are made in America, and the best watches in America are those made by the Elgin, Waltham and Rockford Watch Companies. Therefore, those makes are the ones we selected. Every watch offered in this catalog (except a few bracelet watches) is either an Elgin, Waltham or Rockford watch. Any watch that you select is sent to you with our full assurance of absolute satisfaction. Every watch we show in this catalog is so good a watch that we unhesitatingly give it the protection of our legal binding guarantee, which means you could not possibly buy a better watch anywhere, no matter how much you paid for it, because the Hartman guarantee is the strongest document of its kind ever written. It is not within the power of written words to make it stronger.

We carry no freakish fads, which a person tires of in a month or two when the novelty wears off. The watches we show and offer are watches for a lifetime, guaranteed for lifetime satisfaction.

**The Watch Buying Public** has endorsed our plan by making our Watch Department one of the largest watch selling establishments in the world. This is because our watches are right in price and quality, and the people of the country know and trust Hartman's, just as Hartman's knows and unhesitatingly trusts the people. Trust in a literal way by giving them absolutely free credit—free from all restrictions such as the giving of notes, mortgages and other red tape annoyances. Our credit is free. Our prices are lower than the lowest. Our terms are the most liberal ever offered. Those are the reasons why the people order their watches, as well as other merchandise, from Hartman's, and why it will pay you to do likewise.

**The Prices We Quote** on the watches in this catalog are characteristic of the low prices which dominate the entire House of Hartman throughout its every department. That means that these prices are the very lowest at which these world-famous makes can possibly be sold. Our vast purchasing power of more than Ten Million Dollars, and because of it, our ability to undersell all competition, operates in our Watch Department to the same advantage to our customers as it does in every other department. When you buy a watch from Hartman's you not only get the benefit of the lowest price ever made on a watch of the particular make, size and style you select, but you also have a full year to pay for it if you wish. Search the world over and you could not possibly find the equal of the watch bargains here offered you.

The prices quoted herein are the very lowest at which these watches can be sold. That does not mean the lowest credit prices—it means lowest prices, either cash or credit. You may pay all cash for your watch purchase if you prefer to do so, but you will not save a penny by doing so. Our prices are rock bottom. They represent the very narrowest margin at which dependable watches purchased in stupendous quantities at the very lowest cash prices, can be placed in the hands of customers. Therefore, it doesn't make a bit of difference whether you pay all cash or in easy payments to suit your convenience. The price is exactly the same in either case.

We wish it to be distinctly understood that every watch sold by us is brand new, direct from the factory. Not a single one is a "rebuilt" watch—not an old watch which has seen service and been tinkered up, put into a case and sold as new. The watch we send you will be one that comes to you exactly as it leaves the factory—brand new and absolutely perfect in every respect.

We ask you to remember that when you buy a watch from us you have the addition of our guarantee to that of the manufacturer, and you take no risk whatever. You could not possibly ask for greater protection.

A LIFETIME REPAIR GUARANTEE

We guarantee to keep the watch in perfect order, absolutely free of charge, as long as you own it. This means exactly what it says—buying a watch from Hartman means an insurance policy that at any time your watch needs repairs, we will do it for you free of charge. The watches we sell you must give you lifetime service. This is a part of our guarantee. This is an added feature to our Watch Department, exclusive with us. When you purchase a watch from us you are fully protected in every respect.

If you would rather have some other make than the Elgin, Waltham or Rockford tell us what makes you wish, we will supply you at rock bottom price on our regular easy credit terms, providing that upon investigation it proves to be a reliable make and one that we can recommend. We are sure, however, that any one of the three makes here featured will please you perfectly, and the wide range of styles, sizes and prices makes possible any selection you may wish.

Sent on Approval. You may order us to send any item you wish from this catalog. Send along remittance for the first payment as indicated in printed table on page 1, with the clear understanding that if for any reason you do not care to keep the watch, you are at liberty to return same to us and we will refund you the full amount you have paid. If you decide to keep the watch, then pay the small monthly payment as due. All watches are sent on 30 days' approval test and examination.

How to start an Account. Pick out the goods you want and write your order on one of our printed order blanks. Be sure to mention the price, catalog number, name of the article and catalog page on which it appears, giving any additional information as listed in description. Refer to page 1 which tells you how much money to send with your order, and how to pay the balance. By giving us this information in full we will be able to avoid any possible misunderstanding or delays.

Engraving. Watches illustrated in this catalog with engraved or enamelled monograms, furnished with your initials without extra cost.

Watches illustrated in this catalog without initials or monograms can be hand engraved as you may desire, providing there is suitable space for the engraving. Prices for various engravings are based upon amount of work necessary and range from 35c to $3.00, according to style and size. To prevent errors print the initials you desire engraved.

About Watch Cases. All our 14-karat gold cases are extra fine in quality and pattern. They are better in construction, richer and heavier in gold, finer in every detail of quality and design than any other cases on the market. They are cases any man or woman is proud to own or exhibit—cases that are guaranteed to last a lifetime.

Our gold-filled cases, the 10, 20 and 25 year, are offered in an almost endless variety of fancy engraved designs, Roman, Plain and Polished cases, suitable for fancy initials or elaborate monograms. Stamped in every case is the period of time for which they are guaranteed. If any of these cases do not wear satisfactorily for the full length of time as guaranteed, we will replace the defective case with a brand new one. All our watches are adjusted and regulated before they are sent out to you, assuring time-keeping accuracy and perfect condition when you receive your watch.

Charges prepaid. Whenever possible, we ship watches by express, otherwise by parcel post. We pay the delivery charges on watches and jewelry only. On small purchases (under $5.00) we request cash in full with your order, and we do not open charge accounts for less than $5.00. However, our legal, money-back guarantee remains the same in every case, whether you send cash in full on a small or a large order, or use our convenient credit system. We guarantee safe delivery and will replace any damaged watch with a new one, free of charge.

How to send money. The safest and best way to send money is by postoffice money-order, express money-order or bank draft. In any case, these must be made payable to the Hartman Furniture & Carpet Company. Currency and coin should ALWAYS be sent by REGISTERED MAIL. We would ask you to kindly avoid sending personal checks. If you live on a R. F. D. route give your money and letter to the rural mail carrier and he will buy a money order for you and send it to us.

Name and Address. Be sure to write your name and address very plainly, giving town, county, state and street. If your postoffice has a different name from your express office, please mention BOTH. If away from home when ordering, please give permanent address as well as temporary address. Women should always prefix their name with Miss or Mrs. (Mrs. using husband's initials) as may be proper. Always write your name in full and the same way each time you write to us.
The New Thin Model watches illustrated on this page are most attractive in style and offer a selection of splendid designs in high grade Gold Filled Cases complete with factory tested and regulated Elgin, Waltham or Rockford movements at heretofore unheard of prices for these well and favorably known brands of Men's 16-Size Watches. The time keeping accuracy and durability of our watches are GUARANTEED both by ourselves and the Watch Manufacturers. REMEMBER, we offer you the choice of Elgin, Waltham or Rockford watches. When ordering be sure to mention on the order the name of movement you desire. Prices are for HUNTING CASES, fitted at the factory with the movements named.

**How To Select Your Watch**

Women never buy men's watches for themselves, but men frequently make the mistake of buying a lady's watch for their own use.

Some men say they only want a watch for Sundays. All watches illustrated in our Catalogs are for sale and we want to sell you the kind of watch you prefer but do not buy a "Sunday Watch." A watch that is not durable enough to have with you every hour of every day in the week is not a good investment, no matter what its price may be.
